IEE Proceedings

The Institution of Electrical Engineers, Savoy Place, London WC2R 0BL, United Kingdom
Publishing Department: Michael Faraday House, Six Hills Way, Stevenage, Herts. SG1 2AY, United Kingdom

Volume 143 1996

The *IEE Proceedings* is published in twelve titles, as follows:

IEE Proceedings — Science, Measurement and Technology

IEE Proceedings — Electric Power Applications

IEE Proceedings — Generation, Transmission and Distribution

IEE Proceedings — Control Theory and Applications

IEE Proceedings — Computers and Digital Techniques

IEE Proceedings — Radar, Sonar and Navigation

IEE Proceedings — Circuits, Devices and Systems

IEE Proceedings — Microwaves, Antennas and Propagation

IEE Proceedings — Communications

IEE Proceedings — Optoelectronics

IEE Proceedings — Vision, Image and Signal Processing

IEE Proceedings — Software Engineering

Six issues of each title are published during the year.

This publication is copyright under the Berne Convention and the Universal Copyright Convention. All rights reserved. Apart from any copying under the UK Copyright, Designs and Patents Act 1988, Part 1, Section 38, whereby a single copy of this article may be supplied, under certain conditions, for the purposes of research or private study, by a library of a class prescribed by The Copyright (Librarians and Archivists) (Copying of Copyright Material) Regulations 1989: SI 1989/1212, no part of this publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means without the prior permission of the copyright owners. Permission is, however, not required to copy individual contributions on condition that a full reference to the source is shown.

Single copies may be made for the purpose of research or private study.

Authorisation to photocopy items for internal or personal use, or for the internal or personal use of specific clients, is granted by the Institution of Electrical Engineers for libraries and other users registered with the Copyright Clearance Center Transactional Reporting Service, provided that the base fee of $10.00 per copy is paid directly to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA. This consent does not extend to other kinds of copying, for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale.

Multiple copying of the content of this publication without permission is always illegal.

The telephone number of the IEE London office is 0171 240 1871; telex: 261176 IEELDN G; facsimile: 0171 240 7735.

The IEE is not as a body responsible for the opinions expressed by individual authors.
The IEE is a member of the Association of Learned & Professional Society Publishers.

ADAPTIVE CONTROL

Adaptive power system stabiliser based on pole-shifting technique **GTD** p96
Artificial neural-network-based protection scheme for controllable series-compensated EHV transmission lines **GTD** p535
Closed-loop power control in CDMA systems **COM** p231
Control of rigid robot manipulators via combination of adaptive sliding mode control and compensated inverse dynamics approach **CTA** p283
Neuro-adaptive hybrid controller for robot-manipulator tracking control **CTA** p270
Robust adaptive force/motion control of constrained robots **CTA** p103
Robust indirect adaptive control of the electrohydraulic velocity control systems **CTA** p448

AEROSPACE SYSTEMS

Alternative approach to aeroservoelastic design and clearance **CTA** p1
Analysis of stabilised output error methods **CTA** p209
Satellite attitude control via sliding mode with perturbation estimation **CTA** p276
Static controllers for magnetic suspension and balance systems **CTA** p338

AMPLIFIERS

6H silicon carbide MOSFET modelling for high temperature analogue integrated circuits (25-500°C) **CDS** p115
Amplifier linearisation through the use of special negative linear feedback **CDS** p61
Design assistant approach to analogue layout generation **CDS** p213
Fully passivated W-band InAlAs/InGaAs/InP monolithic low noise amplifiers **MAP** p361
Input impedance and output impedance of feedback amplifiers **CDS** p195
Power amplifier performance and modelling of one-emitter-finger GaAlAs/GaAs heterojunction bipolar transistor **CDS** p352
Quad-input current-mode asymmetric cell (CMAC) with error correction applications in single-ended and balanced audio amplifiers **CDS** p46
Stability analysis of Cartesian feedback linearisation for amplifiers with weak nonlinearities **COM** p212
TLM diakoptics for coupled-mode analysis of GaAs MESFET distributed amplifier **MAP** p261

ANALOGUE ELECTRONICS

Analogue realisation of integrated FIR filters **CDS** p274
Analysis of multilayer inset dielectric guides containing magnetised ferrites **MAP** p390
Cost/benefit analysis of the P1149.4 mixed-signal test bus **CDS** p393
Design assistant approach to analogue layout generation **CDS** p213
Hierarchical frequency-domain robust component failure detection scheme for large-scale analogue circuits with component tolerances **CDS** p53
Low-supply-noise low-power embedded modular SRAM **CDS** p73
Low-voltage CMOS four-quadrant multiplier based on square-difference identity **CDS** p174
Millimetre-wave frequency tripling using stacked heterostructure-barrier varactors on InP **MAP** p272
Mixed signal test–techniques, applications and demands **CDS** p358
S-band digital downconverter for radar applications based on a GaAs MMIC fast sample-and-hold **CDS** p337
Supply current test of analogue and mixed signal circuits **CDS** p399

ANTENNA ACCESSORIES

Analysis of quasiperiodic reflector antenna **MAP** p293
Asymmetrical Gauss-Hermite beam mode analysis of corrugated pyramidal rectangular horn **MAP** p385
D-fibre antenna for microcellular mobile communication systems **OPT** p370
Improved solution for mode coupling in different-sized circular apertures and its application **MAP** p457
Research on microstrip multiway unequal power divider/combiner **MAP** p437
Scattering from a dielectric cylinder axially loaded with periodic metallic rings **MAP** p233
Slot-coupled self-diplexing array antenna for mobile satellite communications **MAP** p119
Synthesis technique for scanning and/or reconfigurable beam reflector antennas with phase-only control **MAP** p402
Volume-conformation method to study scattering by PEC objects with FDTD **MAP** p131

ANTENNA ARRAYS

Balanced antipodal Vivaldi antenna for wide bandwidth phased arrays **MAP** p97
Bifurcated waveguide fed broadwall slots radiating through a baffle **MAP** p465
Cross-coupling between open-ended coaxial radiators **MAP** p265
Derivation of orthogonal beams and their application to beamforming in small phased arrays **MAP** p304
Electronically steered antenna system for the Australian Mobilesat **MAP** p347
Improved solution for mode coupling in different-sized circular apertures and its application **MAP** p457
Increasing the capacity of GSM cellular radio using adaptive antennas **COM** p304
Monopulse estimation with subarray-adaptive arrays and arbitrary sum and difference beams **RSN** p232
Novel surface-wave antenna **MAP** p1
Pattern synthesis with null constraints for circular arrays of equally spaced isotropic elements **MAP** p103
Research on microstrip multiway unequal power divider/combiner **MAP** p437
S-parameter analysis of multislot microstrip patch arrays: spectral domain approach **MAP** p430
Scattering from elongated objects: direct solution in O(N $\log^2$ N) operations **MAP** p277
Single-layer dipole array for linear-to-circular polarisation conversion of slotted waveguide array **MAP** p211
Slot-coupled self-diplexing array antenna for mobile satellite communications **MAP** p119
Synthesis technique for scanning and/or reconfigurable beam reflector antennas with phase-only control **MAP** p402

ANTENNA THEORY

Active frequency-selective surfaces **MAP** p62
Analysis of post-tuned cavity-backed circular microstrip patch antennas **MAP** p18
Analysis of surface-wave excitation and radiation mechanisms of a monopole on a circular grounded dielectric slab with critical thickness **MAP** p335
Application of the extinction theorem to some antenna problems **MAP** p471
Asymmetrical Gauss-Hermite beam mode analysis of corrugated pyramidal rectangular horn **MAP** p385
Bifurcated waveguide fed broadwall slots radiating through a baffle **MAP** p465
Characterisation of near-field focusing with application to low altitude beam focusing of the Arecibo tri-reflector system **MAP** p284
Compact antenna range performance evaluation using simulated pattern measurements **MAP** p200
Derivation of orthogonal beams and their application to beamforming in small phased arrays **MAP** p304
Effect of cross-polar coupling on open area test site measurement correlation and repeatability **SMT** p202
Electric field integral equation for cylindrical structures **MAP** p147
Entire-domain analysis of thin-wire antennas in layered media **MAP** p317
European intercomparison of antenna factors in the frequency range 30 MHz to 1 GHz **SMT** p229
Fabry-Perot approach to the design of double layer FSS **MAP** p157
Improved solution for mode coupling in different-sized circular apertures and its application **MAP** p457
Method of residuals applied to wire antenna calculations **SMT** p309
Mode charts for confocal annular elliptic resonators **MAP** p358
Monopulse estimation with subarray-adaptive arrays and arbitrary sum and difference beams **RSN** p232
Novel surface-wave antenna **MAP** p1
Pattern synthesis with null constraints for circular arrays of equally spaced isotropic elements **MAP** p103
Radiation by axial slots on a dielectric-coated nonconfocal conducting elliptic cylinder **MAP** p124
Radiation characteristics of a spherical helical antenna **MAP** p7
Radiation characteristics of rectangular patch antennas with a laminated ground plane **MAP** p107
Scattering from a dielectric cylinder axially loaded with periodic metallic rings **MAP** p233
Simulated annealing applied to the Misell algorithm for phase retrieval **MAP** p298
Synthesis technique for scanning and/or reconfigurable beam reflector antennas with phase-only control **MAP** p402
Theoretical and experimental characterisation of CPW-fed microstrip antennas **MAP** p13
Theoretical investigation of aperture-coupled rectangular dielectric resonator antenna **MAP** p113
Use of quiet zone prediction in the design of compact antenna test ranges **MAP** p193

ARRAY SIGNAL PROCESSING

Detection of the number of signals in noise with banded covariance matrices **RSN** p289
Efficient digital signal processing algorithm for sonar imaging **RSN** p149
Estimation of the directions of arrival of spatially dispersed signals in array processing **RSN** p1
Increasing the capacity of GSM cellular radio using adaptive antennas **COM** p304
Monopulse estimation with subarray-adaptive arrays and arbitrary sum and difference beams **RSN** p232
Phased array acoustic imaging in ground co-ordinates, with extension to synthetic aperture processing **RSN** p131
QR versus IQR algorithms for adaptive signal processing: performance evaluation for radar applications **RSN** p328
Side scan sonar using phased arrays for high resolution imaging and wide swath bathymetry **RSN** p163
Towed-array beamforming during ship's manoeuvring **RSN** p210
Two-dimensional spatial-spectrum estimation of coherent signals without spatial smoothing and eigendecomposition **RSN** p295

AUDIO EQUIPMENT

Quad-input current-mode asymmetric cell (CMAC) with error correction applications in single-ended and balanced audio amplifiers **CDS** p46
Regular implementation algorithms of time domain aliasing cancellation **VIS** p387
Two-stage bit allocation algorithm for stereo audio coder **VIS** p331

AUTOMATA THEORY

Cellular automata based scheme for solution of Boolean equations **CDT** p174

AUTOMATIC TEST SYSTEMS

Application of ultrasound to the inspection of insulation **SMT** p177
Automatic calibration of precision and programmable AC measuring instruments at IEN **SMT** p259
Automatic test generation algorithms for analogue circuits **CDS** p366
Combining design and operational knowledge to enhance generator plant diagnostics **GTD** p300
Cost/benefit analysis of the P1149.4 mixed-signal test bus **CDS** p393
Experimental optimisation of flexible measurement systems **SMT** p77
Fault analysis and automatic test pattern generation for break faults in programmable logic arrays **CDS** p157
Generic DFT approach for pattern sensitive faults in word-oriented memories **CDT** p199
Improved HTSC surface loss measurements evaluating a multipath transmission signal **MAP** p491
Mixed signal test–techniques, applications and demands **CDS** p358
Nonstationary behaviour of partial discharges in a generator stator conductor due to voltage conditioning effects **SMT** p285
Supply current test of analogue and mixed signal circuits **CDS** p399

BIOLOGICAL AND BIOMEDICAL SYSTEMS

Comparison of computational electromagnetic codes applied to a sphere canonical problem **MAP** p309
Computer vision applied to the detection and localisation of acoustic neuromas from head MR images **VIS** p265
Fractional lower-order statistics-based ambiguity functions for differential delay Doppler estimation **RSN** p358
Genetic algorithm implementation of stack filter design for image restoration **VIS** p177
Multicriterion Compton backscatter imaging **SMT** p357
Object boundary location by region and contour deformation **VIS** p353
Subsurface electrical impedance imaging using orthogonal linear electrode arrays **SMT** p41

CABLES AND OVERHEAD LINES

Application of ultrasound to the inspection of insulation **SMT** p177
Artificial neural-network-based protection scheme for controllable series-compensated EHV transmission lines **GTD** p535
Computer-aided design of a new nonunit protection scheme for EHV teed circuits **GTD** p142
Consideration of corona onset from a water drop as a function of air pressure **SMT** p125
Cross-coupling between open-ended coaxial radiators **MAP** p265
Decoupled simulation of asymmetrical three-phase power network transients **GTD** p587
Effect of an antioxidant additive on morphology and space-charge characteristics of low-density polyethylene **SMT** p26
Effects of dry-band arc current on ageing of self-supporting dielectric cables in high fields **SMT** p10
Effects of magnetic field induction and ground potential rise on pilot wire relay system operations **GTD** p290
Fault location on two-terminal transmission lines based on voltages **GTD** p1
Improving the traceability of coaxial impedance measurements at lower RF in the UK **SMT** p241
Line monitoring and fault location using spread spectrum on power line carrier **GTD** p427
Modelling of a transmission tower for lightning-surge analysis **GTD** p283
Modelling of corona at a high-voltage conductor under double exponential and oscillatory impulses **SMT** p277
Nonunit protection technique for EHV transmission systems based on fault-generated noise. Part 3: Engineering and HV laboratory testing **GTD** p276
Numerical and experimental evaluation of magnetic field generated by power busbar systems **GTD** p455
On-line leakage current monitoring of 400 kV insulator strings in polluted areas **GTD** p560
Response of underground multiconductor cable systems to external fields illumination **SMT** p137

CALIBRATION

Automatic calibration of precision and programmable AC measuring instruments at IEN **SMT** p259
Computational method for remote meter calibration in power systems **GTD** p393
Control and integration techniques in a fully automated manufacturing cell for carbon composites **CTA** p159
European intercomparison of antenna factors in the frequency range 30 MHz to 1 GHz **SMT** p229
Improving the traceability of coaxial impedance measurements at lower RF in the UK **SMT** p241
Low measurement uncertainties in the frequency range 30 MHz to 1 GHz using a calculable standard dipole antenna and national reference ground plane **SMT** p221
Online compensation and calibration of a chromatically addressed, photoelastic strain sensor with optical fibre transmission **SMT** p166
Sparkover voltage of sphere gaps under standard lightning and switching impulse voltages **SMT** p187
Towards a new partial discharge calibration strategy based on the transfer function of machine stator windings **SMT** p57
Traceable magnetic field strength measurements to 120 kHz **SMT** p255
Ultrasonic pulse-phase method applied in fluid flow measurements **SMT** p327
Wideband I/Q demodulators: measurement technique and matching characteristics **RSN** p300

CAPACITORS

Capacitance relations for a class of two-dimensional conductor configurations **SMT** p302
Field-enhanced nonequilibrium C/V and I/V characteristics of MOS capacitor under linear voltage ramp bias **CDS** p343
Intensity modulated photoeffects in InP-MIS capacitors **OPT** p248
Modelling of thin-film HTS/ferroelectric interdigital capacitors **MAP** p397
Suppression of image frequency mode in microprocessor-controlled frequency synthesising systems **CDS** p171

CIRCUIT BREAKERS

Coaxial shunt intended for transient current measurement in a pseudospark switch **SMT** p119
Effect of PTFE dielectric properties on high voltage reactor load switching **SMT** p195
Interaction of helical arc devices with interconnected networks **GTD** p89
New tap changing scheme **EPA** p108
Rotating arc interrupter with independent field excitation **SMT** p113

CIRCUIT CAD

Current-mode ladder filters using multiple output current conveyors **CDS** p218
Novel low-voltage BiCMOS digital circuits employing a lateral p-n-p BJT in a p-MOS structure **CDS** p83

CIRCUIT COMPONENTS

Capacitance relations for a class of two-dimensional conductor configurations **SMT** p302
Degradation of ZnO based surge arresters under field conditions **SMT** p291
Factors affecting the development of the radio proximity fuse 1940-1944 **SMT** p1
IGBT based zero voltage transition full bridge PWM converter for high power applications **EPA** p475
Interfacial layer as an evaluation criterion of electrical contacts **SMT** p143
Nonstationary behaviour of partial discharges in a generator stator conductor due to voltage conditioning effects **SMT** p285
Thermal fatigue of the contact/conductors system in emergency load panels **SMT** p298

CIRCUIT THEORY AND DESIGN

1.1 V full-swing double bootstrapped BiCMOS logic gates **CDS** p41
Analogue fault simulation in standard VHDL **CDS** p380
Capacitively coupled oscillator array behaviour **CDS** p167
Cellular automata based scheme for solution of Boolean equations **CDT** p174
Concurrent programming and simulation of decoupled power electronic circuits **SMT** p131
Correction of the parameters of the equivalent circuit proposed by Montgomery for a two-terminal-pair junction **MAP** p542
Current-mode ladder filters using multiple output current conveyors **CDS** p218
Design assistant approach to analogue layout generation **CDS** p213
Design method for impedance matching networks **CDS** p186
Design of linear phase Nyquist filters **CDS** p139
Electromagnetic modelling and transient simulation of interconnects in high speed VLSI circuits **MAP** p373
Exact determination of the natural modes of some Cauer filters by means of a standard analytical procedure **CDS** p134
Graph-theoretic algorithm for finding maximal supergates in combinational logic circuits **CDS** p313
Hierarchical frequency-domain robust component failure detection scheme for large-scale analogue circuits with component tolerances **CDS** p53
Hierarchical placement method based on a force-directed algorithm with simultaneous global routing for sea-of-gates **CDT** p1
Improved TLM link model for reactive circuit components **SMT** p341
Input impedance and output impedance of feedback amplifiers **CDS** p195
Layout-driven chaining of scan flip-flops **CDT** p421
LIMSoft: automated tool for sensitivity analysis and test vector generation **CDS** p386
Mask-programmable multiple-valued logic gate using resonant tunnelling diodes **CDS** p289
Modelling of the quasisaturation behaviour in the high-voltage MOSFET with vertical trench gate **CDS** p28
Note on optimal tile partition for space region of integrated-circuit geometry **CDT** p246
Novel low-voltage BiCMOS digital circuits employing a lateral p-n-p BJT in a p-MOS structure **CDS** p83
Parallel event-driven logic simulation algorithms: tutorial and comparative evaluation **CDS** p177
Parallel event-driven MOS timing simulator on distributed memory multiprocessors **CDS** p207
Quad-input current-mode asymmetric cell (CMAC) with error correction applications in single-ended and balanced audio amplifiers **CDS** p46
Removing CSC violations in asynchronous circuits by delay padding **CDT** p413
Synthesis and performance analysis of universal minimum component integrator-based IFLF OTA-grounded capacitor filter **CDS** p107
Synthesis of canonic single-resistance-controlled-oscillators using a single current-feedback-amplifier **CDS** p71
TLM diakoptics for coupled-mode analysis of GaAs MESFET distributed amplifier **MAP** p261
UHF intermodulation product prediction in digital systems using SPICE: the need for nonlinear macromodels **SMT** p313

CLOSED LOOP SYSTEMS

Closed-loop power control in CDMA systems **COM** p231
Dynamic characteristics and closed-loop performance of the series-parallel resonant converter **EPA** p345
Dynamic performance limitations for MRAS based sensorless induction motor drives. I. Stability analysis for the closed loop drive **EPA** p113
Frequency based tuning of SISO controllers for two-by-two processes **CTA** p49
Frequency domain design methodology for uncertain cascaded multiple-loop systems with plant modification **CTA** p409
Input filter stability of drives fed from voltage inverters controlled by direct flux and torque control methods **EPA** p396
Loop transfer recovery for systems under sampled measurements **CTA** p333
Neuro-adaptive hybrid controller for robot-manipulator tracking control **CTA** p270
Optimal entire eigenstructure assignment of discrete-time linear systems **CTA** p301
Quadratic guaranteed cost control with robust pole placement in a disk **CTA** p37
Robust nonlinear controller for power system transient stability enhancement with voltage regulation **GTD** p407
Static controllers for magnetic suspension and balance systems **CTA** p338

CMOS INTEGRATED CIRCUITS

3.3 V class AB switched-current circuits and systems **CDS** p97
Accelerated quasi-DC method and circuit for measuring the gate-drain coupling capacitance for devices within a CMOS process technology **CDS** p302
Analogue realisation of integrated FIR filters **CDS** p274
CMOS differential difference current conveyors and their applications **CDS** p91
Design and VLSI architecture and implementation of wave digital filters using short signed digit coefficients **CDS** p259
Design assistant approach to analogue layout generation **CDS** p213
Efficient hybrid tree/linear array architectures for block-matching motion estimation algorithms **VIS** p217
Estimating power consumption of CMOS circuits modelled as symbolic neural networks **CDT** p331
Functionally asynchronous array processor for morphological filtering of greyscale images **CDT** p273
High-performance two-phase micropipeline building blocks: double edge-triggered latches and burst-mode select and toggle circuits **CDS** p282
Low-voltage CMOS four-quadrant multiplier based on square-difference identity **CDS** p174

Nonstuck behaviour of open circuit supply faults in CMOS logic circuits **CDS** p9
Parametric fault identification and dynamic compensation techniques for cellular neural network hardware **CDS** p295

CODES AND DECODING

Array codes over rings and their trellis decoding **COM** p241
Artificial neural networks for nonlinear time-domain filtering of speech **VIS** p149
BDD-based spectral approach for Reed-Muller circuit realisation **CDT** p145
Block classification for an adaptive 1-D/2-D DCT video coding **VIS** p155
Bound for Minkowski metric or quadratic metric applied to VQ codeword search **VIS** p67
Comment on Public-key cryptosystem design based on factoring and discrete logarithms [and reply] **CDT** p96
Compressed video processing for cut detection **VIS** p315
Database of best T-codes **CDT** p213
Design of efficient balanced codes with minimum distance 4 **COM** p177
Destructive collision-free protocol for distributed DS/CDMA wireless networks using code-sensing and chip-rate-division techniques **COM** p47
DM-like differential chain code for handwriting and line graphics **VIS** p96
Efficient classification and codebook design for CVQ **VIS** p344
Efficient hybrid tree/linear array architectures for block-matching motion estimation algorithms **VIS** p217
Evaluation of efficient trellis methods for soft decision decoding of Reed-Solomon codes **COM** p61
Generalised T-codes: extended construction algorithm for self-synchronising codes **COM** p122
Hybrid-ARQ system for HF channels based on codeword partitioning **COM** p73
Hybrid wavelength hopping/time spreading code division multiple access systems **OPT** p161
Image coding by multistep, adaptive flux interpolation **VIS** p337
Image coding using wavelet transform and classified vector quantisation **VIS** p285
Low bit-rate video coding with spatio-temporal geometric transforms **VIS** p164
Modified Haru signature scheme based on factorising and discrete logarithms **CDT** p196
Morphological operations on crack coded binary images **VIS** p171
New decoder for double-error-correcting binary BCH codes **COM** p129
Noncoherent detection with Viterbi decoding for GMSK signals **COM** p373
Optimal quantisation strategy for DCT image compression **VIS** p10
Performance and statistical analysis of two-layer MPEG coding algorithms for ATM networks **COM** p155
Performance of infrared transmission systems under ambient light interference **OPT** p339
Performance of Reed-Solomon codes with dependent symbol errors **COM** p117
Preventive flow control method for packet video **COM** p98
Pyramid-structured progressive image transmission using quantisation error delivery in transform domains **VIS** p132
Reduced-state trellis and its decoding for full-response CPM **COM** p68
Region-based image coding using polynomial intensity functions **VIS** p15
Regular implementation algorithms of time domain aliasing cancellation **VIS** p387
Reliability levels for fault-tolerant linear processing using real number error correction **CDT** p355
Reliability-throughput: optimisation for adaptive forward error correction systems **COM** p341
Ring-TCM for fixed and fading channels: land-mobile satellite fading channels with QAM **COM** p281
Ring-TCM for M-PSK modulation: AWGN channels and DSP implementation **COM** p273
Simple method for generating distance spectrum and multiplicities of convolutional codes **COM** p247
Source coding of wavelet-transformed digital HDTV for recording applications **VIS** p1
Source combined linear predictive analysis in pulse-based speech coders **VIS** p143
Surface triangulation for 3-D scene model construction from stereo **VIS** p310
Tabular techniques for generating Kronecker expansions **CDT** p205
Two-stage bit allocation algorithm for stereo audio coder **VIS** p331
Type-1 hybrid ARQ scheme with time diversity for binary digital FM cellular radio **COM** p29
Watermarking digital images for copyright protection **VIS** p250

COMMUNICATION SYSTEM THEORY

Analysis of bandwidth allocation schemes for transmission of VBR video traffic on a FODA satellite network **COM** p12
Arrayed-waveguide grating lasers and their applications to tuning-free wavelength routing **OPT** p322
ATM switch capable of supporting unichannel and multichannel transmission **COM** p141
Bayesian decision feedback equaliser for overcoming co-channel interference **COM** p219
Cellular CDMA overlay systems **COM** p389
Closed-loop power control in CDMA systems **COM** p231
Design and performance evaluation of a distributed knockout switch with input and output buffers **COM** p149
Destructive collision-free protocol for distributed DS/CDMA wireless networks using code-sensing and chip-rate-division techniques **COM** p47
Discrete-time model for digital communications over a frequency-selective Rician fading WSSUS channel **COM** p37
Dynamic control of time slot assignment in multiaccess reservation protocols **COM** p167
Graph-theory-based protocol to provide centralised management of an extended LAN topology **COM** p182
Hybrid-ARQ system for HF channels based on codeword partitioning **COM** p73
Hybrid wavelength hopping/time spreading code division multiple access systems **OPT** p161
Iterative interference cancellation for FFH/MFSK MA systems **COM** p380
Optimal blocked random access algorithm for CDMA-random access systems **COM** p396
Optimum time diversity for channels subject to pulse-burst interference **COM** p43
Orwell-D: medium access control for data, speech and two-layer video **COM** p189
Performance analysis of an output queueing ATM switch with heterogeneous traffic and multiple QoS **COM** p356
Performance analysis of nonpersistent idle-signal casting multiple access with collision-detection (ICMA/CD) protocol **COM** p162
Performance, interarrival, and correlation analysis of four-phase MMPP model in ATM-based B-ISDN **COM** p363
Performance of fault tolerant ATM switches **COM** p317
Queueing system with queue length dependent service times and its application to cell discarding scheme in ATM networks **COM** p5
Reliability-throughput: optimisation for adaptive forward error correction systems **COM** p341
Silica-based optical integrated circuits **OPT** p263
Sojourn time analysis of prioritised DQDB (IEEE802.6) MAN with bursty traffic input **COM** p112
Source modelling, queueing analysis, and bandwidth allocation for VBR MPEG-2 video traffic in ATM networks **COM** p197
Suppression of multiple access interference in a DS-CDMA system using Wiener filtering and parallel cancellation **COM** p226
Use of second order Markov chains to model digital symbol synchroniser performance **COM** p250

COMPUTATIONAL COMPLEXITY

Adaptive scheduling algorithm based on mixed graph model **CTA** p9
Alternative algorithm for optimisation of Reed-Muller universal logic module networks **CDT** p385
Application of aggregation strategies in the solution of the optimal routing problem in data networks **CDT** p120
Array codes over rings and their trellis decoding **COM** p241
Backpropagation without multiplier for multilayer neural networks **CDS** p229
Branch merging for scheduling concurrent executions of branch operations **CDT** p369
Cellular automata based scheme for solution of Boolean equations **CDT** p174
Dynamic evaluation strategy for fine-grain data-parallel computing **CDT** p181
Efficient technique for circle detection using hypothesis filtering and Hough transform **VIS** p292
Exact minimisation of Kronecker expressions for symmetric functions **CDT** p349
Fast algorithm for pseudodiscrete Wigner-Ville distribution using moving discrete Hartley transform **VIS** p383
Functional testing of pipelined processors **CDT** p318
Gaussian-elimination-based algorithm for solving linear equations on mesh-connected processors **CDT** p407
Genetic algorithm implementation of stack filter design for image restoration **VIS** p177
Graph-theoretic algorithm for finding maximal supergates in combinational logic circuits **CDS** p313
GRMIN2: a heuristic simplification algorithm for generalised Reed-Muller expressions **CDT** p376
Image coding using wavelet transform and classified vector quantisation **VIS** p285
Intelligent controller design for the ship steering problem **CTA** p17
New reduced load heuristic for computing blocking in large multirate loss networks **COM** p206
Optimum partitioning of rectilinear layouts **CDT** p440
Parallel event-driven logic simulation algorithms: tutorial and comparative evaluation **CDS** p177
Piecewise estimation of the performability of computer systems **CDT** p129
Regular implementation algorithms of time domain aliasing cancellation **VIS** p387
Scattering from elongated objects: direct solution in $O(N \log^2 N)$ operations **MAP** p277
Simple method for generating distance spectrum and multiplicities of convolutional codes **COM** p247
Text string extraction from images of colour-printed documents **VIS** p210

COMPUTER APPLICATIONS

1.1 V full-swing double bootstrapped BiCMOS logic gates **CDS** p41
A new single-phase active power filter with reduced energy-storage capacity **EPA** p25
A toolbox for minimal state space model realisation **CTA** p152
Accurate approximation to the optimum parameter estimate for K-distributed clutter **RSN** p383
Analogue fault simulation in standard VHDL **CDS** p380
Application of ultrasound to the inspection of insulation **SMT** p177
Artificial neural-network-based protection scheme for controllable series-compensated EHV transmission lines **GTD** p535
Artificial neural network power system stabiliser trained with an improved BP algorithm **GTD** p135
Automatic visual inspection based upon a variant of the n-tuple technique **VIS** p301
Concurrent programming and simulation of decoupled power electronic circuits **SMT** p131
Control and integration techniques in a fully automated manufacturing cell for carbon composites **CTA** p159
Current-mode ladder filters using multiple output current conveyors **CDS** p218
Current sensorless field-oriented control of induction motors **EPA** p492
Design assistant approach to analogue layout generation **CDS** p213
Designing a reusable co-ordination module for cooperative industrial control applications **CTA** p91
Digital redesign of cascaded analogue controllers for sampled-data interval systems **CTA** p489
Discrete integral variable structure model following control for induction motor drivers **EPA** p467
Error specification, monitoring and recovery in computer-integrated manufacturing: an analytic approach **CTA** p499
Experimental optimisation of flexible measurement systems **SMT** p77
Fault analysis and automatic test pattern generation for break faults in programmable logic arrays **CDS** p157
Formula for the effect of a static VAr compensator on synchronising torque coefficient **GTD** p582
Graphical method of prediction of limit cycle for multivariable nonlinear systems **CTA** p423
Ground clutter model for airborne MPRF radars in look-down search mode **RSN** p113
Hierarchical placement method based on a force-directed algorithm with simultaneous global routing for sea-of-gates **CDT** p1
Improved prediction of I_{F2} and I_G indices using neural networks **MAP** p341
Improved TLM link model for reactive circuit components **SMT** p341
Intelligent controller design for the ship steering problem **CTA** p17
Inverse kinematics computations with modified CORDIC iterations **CDT** p87
Less expensive test pattern generation technique **CDT** p17
LIMSoft: automated tool for sensitivity analysis and test vector generation **CDS** p386
Mask-programmable multiple-valued logic gate using resonant tunnelling diodes **CDS** p289
Modelling of the quasisaturation behaviour in the high-voltage MOSFET with vertical trench gate **CDS** p28

Multifrequency SAR observation of a ship wake **RSN** p275
New inverter-driven design and control method for two-phase induction motor drives **EPA** p458
Nonlinear and sampled data control systems analysis using spreadsheets **SMT** p52
Nonlinear optimal-variable-aim strategy for improving multimachine power system transient stability **GTD** p249
Nonstationary behaviour of partial discharges in a generator stator conductor due to voltage conditioning effects **SMT** p285
Note on optimal tile partition for space region of integrated-circuit geometry **CDT** p246
Online rescheduling of mass rapid transit systems: fuzzy expert system approach **EPA** p307
Optimal and robust digital current controller synthesis for vector-controlled induction motor drive systems **EPA** p141
Parallel event-driven logic simulation algorithms: tutorial and comparative evaluation **CDS** p177
Parallel event-driven MOS timing simulator on distributed memory multiprocessors **CDS** p207
Paving: a new implementation of dual-bound resistance calculations **SMT** p15
Process performance monitoring using multivariate statistical process control **CTA** p132
Reconfigurable parallel VLSI processor for dynamic control of intelligent robots **CDT** p23
Reliable online adaptation of models with variable time delays **CTA** p417
Rule-based approach to load transfer to alternate supplies based on the phase of the residual voltage on the disconnected busbar **GTD** p467
Screening of variables for the empirical modelling of semiconductor devices **SMT** p319
Self-tuning control applied to turbogenerator AVRs **GTD** p492
Simulations of the positioning accuracy of integrated vehicular navigation systems **RSN** p121
Solid-state on-load transformer tap changer **EPA** p481
Specification of software for emergency shutdown system of an offshore installation **CDT** p9
SPICE modelling of impact ionisation effects in silicon bipolar transistors **CDS** p33
Telerobot control and real-time simulation environment using parallel processing **CTA** p543
UHF intermodulation product prediction in digital systems using SPICE: the need for nonlinear macromodels **SMT** p313
Use of group theory in symmetrical 3-D eddy-current problems **SMT** p369
Weld bead placement system for multipass welding [using transputer-based laser triangulation vision system] **SMT** p85

COMPUTER COMMUNICATIONS

Graph-theory-based protocol to provide centralised management of an extended LAN topology **COM** p182
Holograms for optical wireless LANs **OPT** p365
Hybrid wavelength hopping/time spreading code division multiple access systems **OPT** p161
Multiprocessor system for interconnection of Ethernet and FDDI networks using ATM via satellite **CDT** p69
Optical power distribution in wireless infrared LANs **COM** p93
Orwell-D: medium access control for data, speech and two-layer video **COM** p189
Performance of an optical backplane bus for switch interconnection **OPT** p237
Sojourn time analysis of prioritised DQDB (IEEE802.6) MAN with bursty traffic input **COM** p112

CONTROL SYSTEMS ANALYSIS

A toolbox for minimal state space model realisation **CTA** p152
Adaptive power system stabiliser based on pole-shifting technique **GTD** p96
Analysis of linear discrete SISO control systems via a set of delta functions **CTA** p514
Application of fuzzy logic stabilisers in a multimachine power system environment **GTD** p263
Application of nonlinear control to switched reluctance motors: a feedback linearisation approach **EPA** p371
Application of the controllable series compensator in damping power system oscillations **GTD** p359
Artificial neural-network-based protection scheme for controllable series-compensated EHV transmission lines **GTD** p535
Comparison of modal controllability between FACTS-based stabilisers and PSS in increasing the oscillation stability of multimachine power systems **GTD** p575
Decentralised control design of uncertain nominally linear symmetric composite systems **CTA** p530
Design and analysis of neural/fuzzy variable structural PID control systems **CTA** p200
Design of nonlinear robust excitation control for multimachine power systems **GTD** p253
Digital redesign of cascaded analogue controllers for sampled-data interval systems **CTA** p489
Dynamic performance limitations for MRAS based sensorless induction motor drives. I. Stability analysis for the closed loop drive **EPA** p113
Formula for the effect of a static VAr compensator on synchronising torque coefficient **GTD** p582
Frequency based tuning of SISO controllers for two-by-two processes **CTA** p49
Frequency domain design methodology for uncertain cascaded multiple-loop systems with plant modification **CTA** p409
Frequency-shaping LQ control of Maglev suspension systems for optimal performance with deterministic and stochastic inputs **CTA** p25
Genetic algorithm aided controller design with application to SVC **GTD** p258
Graphical method of prediction of limit cycle for multivariable nonlinear systems **CTA** p423
Guaranteed rates of convergence of a class of PD controllers for trajectory tracking problems of robotic manipulators with dynamic uncertainties **CTA** p186
H_2 robust digital vector control for the induction machine **CTA** p237
Input filter stability of drives fed from voltage inverters controlled by direct flux and torque control methods **EPA** p396
Intelligent control of large power transformer cooling pumps **GTD** p474
Intelligent controller design for the ship steering problem **CTA** p17
Loop transfer recovery for systems under sampled measurements **CTA** p333
Modelling and controlling one-degree-of-freedom impacts under elastic/plastic deformations **CTA** p470
New sufficient condition for robust root clustering of linear state space models with structured uncertainty **CTA** p244
Nonlinear and sampled data control systems analysis using spreadsheets **SMT** p52
Nonlinear optimal-variable-aim strategy for improving multimachine power system transient stability **GTD** p249
Note on reachability indices of augmented systems **CTA** p477
Optimal and robust digital current controller synthesis for vector-controlled induction motor drive systems **EPA** p141
Optimal entire eigenstructure assignment of discrete-time linear systems **CTA** p301
Optimal strictly positive real approximations for stable transfer functions **CTA** p537
Output tracking control of uncertain nonlinear systems with an input time delay **CTA** p309
Parametric uncertainty bounds for performance robustness of linear systems with output feedback **CTA** p509
PID tuning for integrating and unstable processes **CTA** p429
Quadratic guaranteed cost control with robust pole placement in a disk **CTA** p37
Reliable online adaptation of models with variable time delays **CTA** p417
Robust control of manipulators using the computed torque plus H_∞ compensation method **CTA** p64
Robust indirect adaptive control of the electrohydraulic velocity control systems **CTA** p448
Rule-based approach to load transfer to alternate supplies based on the phase of the residual voltage on the disconnected busbar **GTD** p467
Simplified control method for the single-phase active power filter **EPA** p219
Space vector representation of advanced motor models for vector controlled induction motors **EPA** p69
Stability of zeros of sampled system with fractional order hold **CTA** p296
Static controllers for magnetic suspension and balance systems **CTA** p338
Synchronous generator damping enhancement through coordinated control of exciter and SVC **GTD** p211
Theory of state covariance assignment for linear single-input systems **CTA** p289
Two-degree-of-freedom design method of LQI servo systems: use of frequency-dependent weighting matrices for sensitivity reduction **CTA** p557
User-friendly design method for fuzzy logic controller **CTA** p358
Vector control of cage induction motors: a physical insight **EPA** p59

CONTROL SYSTEM SYNTHESIS

Application of nonlinear control to switched reluctance motors: a feedback linearisation approach **EPA** p371
Application of the controllable series compensator in damping power system oscillations **GTD** p359
Decentralised control design of uncertain nominally linear symmetric composite systems **CTA** p530
Design and analysis of neural/fuzzy variable structural PID control systems **CTA** p200
Design of nonlinear robust excitation control for multimachine power systems **GTD** p253
Digital redesign of cascaded analogue controllers for sampled-data interval systems **CTA** p489
Frequency domain design methodology for uncertain cascaded multiple-loop systems with plant modification **CTA** p409
Genetic algorithm aided controller design with application to SVC **GTD** p258
Intelligent control of large power transformer cooling pumps **GTD** p474
Intelligent controller design for the ship steering problem **CTA** p17
Nonlinear optimal-variable-aim strategy for improving multimachine power system transient stability **GTD** p249
Operation control of paralleled three-phase battery energy storage system **EPA** p317
Optimal and robust digital current controller synthesis for vector-controlled induction motor drive systems **EPA** p141
Quadratic guaranteed cost control with robust pole placement in a disk **CTA** p37
Robust indirect adaptive control of the electrohydraulic velocity control systems **CTA** p448
Simplified control method for the single-phase active power filter **EPA** p219
Theory of state covariance assignment for linear single-input systems **CTA** p289
Two-degree-of-freedom design method of LQI servo systems: use of frequency-dependent weighting matrices for sensitivity reduction **CTA** p557
User-friendly design method for fuzzy logic controller **CTA** p358

CONVERTORS

A doubly fed induction generator using back-to-back PWM converters supplying an isolated load from a variable speed wind turbine **EPA** p380
A new single-phase active power filter with reduced energy-storage capacity **EPA** p25
Automatic calibration of precision and programmable AC measuring instruments at IEN **SMT** p259
Comparison between space vector modulation and subharmonic methods for current harmonics of DSP-based permanent-magnet AC servo motor drive system **EPA** p151
Current sensorless field-oriented control of induction motors **EPA** p492
Doubly fed induction generator using back-to-back PWM converters and its application to variable-speed wind-energy generation **EPA** p231
Dynamic characteristics and closed-loop performance of the series-parallel resonant converter **EPA** p345
Fault-tolerant permanent magnet machine drives **EPA** p437
Harmonic generation by HVDC schemes involving converters and static VAr compensators **GTD** p66
HVDC converter transformer core saturation instability: a frequency domain analysis **GTD** p75
IGBT based zero voltage transition full bridge PWM converter for high power applications **EPA** p475
Improved design for electric vehicle induction motors using an optimisation procedure **EPA** p410
Input filter stability of drives fed from voltage inverters controlled by direct flux and torque control methods **EPA** p396
Instantaneous power components in polyphase systems under nonsinusoidal conditions **SMT** p151
Investigation into optimising high switching frequency regular sampled PWM control for drives and static power converters **EPA** p281
Medium frequency combined inverter for electroheat with improved starting arrangements **EPA** p165
Modified LCLC-type series resonant converter with improved performance **EPA** p354
New inverter-driven design and control method for two-phase induction motor drives **EPA** p458
New snubber circuit with passive energy recovery for power inverters **EPA** p403
New tap changing scheme **EPA** p108
Newton solution for the steady-state interaction of AC/DC systems **GTD** p200
Novel grid-connected photovoltaic inverter **GTD** p219
Novel topologies of AC choppers **EPA** p323

Operation control of paralleled three-phase battery energy storage system **EPA** p317
Practical evaluation of different modulation techniques for current-controlled voltage source inverters **EPA** p301
Predicting performance of three-phase induction motors connected to single-phase supplies **EPA** p339
Series-parallel load-resonant converter for controlled-current arc welding power supply **EPA** p211
Simulation of three-phase loaded matrix converter **EPA** p294
Solid-state on-load transformer tap changer **EPA** p481
Suppression of transmission system oscillations by thyristor-controlled series compensation **GTD** p7
Variable structure control of voltage sourced reversible rectifiers **EPA** p18

CYBERNETICS AND ROBOTICS

Anytime heuristic schedule repair in manufacturing industry **CTA** p114
Check! a generic and specific industrial inspection tool **VIS** p241
Control and integration techniques in a fully automated manufacturing cell for carbon composites **CTA** p159
Control of rigid robot manipulators via combination of adaptive sliding mode control and compensated inverse dynamics approach **CTA** p283
Convergence analysis of binary relation inference networks **CTA** p319
Delays versus performance of visually guided systems **CTA** p436
Design of a distributed software architecture for an intelligent planning system **CTA** p125
Design of a wire-suspended mobile robot capable of avoiding path obstacles **CTA** p349
Error specification, monitoring and recovery in computer-integrated manufacturing: an analytic approach **CTA** p499
Experimental optimisation of flexible measurement systems **SMT** p77
Expert robust decentralised controller for uncertain large-scale systems **CTA** p519
Guaranteed rates of convergence of a class of PD controllers for trajectory tracking problems of robotic manipulators with dynamic uncertainties **CTA** p186
Hybrid position/force control of a hydraulic underwater manipulator **CTA** p145
Iterative learning control for discrete-time systems with exponential rate of convergence **CTA** p217
Learning systems in intelligent control: an appraisal of fuzzy, neural and genetic algorithm control applications **CTA** p367
Neuro-adaptive hybrid controller for robot-manipulator tracking control **CTA** p270
Process performance monitoring using multivariate statistical process control **CTA** p132
Real-time synchronisation of multiaxis high-speed machines, from SFC specification to Petri net verification **CTA** p164
Reconfigurable parallel VLSI processor for dynamic control of intelligent robots **CDT** p23
Robust adaptive force/motion control of constrained robots **CTA** p103
Robust control of manipulators using the computed torque plus H_∞ compensation method **CTA** p64
Segmentation of plants and weeds for a precision crop protection robot using infrared images **VIS** p118
Telerobot control and real-time simulation environment using parallel processing **CTA** p543
Temporal multiresolution analysis for a quantitative/qualitative interpretation of complex dynamic processes **CTA** p191
Visiplan: a knowledge-based modelling tool **CTA** p73
Weld bead placement system for multipass welding [using transputer-based laser triangulation vision system] **SMT** p85

DATA COMMUNICATION

Application of aggregation strategies in the solution of the optimal routing problem in data networks **CDT** p120
Graph-theory-based protocol to provide centralised management of an extended LAN topology **COM** p182
Holograms for optical wireless LANs **OPT** p365
Multiprocessor system for interconnection of Ethernet and FDDI networks using ATM via satellite **CDT** p69
Orwell-D: medium access control for data, speech and two-layer video **COM** p189
Performance of an optical backplane bus for switch interconnection **OPT** p237
Sojourn time analysis of prioritised DQDB (IEEE802.6) MAN with bursty traffic input **COM** p112
Superscalar instruction issue in an asynchronous microprocessor **CDT** p266

DATA HANDLING

DM-like differential chain code for handwriting and line graphics **VIS** p96
Graphical method of prediction of limit cycle for multivariable nonlinear systems **CTA** p423
Nonstationary behaviour of partial discharges in a generator stator conductor due to voltage conditioning effects **SMT** p285
Telerobot control and real-time simulation environment using parallel processing **CTA** p543
Text string extraction from images of colour-printed documents **VIS** p210

DATA SECURITY

Comment on Public-key cryptosystem design based on factoring and discrete logarithms [and reply] **CDT** p96
Modified Harn signature scheme based on factorising and discrete logarithms **CDT** p196

DIELECTRIC MATERIALS AND DEVICES

Acousto-optic Bragg diffraction in SiGe/Si planar waveguides **OPT** p303
Analysis of microwave resonators using transmission line modelling **SMT** p362
Improved approximation for effective permeability in microwave ferrites **MAP** p444
Microwave measurement of the nonlinear refractive index of PZT **MAP** p189
Modelling of thin-film HTS/ferroelectric interdigital capacitors **MAP** p397
Theoretical investigation of aperture-coupled rectangular dielectric resonator antenna **MAP** p113
Two-dimensional analysis of bandwidth of open hard surface **MAP** p475
Whispering gallery dielectric resonator mode GaAs FET oscillator **MAP** p441

DIGITAL ARITHMETIC

Design and implementation of a GaAs systolic floating-point processing element **CDT** p325
Design and VLSI architecture and implementation of wave digital filters using short signed digit coefficients **CDS** p259
Hardware implementation of the Lehmer random number generator **CDT** p93
High-radix digit serial division **CDS** p319
Inverse kinematics computations with modified CORDIC iterations **CDT** p87
Linear-testable and C-testable N_1N_2 modified Booth multipliers **CDT** p44
QR versus IQR algorithms for adaptive signal processing: performance evaluation for radar applications **RSN** p328
Systolic digit-serial multiplier **CDS** p14
Testable on-the-fly carry-save multiplier by alternating input data **CDT** p345

DIGITAL ELECTRONICS

3-dimensional systolic architecture for parallel VLSI implementation of the discrete cosine transform **CDS** p255
3.3 V class AB switched-current circuits and systems **CDS** p97
Design and demonstration of a real time processor for one-bit coded SAR signals **RSN** p261
Design and performance evaluation of a distributed knockout switch with input and output buffers **COM** p149
Design-for-test (DfT) study on a current mode DAC **CDS** p374
Discrete integral variable structure model following control for induction motor drivers **EPA** p467
Efficient hybrid tree/linear array architectures for block-matching motion estimation algorithms **VIS** p217
Electromagnetic modelling and transient simulation of interconnects in high speed VLSI circuits **MAP** p373
Functional testing of pipelined processors **CDT** p318
Functionally asynchronous array processor for morphological filtering of greyscale images **CDT** p273
Generic DFT approach for pattern sensitive faults in word-oriented memories **CDT** p199
Hybrid pulse width modulation/sigma-delta modulation power digital-to-analogue converter **CDS** p149
Issues in the design of a logic simulator: element modelling for efficiency **CDS** p21
Linear-testable and C-testable N_1N_2 modified Booth multipliers **CDT** p44
Low-supply-noise low-power embedded modular SRAM **CDS** p73
Noise analysis of time-averaging interpolation in D/A conversion **CDS** p143
Novel low-voltage BiCMOS digital circuits employing a lateral p-n-p BJT in a p-MOS structure **CDS** p83
QR versus IQR algorithms for adaptive signal processing: performance evaluation for radar applications **RSN** p328
Realisation and implementation of a sigma-delta bitstream FIR filter **CDS** p267
Ring-TCM for M-PSK modulation: AWGN channels and DSP implementation **COM** p273
Superscalar instruction issue in an asynchronous microprocessor **CDT** p266
Use of second order Markov chains to model digital symbol synchroniser performance **COM** p250

DIGITAL FILTERS

Cost-effective novel flexible cell-level systolic architecture for high throughput implementation of 2-D FIR filters **CDT** p436
Design and VLSI architecture and implementation of wave digital filters using short signed digit coefficients **CDS** p259
Design of digital filters for precision quadrature demodulation **VIS** p73
Design of some 2-D filters through the transformation technique **VIS** p184
Design of two-channel nonuniform-division maximally decimated filter banks using L_1 error criteria **VIS** p79
Minimax design of recursive digital filters with a lattice denominator **VIS** p377
Realisation and implementation of a sigma-delta bitstream FIR filter **CDS** p267
Systolic digit-serial multiplier **CDS** p14

DIGITAL TECHNIQUES

Dynamic scheduling in RISC architectures **CDT** p309
Performance of an optical backplane bus for switch interconnection **OPT** p237

DISCRETE SYSTEMS

Analysis of linear discrete SISO control systems via a set of delta functions **CTA** p514
Digital redesign of cascaded analogue controllers for sampled-data interval systems **CTA** p489
Discrete integral variable structure model following control for induction motor drivers **EPA** p467
Dynamic characteristics and closed-loop performance of the series-parallel resonant converter **EPA** p345
Genetic algorithm aided controller design with application to SVC **GTD** p258
H_2 robust digital vector control for the induction machine **CTA** p237
Identification of discrete Volterra series using maximum length sequences **CDS** p241
Identification of linear systems in the presence of piecewise polynomial disturbances **CTA** p305
Iterative learning control for discrete-time systems with exponential rate of convergence **CTA** p217
Loop transfer recovery for systems under sampled measurements **CTA** p333
Nonlinear and sampled data control systems analysis using spreadsheets **SMT** p52
Optimal entire eigenstructure assignment of discrete-time linear systems **CTA** p301
Real-time synchronisation of multiaxis high-speed machines, from SFC specification to Petri net verification **CTA** p164
Stability of zeros of sampled system with fractional order hold **CTA** p296

DISTRIBUTED PARAMETER SYSTEMS

Counter-example to a recent result on stabilisation of feedback control systems with infinite delays [and author's reply] **CTA** p110
Delays versus performance of visually guided systems **CTA** p436
Graphical method of prediction of limit cycle for multivariable nonlinear systems **CTA** p423

Iterative learning control for discrete-time systems with exponential rate of convergence **CTA** p217
Note on reachability indices of augmented systems **CTA** p477
Output tracking control of uncertain nonlinear systems with an input time delay **CTA** p309
Output tracking for linear uncertain time-delay systems **CTA** p481
Parameterisation of observers for time delay systems and its application in observer design **CTA** p225
Reliable online adaptation of models with variable time delays **CTA** p417
Robust stability for perturbed large-scale time-delay systems **CTA** p233

EARTH SCIENCES

Acoustic correlation sonar for vertical profiling of ocean currents to a range of 1 km **RSN** p177
Quasicubic-segmented ionospheric model **MAP** p323
Real-time synthetic aperture sonar processing system **RSN** p169
Seabed classification through multifractal analysis of sidescan sonar imagery **RSN** p140
Side scan sonar using phased arrays for high resolution imaging and wide swath bathymetry **RSN** p163

EDDY CURRENTS

Integral formulation for 3-D eddy current problems **SMT** p91
Time domain method for the nonlinear steady-state analysis of electromagnetic fields **SMT** p377
Use of group theory in symmetrical 3-D eddy-current problems **SMT** p369

ELECTRIC DISCHARGES

Application of unique measuring techniques to positive impulse corona stabilisation in SF_6 **SMT** p182
Consideration of corona onset from a water drop as a function of air pressure **SMT** p125
Determination of formative time of electrical breakdown in nitrogen-filled tube **SMT** p413
Determination of safe working 50 Hz AC electrical stresses for ceramics at high temperatures **SMT** p406
Effect of axial magnetic field on surface flashover of cylindrical dielectric solid with gas layer inside **SMT** p21
Effect of PTFE dielectric properties on high voltage reactor load switching **SMT** p195
Effects of dry-band arc current on ageing of self-supporting dielectric cables in high fields **SMT** p10
Influence of fatigue on some electrical ageing mechanisms of polymers **SMT** p395
Investigation of impulse spark trajectory in air between hemispherically-ended rod and plane electrode **SMT** p106
Investigation on the Deutsch assumption: experiment and theory **SMT** p334
Mechanical interaction of electrical trees and barriers in insulating resins **SMT** p265
Modelling of corona at a high-voltage conductor under double exponential and oscillatory impulses **SMT** p277
Modelling partial discharge excitation of UHF signals in waveguide structures using Green's functions **SMT** p63
Nonstationary behaviour of partial discharges in a generator stator conductor due to voltage conditioning effects **SMT** p285
SF_6 breakdown in GIS **SMT** p270
Towards a new partial discharge calibration strategy based on the transfer function of machine stator windings **SMT** p57

ELECTRO-OPTICAL DEVICES

Development of a library of low-loss silicon-on-insulator optoelectronic devices **OPT** p312
Optical modulation with a resonant tunnelling diode **OPT** p12
Optical switching with gain in waveguide-modulator structures **OPT** p101
Recent progress in silica-based planar lightwave circuits on silicon **OPT** p257
Theoretical investigations of electro-optical synchronisation of self-pulsating laser diodes **OPT** p31

ELECTROMAGNETIC COMPATIBILITY

Electromagnetic modelling and transient simulation of interconnects in high speed VLSI circuits **MAP** p373
European intercomparison of antenna factors in the frequency range 30 MHz to 1 GHz **SMT** p229
Low measurement uncertainties in the frequency range 30 MHz to 1 GHz using a calculable standard dipole antenna and national reference ground plane **SMT** p221
UHF intermodulation product prediction in digital systems using SPICE: the need for nonlinear macromodels **SMT** p313

ELECTROMAGNETIC INTERFERENCE

Analysis of shielded-room error for screened rooms and its application to low-frequency emission measurements from electrically small sources **SMT** p209
Cross-coupling between open-ended coaxial radiators **MAP** p265
Effect of cross-polar coupling on open area test site measurement correlation and repeatability **SMT** p202
Electromagnetic modelling and transient simulation of interconnects in high speed VLSI circuits **MAP** p373
Response of underground multiconductor cable systems to external fields illumination **SMT** p137

ELECTROMAGNETIC THEORY

Accuracy of an interferometer in noise **RSN** p217
Adaptive phase diversity for MDPSK reception **COM** p267
Analysis of shielded-room error for screened rooms and its application to low-frequency emission measurements from electrically small sources **SMT** p209
Analysis of surface-wave excitation and radiation mechanisms of a monopole on a circular grounded dielectric slab with critical thickness **MAP** p335
Analysis of TM scattering from open two-dimensional perfectly conducting shells using aggregated compactly-supported wavelet bases **MAP** p152
Application of adaptive absorbing boundary condition to finite element solution of three-dimensional scattering **MAP** p57
Application of parametric models to inverse scattering problems **MAP** p31
Attenuation due to hydrometeors at 94 GHz: experimental results and comparison with theory **MAP** p79
Cellular CDMA overlay systems **COM** p389
Comparison of computational electromagnetic codes applied to a sphere canonical problem **MAP** p309
Convergence of the fictitious-current model **MAP** p163
Cross-coupling between open-ended coaxial radiators **MAP** p265
Diffraction coefficient for a half-plane with anisotropic conductivity **SMT** p384
Effect of cross-polar coupling on open area test site measurement correlation and repeatability **SMT** p202
Effect of electronic-ballast fluorescent lighting on wireless infrared links **OPT** p347
Electric field integral equation for cylindrical structures **MAP** p147
Electromagnetic modelling and transient simulation of interconnects in high speed VLSI circuits **MAP** p373
European intercomparison of antenna factors in the frequency range 30 MHz to 1 GHz **SMT** p229
Experimental validation of Volterra series nonlinear modelling for microwave subcarrier optical systems **OPT** p209
Fabry-Perot approach to the design of double layer FSS **MAP** p157
Fractional lower-order statistics-based ambiguity functions for differential delay Doppler estimation **RSN** p358
General entire-domain method for analysis of dielectric scatterers **MAP** p498
GTD solution with higher order terms to the diffraction by an edge: towards a uniform solution **MAP** p43
Higher-dimension detection of targets from scanned radar **RSN** p313
Hybrid clutter-map/L-CFAR procedure for clutter rejection in nonhomogeneous environment **RSN** p239
Hybrid FE/MoM analysis of a cavity-backed slit loaded with anisotropic material **MAP** p422
Image reconstruction of a perfectly conducting cylinder by the genetic algorithm **MAP** p249
Improvements of dipole, helix, spiral, microstrip patch and aperture antennas with ground planes by using corrugated soft surfaces **MAP** p244
Improving the traceability of coaxial impedance measurements at lower RF in the UK **SMT** p241
Increasing the capacity of GSM cellular radio using adaptive antennas **COM** p304
Iterative interference cancellation for FFH/MFSK MA systems **COM** p380
Low measurement uncertainties in the frequency range 30 MHz to 1 GHz using a calculable standard dipole antenna and national reference ground plane **SMT** p221
Method for increasing the mode density in a reverberant screened room **SMT** p216
Monopulse estimation with subarray-adaptive arrays and arbitrary sum and difference beams **RSN** p232
Novel nine-port network analyser for measuring scattering coefficients of two-port devices **MAP** p137
Obstacle diffraction and site shielding under varying incident illumination **MAP** p87
Optimum time diversity for channels subject to pulse-burst interference **COM** p43
Reflection dyadic for the soft and hard surface with application to the depolarising corner reflector **MAP** p417
Response of underground multiconductor cable systems to external fields illumination **SMT** p137
Scattering from a dielectric cylinder axially loaded with periodic metallic rings **MAP** p233
Scattering from a dielectric cylinder with multiple eccentric cylindrical dielectric inclusions **MAP** p505
Scattering from elongated objects: direct solution in $O(N \log^2 N)$ operations **MAP** p277
Single-layer dipole array for linear-to-circular polarisation conversion of slotted waveguide array **MAP** p211
Time-harmonic two- and three-dimensional Green dyadics for a special class of gyrotropic bianisotropic media **MAP** p413
Two-dimensional analysis of bandwidth of open hard surface **MAP** p475
UHF intermodulation product prediction in digital systems using SPICE: the need for nonlinear macromodels **SMT** p313
Variational expression for propagation coefficient of an electromagnetic wave propagating along a closed rectangular chirowaveguide **MAP** p174
Volume-conformation method to study scattering by PEC objects with FDTD **MAP** p131
Wide-angle full vectorial beam propagation method **OPT** p139

ELECTROMAGNETISM

Analysis of interconnect networks with conducting wedge loaded by an inhomogeneous dielectric substrate **MAP** p217
Analysis of TM scattering from open two-dimensional perfectly conducting shells using aggregated compactly-supported wavelet bases **MAP** p152
Application of adaptive absorbing boundary condition to finite element solution of three-dimensional scattering **MAP** p57
Capacitance relations for a class of two-dimensional conductor configurations **SMT** p302
Characterisation of nonoriented electric alloys under nonconventional conditions **SMT** p35
Comparison of computational electromagnetic codes applied to a sphere canonical problem **MAP** p309
Computation of hysteresis motor performance including negative sequence excitation **EPA** p157
Convergence of the fictitious-current model **MAP** p163
Diffraction coefficient for a half-plane with anisotropic conductivity **SMT** p384
Dwight-Bewley paradox **SMT** p163
Electric field integral equation for cylindrical structures **MAP** p147
Electromagnetic field behaviour at edges in general bianisotropic media **MAP** p527
Finite difference solution of EM fields by asymptotic waveform techniques **MAP** p512
Frequency-shaping LQ control of Maglev suspension systems for optimal performance with deterministic and stochastic inputs **CTA** p25
General entire-domain method for analysis of dielectric scatterers **MAP** p498
GTD solution with higher order terms to the diffraction by an edge: towards a uniform solution **MAP** p43
Huygens' principle in electromagnetics **SMT** p103
Integral formulation for 3-D eddy current problems **SMT** p91
Maxwell equations for generalised Lagrangian functional **SMT** p99
Method of lines for analysis of crossing transmission lines with finite-thickness conductors **MAP** p254
Modelling and design of switched reluctance motors with two phases simultaneously excited **EPA** p361

Numerical and experimental evaluation of magnetic field generated by power busbar systems **GTD** p455
Paving: a new implementation of dual-bound resistance calculations **SMT** p15
Quasistatic analysis of microstrip lines on lossy inhomogeneous substrates **MAP** p379
Reflection dyadic for the soft and hard surface with application to the depolarising corner reflector **MAP** p417
Rigorous electromagnetic study of diffraction loss in VCSEL mirrors **OPT** p221
Scattering from a dielectric cylinder with multiple eccentric cylindrical dielectric inclusions **MAP** p505
Scattering from elongated objects: direct solution in O(N log^2 N) operations **MAP** p277
Scattering parameters of arbitrarily oriented slot-coupled microstrip lines **MAP** p141
Time domain method for the nonlinear steady-state analysis of electromagnetic fields **SMT** p377
Time-harmonic two- and three-dimensional Green dyadics for a special class of gyrotropic bianisotropic media **MAP** p413
Two-dimensional analysis of bandwidth of open hard surface **MAP** p475
Use of group theory in symmetrical 3-D eddy-current problems **SMT** p369
Use of transmission-line modelling in BEM for solution of piece-homogeneous static field problems **SMT** p157
Vector control of cage induction motors: a physical insight **EPA** p59
Volumé-conformation method to study scattering by PEC objects with FDTD **MAP** p131
Wide-angle full vectorial beam propagation method **OPT** p139

ELECTRON TUBES

Application of unique measuring techniques to positive impulse corona stabilisation in SF_6 **SMT** p182
Coaxial shunt intended for transient current measurement in a pseudospark switch **SMT** p119
Determination of formative time of electrical breakdown in nitrogen-filled tube **SMT** p413
Investigation of impulse spark trajectory in air between hemispherically-ended rod and plane electrode **SMT** p106
Investigation on the Deutsch assumption: experiment and theory **SMT** p334
Sparkover voltage of sphere gaps under standard lightning and switching impulse voltages **SMT** p187

ELECTRIC VARIABLES CONTROL

A new single-phase active power filter with reduced energy-storage capacity **EPA** p25
Application of the controllable series compensator in damping power system oscillations **GTD** p359
Artificial neural-network-based protection scheme for controllable series-compensated EHV transmission lines **GTD** p535
Capability of the static VAr compensator in damping power system oscillations **GTD** p353
Closed-loop power control in CDMA systems **COM** p231
Doubly fed induction generator using back-to-back PWM converters and its application to variable-speed wind-energy generation **EPA** p231
Dynamic characteristics and closed-loop performance of the series-parallel resonant converter **EPA** p345
Formula for the effect of a static VAr compensator on synchronising torque coefficient **GTD** p582
Genetic algorithm aided controller design with application to SVC **GTD** p258
Harmonic generation by HVDC schemes involving converters and static VAr compensators **GTD** p66
Hybrid position/force control of a hydraulic underwater manipulator **CTA** p145
Improved design for electric vehicle induction motors using an optimisation procedure **EPA** p410
Input filter stability of drives fed from voltage inverters controlled by direct flux and torque control methods **EPA** p396
Modified LCLC-type series resonant converter with improved performance **EPA** p354
New scheme of sliding-mode control for high performance induction motor drives **EPA** p177
Newton-Raphson algorithm for the reliable solution of large power networks with embedded FACTS devices **GTD** p447
Operation control of paralleled three-phase battery energy storage system **EPA** p317
Optimal and robust digital current controller synthesis for vector-controlled induction motor drive systems **EPA** p141
Practical evaluation of different modulation techniques for current-controlled voltage source inverters **EPA** p301
Robust nonlinear controller for power system transient stability enhancement with voltage regulation **GTD** p407
Self-tuning control applied to turbogenerator AVRs **GTD** p492
Series-parallel load-resonant converter for controlled-current arc welding power supply **EPA** p211
Simplified control method for the single-phase active power filter **EPA** p219
Synchronous generator damping enhancement through coordinated control of exciter and SVC **GTD** p211

ELECTRONIC CIRCUITS

Automatic visual inspection based upon a variant of the n-tuple technique **VIS** p301
Check! a generic and specific industrial inspection tool **VIS** p241
Hierarchical placement method based on a force-directed algorithm with simultaneous global routing for sea-of-gates **CDT** p1
Hybrid integration onto silicon motherboards with planar silica waveguides **OPT** p316

ENERGY CONVERSION

Design theory of thermoelectric modules for electrical power generation **SMT** p351
Operation control of paralleled three-phase battery energy storage system **EPA** p317

EPITAXIAL GROWTH

Fabrication and characterisation of a CdS-doped silica-on-silicon planar waveguide **OPT** p298
Fabrication and characteristics of tapered waveguide semiconductor Raman lasers **OPT** p113
Optical modulation with a resonant tunnelling diode **OPT** p12

ERRORS AND ERROR ANALYSIS

Block classification for an adaptive 1-D/2-D DCT video coding **VIS** p155
Estimated bit error probability of DS-SSMA/MDPSK with differential phase detector on satellite mobile channel **COM** p297
Low bit-rate video coding with spatio-temporal geometric transforms **VIS** p164
Reduced-state trellis and its decoding for full-response CPM **COM** p68

EXPERT SYSTEMS

Closed semiring connectionist network for the Bellman-Ford computation **CDT** p189
Combining design and operational knowledge to enhance generator plant diagnostics **GTD** p300
Design assistant approach to analogue layout generation **CDS** p213
Design of a distributed software architecture for an intelligent planning system **CTA** p125
Designing a reusable co-ordination module for cooperative industrial control applications **CTA** p91
Fuzzy neural network and fuzzy expert system for load forecasting **GTD** p106
Fuzzy reasoning for knowledge-based assessment of dynamic voltage security **GTD** p157
Interactive expert system for optimal design of electricity distribution systems **GTD** p151
Lateral inhibition net and weighted matching algorithms for speech recognition in noise **VIS** p324
Online rescheduling of mass rapid transit systems: fuzzy expert system approach **EPA** p307
Rule-based approach to load transfer to alternate supplies based on the phase of the residual voltage on the disconnected busbar **GTD** p467
Visiplan: a knowledge-based modelling tool **CTA** p73

FEEDBACK

Application of nonlinear control to switched reluctance motors: a feedback linearisation approach **EPA** p371
Counter-example to a recent result on stabilisation of feedback control systems with infinite delays [and author's reply] **CTA** p110
Delays versus performance of visually guided systems **CTA** p436
Design of nonlinear robust excitation control for multimachine power systems **GTD** p253
Dynamic performance limitations for MRAS based sensorless induction motor drives. 2. Online parameter tuning and dynamic performance studies **EPA** p123
Frequency domain design methodology for uncertain cascaded multiple-loop systems with plant modification **CTA** p409
Iterative learning control for discrete-time systems with exponential rate of convergence **CTA** p217
Neuro-adaptive hybrid controller for robot-manipulator tracking control **CTA** p270
Noncoherent detection with Viterbi decoding for GMSK signals **COM** p373
Optimal and robust digital current controller synthesis for vector-controlled induction motor drive systems **EPA** p141
Optimal entire eigenstructure assignment of discrete-time linear systems **CTA** p301
Parametric uncertainty bounds for performance robustness of linear systems with output feedback **CTA** p509
Robust indirect adaptive control of the electrohydraulic velocity control systems **CTA** p448
Synchronous generator damping enhancement through coordinated control of exciter and SVC **GTD** p211
Two-degree-of-freedom design method of LQI servo systems: use of frequency-dependent weighting matrices for sensitivity reduction **CTA** p557

FIBRE LASERS

Arrayed-waveguide grating lasers and their applications to tuning-free wavelength routing **OPT** p322
Review of interferometric optical fibre hydrophone technology **RSN** p204

FIBRE OPTICS

Analysis of optical phase conjugation using four-wave mixing in a dispersion-shifted fibre **OPT** p195
Analysis of the decrease in attenuation achieved by properly bending plastic optical fibres **OPT** p135
Approximate solution to the envelope of a pulse propagating in a nonlinear optical fibre **OPT** p200
D-fibre antenna for microcellular mobile communication systems **OPT** p370
Online compensation and calibration of a chromatically addressed, photoelastic strain sensor with optical fibre transmission **SMT** p166
Review of interferometric optical fibre hydrophone technology **RSN** p204
Upgrading the embedded standard-fibre network by optical-phase conjugation **OPT** p205

FILTERS AND FILTERING

A new single-phase active power filter with reduced energy-storage capacity **EPA** p25
Analogue realisation of integrated FIR filters **CDS** p274
CMOS differential difference current conveyors and their applications **CDS** p91
Complex gyrator circuit of a junction circulator using weakly magnetised planar irregular hexagonal resonator **MAP** p532
Correction of the parameters of the equivalent circuit proposed by Montgomery for a two-terminal-pair junction **MAP** p542
Current-mode ladder filters using multiple output current conveyors **CDS** p218
Design method for impedance matching networks **CDS** p186
Design of linear phase Nyquist filters **CDS** p139
Dual topological theorems of linear active networks **CDS** p225
Exact determination of the natural modes of some Cauer filters by means of a standard analytical procedure **CDS** p134
Factored state-space stray-insensitive switched-capacitor filters **CDS** p325
Hierarchical frequency-domain robust component failure detection scheme for large-scale analogue circuits with component tolerances **CDS** p53
Precise insensitive current-mode third-order lowpass Butterworth characteristics **CDS** p223
Simplified control method for the single-phase active power filter **EPA** p219

Synthesis and performance analysis of universal minimum component integrator-based IFLF OTA-grounded capacitor filter **CDS** p107
Synthesis of canonic single-resistance-controlled-oscillators using a single current-feedback-amplifier **CDS** p71
Whispering gallery dielectric resonator mode GaAs FET oscillator **MAP** p441
Wideband active microwave isolators using GaAs MMIC technology **MAP** p179

FORMAL LOGIC

Alternative algorithm for optimisation of Reed-Muller universal logic module networks **CDT** p385
Cellular automata based scheme for solution of Boolean equations **CDT** p174
Exact minimisation of Kronecker expressions for symmetric functions **CDT** p349
Fuzzy neural networks and application to the FBC process **CTA** p259
GRMIN2: a heuristic simplification algorithm for generalised Reed-Muller expressions **CDT** p376
Real-time synchronisation of multiaxis high-speed machines, from SFC specification to Petri net verification **CTA** p164
Symbolic method for simplifying AND-EXOR representations of Boolean functions using a binary-decision technique and a genetic algorithm **CDT** p151
Tabular techniques for generating Kronecker expansions **CDT** p205
Three-valucd quasi-linear transformation for logic synthesis **CDT** p391
Tradeoff literals against support for logic synthesis of LUT-based FPGAs **CDT** p111
Using symbolic Rademacher-Walsh spectral transforms to evaluate the agreement between Boolean functions **CDT** p64

FUZZY CONTROL

Application of fuzzy logic stabilisers in a multimachine power system environment **GTD** p263
Design and analysis of neural/fuzzy variable structural PID control systems **CTA** p200
Economy/regularity fuzzy-logic control of DC railway systems using event-driven approach **EPA** p9
Fuzzy neural networks and application to the FBC process **CTA** p259
Intelligent control of large power transformer cooling pumps **GTD** p474
Learning systems in intelligent control: an appraisal of fuzzy, neural and genetic algorithm control applications **CTA** p367
Online rescheduling of mass rapid transit systems: fuzzy expert system approach **EPA** p307
User-friendly design method for fuzzy logic controller **CTA** p358

GENERATORS

Analysis of single-step damping in a multistack variable reluctance stepping motor **EPA** p95
Characterisation of nonoriented electric alloys under nonconventional conditions **SMT** p35
Comparison between space vector modulation and subharmonic methods for current harmonics of DSP-based permanent-magnet AC servo motor drive system **EPA** p151
Determining the number of interpole turns needed for the perfect commutation of a DC machine **EPA** p135
Direct coupled, permanent magnet generators for wind turbine applications **EPA** p1
Fault-tolerant permanent magnet machine drives **EPA** p437
Input filter stability of drives fed from voltage inverters controlled by direct flux and torque control methods **EPA** p396
Investigation into optimising high switching frequency regular sampled PWM control for drives and static power converters **EPA** p281
Loss-of-mains detection for small generators **EPA** p225
Performance and design optimisation of electric motors with heteropolar surface magnets and homopolar windings **EPA** p429
Self-tuning control applied to turbogenerator AVRs **GTD** p492
Slotless-armature DC drives for surface warship propulsion **EPA** p443
Stochastic evaluation of turbine-generator shaft torsional torques during faulty synchronisation **GTD** p487
Towards a new partial discharge calibration strategy based on the transfer function of machine stator windings **SMT** p57

HISTORY

Factors affecting the development of the radio proximity fuse 1940-1944 **SMT** p1

HOLOGRAPHY

Holograms for optical wireless LANs **OPT** p365

INDUCTION MOTORS

A doubly fed induction generator using back-to-back PWM converters supplying an isolated load from a variable speed wind turbine **EPA** p380
Broken rotor bars: their effect on the transient performance of induction machines **EPA** p449
Calculation and measurement of unbalanced magnetic pull in cage induction motors with eccentric rotors. I. Analytical model **EPA** p193
Current sensorless field-oriented control of induction motors **EPA** p492
Discrete integral variable structure model following control for induction motor drivers **EPA** p467
Doubly fed induction generator using back-to-back PWM converters and its application to variable-speed wind-energy generation **EPA** p231
Dynamic performance limitations for MRAS based sensorless induction motor drives. I. Stability analysis for the closed loop drive **EPA** p113
Estimation of rotor resistance in induction motors **EPA** p87
Experimental study of the vibrational behaviour of machine stators **EPA** p242
H_2 robust digital vector control for the induction machine **CTA** p237
Improved design for electric vehicle induction motors using an optimisation procedure **EPA** p410
New inverter-driven design and control method for two-phase induction motor drives **EPA** p458
New scheme of sliding-mode control for high performance induction motor drives **EPA** p177
Novel approach to the measurement of iron and stray load losses in induction motors **EPA** p78
Optimal and robust digital current controller synthesis for vector-controlled induction motor drive systems **EPA** p141
Performance of FFT-rotor slot harmonic speed detector for sensorless induction motor drives **EPA** p258
Predicting performance of three-phase induction motors connected to single-phase supplies **EPA** p339
Relationship between rated torque and size of permanent magnet machines **EPA** p417
Representation of rotor spiders and axial ventilation ducts in reduced finite-element models for cage rotors **EPA** p423
Robust speed-controlled induction-motor drive using EKF and RLS estimators **EPA** p186
Simple model for post-fault motor behaviour for reliability/power quality assessment of industrial power systems **GTD** p56
Space vector representation of advanced motor models for vector controlled induction motors **EPA** p69
Transient and steady-state load performance of a stand-alone self-excited induction generator **EPA** p50
Use of naturally occurring system disturbances to estimate the fault current contribution of induction motors **GTD** p243
Vector control of cage induction motors: a physical insight **EPA** p59

INFORMATION THEORY

Ambiguity function and Cramer-Rao bound in the multisignal case **RSN** p227
Convergence and steady-state properties of the least-mean mixed-norm (LMMN) adaptive algorithm **VIS** p137
Database of best T-codes **CDT** p213
Design of nonseparable 3-D filter banks/wavelet bases using transformations of variables **VIS** p51
Detection of the number of signals in noise with banded covariance matrices **RSN** p289
Efficient classification and codebook design for CVQ **VIS** p344
Fast algorithm for pseudodiscrete Wigner-Ville distribution using moving discrete Hartley transform **VIS** p383
Fault-tolerant QRD recursive least squares **CDT** p137
Fractional lower-order statistics-based ambiguity functions for differential delay Doppler estimation **RSN** p358
Identification of MA processes using cumulants: several sets of linear equations **VIS** p87
Image coding by multistep, adaptive flux interpolation **VIS** p337
Manifold of a planar array and its effects on the accuracy of direction-finding systems **RSN** p349
Noise analysis of time-averaging interpolation in D/A conversion **CDS** p143
Optimal filtering and robust fault diagnosis of stochastic systems with unknown disturbances **CTA** p31
Performance of neural data associator **RSN** p71
Two-dimensional spatial-spectrum estimation of coherent signals without spatial smoothing and eigendecomposition **RSN** p295
Unitary Hessenberg and state-space model based methods for the harmonic retrieval problem **RSN** p346
Utilisation of the MV spectrum for diagnosis and estimation of harmonic fields **VIS** p273
Variable statistical wordlength in digital filters **VIS** p62
Walsh-like functions and their relations **VIS** p279

INSTRUMENTATION AND MEASUREMENT

Check! a generic and specific industrial inspection tool **VIS** p241
Coercivity measurements on high permeability nickel-iron alloys using a modified NPL vibrating coil magnetometer **SMT** p171
D-fibre antenna for microcellular mobile communication systems **OPT** p370
Distributed sequential nearest neighbour multitarget tracking algorithm **RSN** p255
Multicriterion Compton backscatter imaging **SMT** p357
Novel nine-port network analyser for measuring scattering coefficients of two-port devices **MAP** p137
Online compensation and calibration of a chromatically addressed, photoelastic strain sensor with optical fibre transmission **SMT** p166
Optimal harmonic sensor placement in fundamental network topologies **GTD** p608
Review of interferometric optical fibre hydrophone technology **RSN** p204
Ultrasonic pulse-phase method applied in fluid flow measurements **SMT** p327
Weld bead placement system for multipass welding [using transputer-based laser triangulation vision system] **SMT** p85

INSULATED GATE FIELD EFFECT TRANSISTORS

6H silicon carbide MOSFET modelling for high temperature analogue integrated circuits (25-500°C) **CDS** p115
Accelerated quasi-DC method and circuit for measuring the gate-drain coupling capacitance for devices within a CMOS process technology **CDS** p302
IGBT based zero voltage transition full bridge PWM converter for high power applications **EPA** p475
Modelling of the quasisaturation behaviour in the high-voltage MOSFET with vertical trench gate **CDS** p28
Semi-empirical model of electron mobility in MOSFETS in strong inversion regime **CDS** p202

INSULATORS AND INSULATION

Application of ultrasound to the inspection of insulation **SMT** p177
Determination of safe working 50 Hz AC electrical stresses for ceramics at high temperatures **SMT** p406
Effect of an antioxidant additive on morphology and space-charge characteristics of low-density polyethylene **SMT** p26
Effect of PTFE dielectric properties on high voltage reactor load switching **SMT** p195
Influence of fatigue on some electrical ageing mechanisms of polymers **SMT** p395
Mechanical interaction of electrical trees and barriers in insulating resins **SMT** p265
Nonstationary behaviour of partial discharges in a generator stator conductor due to voltage conditioning effects **SMT** p285
SF_6 breakdown in GIS **SMT** p270
Towards a new partial discharge calibration strategy based on the transfer function of machine stator windings **SMT** p57

INTEGRATED CIRCUITS

1.1 V full-swing double bootstrapped BiCMOS logic gates **CDS** p41
6H silicon carbide MOSFET modelling for high temperature analogue integrated circuits (25-500°C) **CDS** p115
Analogue fault simulation in standard VHDL **CDS** p380
Area efficient systolic interconnection networks **CDT** p232
Automatic test generation algorithms for analogue circuits **CDS** p366
Backpropagation without multiplier for multilayer neural networks **CDS** p229
Cost/benefit analysis of the P1149.4 mixed-signal test bus **CDS** p393
Design assistant approach to analogue layout generation **CDS** p213
Design-for-test (DfT) study on a current mode DAC **CDS** p374
Electromagnetic modelling and transient simulation of interconnects in high speed VLSI circuits **MAP** p373
Fabrication and microwave characterisation of multilayer circuits for MMIC applications **MAP** p225
Fully passivated W-band InAlAs/InGaAs/InP monolithic low noise amplifiers **MAP** p361
Generic DFT approach for pattern sensitive faults in word-oriented memories **CDT** p199
LIMSoft: automated tool for sensitivity analysis and test vector generation **CDS** p386
Mask-programmable multiple-valued logic gate using resonant tunnelling diodes **CDS** p289
Mixed signal test–techniques, applications and demands **CDS** p358
Note on optimal tile partition for space region of integrated-circuit geometry **CDT** p246
Novel low-voltage BiCMOS digital circuits employing a lateral p-n-p BJT in a p-MOS structure **CDS** p83
Optical modulation with a resonant tunnelling diode **OPT** p12
Parallel event-driven logic simulation algorithms: tutorial and comparative evaluation **CDS** p177
Parallel event-driven MOS timing simulator on distributed memory multiprocessors **CDS** p207
Reliability levels for fault-tolerant linear processing using real number error correction **CDT** p355
Screening of variables for the empirical modelling of semiconductor devices **SMT** p319
Sensitivity evaluation of optical wireless PPM systems utilising PIN-BJT receivers **OPT** p355
Supply current test of analogue and mixed signal circuits **CDS** p399
Vertical integration of an InGaAs/InP HBT and a 1.55 μm strained MQW p-substrate laser **OPT** p107
Wideband active microwave isolators using GaAs MMIC technology **MAP** p179

INTEGRATED OPTICS

Acousto-optic Bragg diffraction in SiGe/Si planar waveguides **OPT** p303
Analysis of dynamics of monolithic passively mode-locked laser diodes under external periodic excitation **OPT** p81
Channel waveguides formed in fused silica and silica-on-silicon by Si, P and Ge ion implantation **OPT** p281
Co-doping effects in rare-earth-doped planar waveguides **OPT** p293
Development of a library of low-loss silicon-on-insulator optoelectronic devices **OPT** p312
Fabrication and characterisation of a CdS-doped silica-on-silicon planar waveguide **OPT** p298
Fabrication of high-performance extended-cavity double-quantum-well lasers with integrated passive sections **OPT** p94
Genesis of silicon-based guided-wave optics **OPT** p255
Guided-wave optics in silicon-on-insulator technology **OPT** p307
Hybrid integration onto silicon motherboards with planar silica waveguides **OPT** p316
Realisation of Butterworth-type optical filters using 3×3 coupler ring resonators **OPT** p126
Recent progress in silica-based planar lightwave circuits on silicon **OPT** p257
Silica-based optical integrated circuits **OPT** p263
Silica-based sol-gel optical waveguides on silicon **OPT** p287
Vertical integration of an InGaAs/InP HBT and a 1.55 μm strained MQW p-substrate laser **OPT** p107

INTEGRATED OPTOELECTRONICS

Hybrid integration onto silicon motherboards with planar silica waveguides **OPT** p316
Optical modulation with a resonant tunnelling diode **OPT** p12
Optical switching with gain in waveguide-modulator structures **OPT** p101
Performance of an optical backplane bus for switch interconnection **OPT** p237
Recent progress in silica-based planar lightwave circuits on silicon **OPT** p257
Sensitivity evaluation of optical wireless PPM systems utilising PIN-BJT receivers **OPT** p355
Silica-based optical integrated circuits **OPT** p263
Silicon-based fabrication process for production of optical waveguides **OPT** p37
Vertical integration of an InGaAs/InP HBT and a 1.55 μm strained MQW p-substrate laser **OPT** p107

INTERFERENCE SUPPRESSION

Accuracy of an interferometer in noise **RSN** p217
Adaptive phase diversity for MDPSK reception **COM** p267
Analysis of shielded-room error for screened rooms and its application to low-frequency emission measurements from electrically small sources **SMT** p209
Cellular CDMA overlay systems **COM** p389
Cross-coupling between open-ended coaxial radiators **MAP** p265
Effect of cross-polar coupling on open area test site measurement correlation and repeatability **SMT** p202
Effect of electronic-ballast fluorescent lighting on wireless infrared links **OPT** p347
Electromagnetic modelling and transient simulation of interconnects in high speed VLSI circuits **MAP** p373
European intercomparison of antenna factors in the frequency range 30 MHz to 1 GHz **SMT** p229
Experimental validation of Volterra series nonlinear modelling for microwave subcarrier optical systems **OPT** p209
Fractional lower-order statistics-based ambiguity functions for differential delay Doppler estimation **RSN** p358
Higher-dimension detection of targets from scanned radar **RSN** p313
Hybrid clutter-map/L-CFAR procedure for clutter rejection in nonhomogeneous environment **RSN** p239
Increasing the capacity of GSM cellular radio using adaptive antennas **COM** p304
Iterative interference cancellation for FFH/MFSK MA systems **COM** p380
Low measurement uncertainties in the frequency range 30 MHz to 1 GHz using a calculable standard dipole antenna and national reference ground plane **SMT** p221
Method for increasing the mode density in a reverberant screened room **SMT** p216
Monopulse estimation with subarray-adaptive arrays and arbitrary sum and difference beams **RSN** p232
Obstacle diffraction and site shielding under varying incident illumination **MAP** p87
Optimum time diversity for channels subject to pulse-burst interference **COM** p43
Response of underground multiconductor cable systems to external fields illumination **SMT** p137
UHF intermodulation product prediction in digital systems using SPICE: the need for nonlinear macromodels **SMT** p313

ISDN

Performance and statistical analysis of two-layer MPEG coding algorithms for ATM networks **COM** p155
Performance, interarrival, and correlation analysis of four-phase MMPP model in ATM-based B-ISDN **COM** p363
Preventive flow control method for packet video **COM** p98

LASER MODES

Analysis of dynamics of monolithic passively mode-locked laser diodes under external periodic excitation **OPT** p81
Arrayed-waveguide grating lasers and their applications to tuning-free wavelength routing **OPT** p322
Estimation of maximal modulation bandwidth and group velocity dispersion in strained InGaAs quantum-well lasers **OPT** p57
High number of wavelength channels demonstrated by a widely tunable sampled-grating DBR laser **OPT** p77
Improved resonance and chirp mechanisms for multigigabit/s push-pull modulated DFB lasers **OPT** p49
Three-section sampled-grating DBR lasers: modelling and measurements **OPT** p24
THz frequency conversion in injection locked semiconductor laser oscillators **OPT** p41
Unmodulated external-cavity diode laser stabilised on caesium D_2 line **SMT** p263

LASERS

8-band k.p theory of the material gain of strained tetrahedral semiconductors: application to 1.3 μm-InGaAsP lasers subject to additional external uniaxial stress **OPT** p62
Antireflection-coated angled facet design **OPT** p214
Arrayed-waveguide grating lasers and their applications to tuning-free wavelength routing **OPT** p322
Co-doping effects in rare-earth-doped planar waveguides **OPT** p293
Estimation of in-plane superluminescence in vertical-cavity surface-emitting lasers **OPT** p67
Estimation of maximal modulation bandwidth and group velocity dispersion in strained InGaAs quantum-well lasers **OPT** p57
Fabrication and characteristics of tapered waveguide semiconductor Raman lasers **OPT** p113
Fabrication of high-performance extended-cavity double-quantum-well lasers with integrated passive sections **OPT** p94
High number of wavelength channels demonstrated by a widely tunable sampled-grating DBR laser **OPT** p77
Influence of transverse modes on the dynamic response of vertical cavity surface emitting lasers **OPT** p189
Longitudinal mode control in 1.3 μm Fabry-Perot lasers by mode suppression **OPT** p71
Modelling spatio-temporal dynamics of gain-guided multistripe and broad-area lasers **OPT** p17
Rigorous electromagnetic study of diffraction loss in VCSEL mirrors **OPT** p221
Silica-based sol-gel optical waveguides on silicon **OPT** p287
Three-section sampled-grating DBR lasers: modelling and measurements **OPT** p24
THz frequency conversion in injection locked semiconductor laser oscillators **OPT** p41
Unmodulated external-cavity diode laser stabilised on caesium D_2 line **SMT** p263
VCSEL-polarisation control with polarised feedback **OPT** p104
Weld bead placement system for multipass welding [using transputer-based laser triangulation vision system] **SMT** p85

LIGHT PROPAGATION

1 Gbit/s optical free space link operating over 40 m system and applications **OPT** p330

LINEAR NETWORK ANALYSIS

Analysis of a pair of dielectric coated cylinders above a dielectric substrate **MAP** p67
Concurrent programming and simulation of decoupled power electronic circuits **SMT** p131
Dual topological theorems of linear active networks **CDS** p225
Improved TLM link model for reactive circuit components **SMT** p341
TLM diakoptics for coupled-mode analysis of GaAs MESFET distributed amplifier **MAP** p261
Use of transmission-line modelling in BEM for solution of piece-homogeneous static field problems **SMT** p157

LOGIC AND SWITCHING CIRCUITS

1.1 V full-swing double bootstrapped BiCMOS logic gates **CDS** p41
Area efficient systolic interconnection networks **CDT** p232
Asynchronous FPGA architectures **CDT** p282
BDD-based spectral approach for Reed-Muller circuit realisation **CDT** p145
Cellular automata based scheme for solution of Boolean equations **CDT** p174
CMOS differential difference current conveyors and their applications **CDS** p91
Design and evaluation of a multiple-valued arithmetic integrated circuit based on differential logic **CDS** p331

Design and implementation of a GaAs systolic floating-point processing element **CDT** p325
Design of a low-latency asynchronous adder using speculative completion **CDT** p301
Estimating power consumption of CMOS circuits modelled as symbolic neural networks **CDT** p331
Fault analysis and automatic test pattern generation for break faults in programmable logic arrays **CDS** p157
Graph-theoretic algorithm for finding maximal supergates in combinational logic circuits **CDS** p313
Hardware implementation of the Lehmer random number generator **CDT** p93
High-performance two-phase micropipeline building blocks: double edge-triggered latches and burst-mode select and toggle circuits **CDS** p282
Issues in the design of a logic simulator: element modelling for efficiency **CDS** p21
KGPMAP: library-based technology-mapping technique for antifuse based FPGAs **CDT** p203
Layout-driven chaining of scan flip-flops **CDT** p421
Mask-programmable multiple-valued logic gate using resonant tunnelling diodes **CDS** p289
Nonstuck behaviour of open circuit supply faults in CMOS logic circuits **CDS** p9
Novel low-voltage BiCMOS digital circuits employing a lateral p-n-p BJT in a p-MOS structure **CDS** p83
Parallel event-driven logic simulation algorithms: tutorial and comparative evaluation **CDS** p177
Removing CSC violations in asynchronous circuits by delay padding **CDT** p413
Superscalar instruction issue in an asynchronous microprocessor **CDT** p266
Symbolic method for simplifying AND-EXOR representations of Boolean functions using a binary-decision technique and a genetic algorithm **CDT** p151
Systolic digit-serial multiplier **CDS** p14
Testable on-the-fly carry-save multiplier by alternating input data **CDT** p345
Tradeoff literals against support for logic synthesis of LUT-based FPGAs **CDT** p111
Verification of speed-independent data-path circuits **CDT** p295

LOGIC DESIGN

1.1 V full-swing double bootstrapped BiCMOS logic gates **CDS** p41
Alternative algorithm for optimisation of Reed-Muller universal logic module networks **CDT** p385
Application of Z in digital hardware design **CDT** p79
Asynchronous FPGA architectures **CDT** p282
BDD-based spectral approach for Reed-Muller circuit realisation **CDT** p145
Cellular automata based scheme for solution of Boolean equations **CDT** p174
Design of a low-latency asynchronous adder using speculative completion **CDT** p301
Exact minimisation of Kronecker expressions for symmetric functions **CDT** p349
Fault analysis and automatic test pattern generation for break faults in programmable logic arrays **CDS** p157
Generic DFT approach for pattern sensitive faults in word-oriented memories **CDT** p199
Graph-theoretic algorithm for finding maximal supergates in combinational logic circuits **CDS** p313
High-performance two-phase micropipeline building blocks: double edge-triggered latches and burst-mode select and toggle circuits **CDS** p282
Issues in the design of a logic simulator: element modelling for efficiency **CDS** p21
KGPMAP: library-based technology-mapping technique for antifuse based FPGAs **CDT** p203
Layout-driven chaining of scan flip-flops **CDT** p421
Less expensive test pattern generation technique **CDT** p17
Linear-testable and C-testable N_1N_2 modified Booth multipliers **CDT** p44
Mask-programmable multiple-valued logic gate using resonant tunnelling diodes **CDS** p289
Parallel event-driven logic simulation algorithms: tutorial and comparative evaluation **CDS** p177
Removing CSC violations in asynchronous circuits by delay padding **CDT** p413
Symbolic method for simplifying AND-EXOR representations of Boolean functions using a binary-decision technique and a genetic algorithm **CDT** p151
Three-valued quasi-linear transformation for logic synthesis **CDT** p391
Tradeoff literals against support for logic synthesis of LUT-based FPGAs **CDT** p111
Verification of speed-independent data-path circuits **CDT** p295

MAGNETIC MATERIALS AND DEVICES

Analysis of multilayer inset dielectric guides containing magnetised ferrites **MAP** p390
Characterisation of electric alloys for electric drives **SMT** p173
Characterisation of nonoriented electric alloys under nonconventional conditions **SMT** p35
Coercivity measurements on high permeability nickel-iron alloys using a modified NPL vibrating coil magnetometer **SMT** p171
Digitally controlled transducerless magnetic suspension system **SMT** p47
Direct coupled, permanent magnet generators for wind turbine applications **EPA** p1
HVDC converter transformer core saturation instability: a frequency domain analysis **GTD** p75
Improved approximation for effective permeability in microwave ferrites **MAP** p444
Performance and design optimisation of electric motors with heteropolar surface magnets and homopolar windings **EPA** p429
Representation of hysteresis in three-phase transformer models for electromagnetic transients **EPA** p331
Synthesis of quarter-wave coupled junction circulators using moderately magnetised disc resonators with commensurate eigennetworks **MAP** p238

MASS SPECTROMETRY

Simulation of ion trajectories through the mass filter of a quadrupole mass spectrometer **SMT** p71

MATERIALS AND MATERIALS TESTING

Application of ultrasound to the inspection of insulation **SMT** p177
Characterisation of electric alloys for electric drives **SMT** p173
Effect of an antioxidant additive on morphology and space-charge characteristics of low-density polyethylene **SMT** p26

MATHEMATICAL TECHNIQUES

Adaptive scheduling algorithm based on mixed graph model **CTA** p9
Adaptive step edge model for self-consistent training of neural network for probabilistic edge labelling **VIS** p41
All-fault-tolerant embedding of a complete binary tree in a group of Cayley graphs **CDT** p156
Ambiguity function and Cramer-Rao bound in the multisignal case **RSN** p227
Amplifier linearisation through the use of special negative linear feedback **CDS** p61
Analysis of linear discrete SISO control systems via a set of delta functions **CTA** p514
Analysis of stabilised output error methods **CTA** p209
Analysis of TM scattering from open two-dimensional perfectly conducting shells using aggregated compactly-supported wavelet bases **MAP** p152
Anytime heuristic schedule repair in manufacturing industry **CTA** p114
Application of adaptive absorbing boundary condition to finite element solution of three-dimensional scattering **MAP** p57
Application of Gabor transform technique to supervise power system transient harmonics **GTD** p461
Application of Kharitonov's theorem to robustly increase the degree of Hurwitz polynomials **CTA** p57
Bayesian channel equalisation and robust features for speech recognition **VIS** p223
Bound for Minkowski metric or quadratic metric applied to VQ codeword search **VIS** p67
Capacitance relations for a class of two-dimensional conductor configurations **SMT** p302
Characteristics of equivalent circuits of synchronous machines **EPA** p31
Closed semiring connectionist network for the Bellman-Ford computation **CDT** p189
Colour image detection and matching using modified generalised Hough transform **VIS** p201
Combined active and reactive dispatch with multiple objectives using an analytic hierarchical process **GTD** p344
Compound matrix partitioning and modification for the solution of branched autotransformer traction feeds **EPA** p251
Compressed video processing for cut detection **VIS** p315
Connection optimisation for two types of videoconference **COM** p133
Constrained multiobjective global optimisation of longitudinal interconnected power system by genetic algorithm **GTD** p435
Convergence analysis of binary relation inference networks **CTA** p319
Convergence of the fictitious-current model **MAP** p163
Decentralised control design of uncertain nominally linear symmetric composite systems **CTA** p530
Design theory of thermoelectric modules for electrical power generation **SMT** p351
Detection and tracking of returns in sector-scan sonar image sequences **RSN** p157
Determination of formative time of electrical breakdown in nitrogen-filled tube **SMT** p413
Diffraction coefficient for a half-plane with anisotropic conductivity **SMT** p384
Discrete-time analysis of the leaky bucket scheme with threshold-based token generation intervals **COM** p105
Distribution fast decoupled state estimation by measurement pairing **GTD** p43
Dual space optimisation method for extracting the natural frequencies of a radar target **RSN** p286
Economic dispatch of generators with prohibited operating zones: a genetic algorithm approach **GTD** p529
Efficient algorithm to optimise the energy generation by pumped storage units in probabilistic production costing **GTD** p546
Efficient load flow method for distribution systems with radial or mesh configuration **GTD** p33
Efficient technique for circle detection using hypothesis filtering and Hough transform **VIS** p292
Electric field integral equation for cylindrical structures **MAP** p147
Electromagnetic field behaviour at edges in general bianisotropic media **MAP** p527
Evaluation of multiple target track initiation techniques in real radar tracking environments **RSN** p246
Evolutionary programming approach to reactive power planning **GTD** p365
Exact minimisation of Kronecker expressions for symmetric functions **CDT** p349
Experimental optimisation of flexible measurement systems **SMT** p77
Factored state-space stray-insensitive switched-capacitor filters **CDS** p325
Fast adaptive polynomial I and Q predistorter with global optimisation **COM** p78
Fast algorithm for pseudodiscrete Wigner-Ville distribution using moving discrete Hartley transform **VIS** p383
Finite difference solution of EM fields by asymptotic waveform techniques **MAP** p512
Fractional lower-order statistics-based ambiguity functions for differential delay Doppler estimation **RSN** p358
Free space dyadic Green's function applied to the full-wave numerical analysis of planar transmission lines and dielectric waveguides **MAP** p328
Frequency conversion in travelling wave semiconductor laser amplifiers with bulk and quantum well structures **OPT** p119
Frequency-shaping LQ control of Maglev suspension systems for optimal performance with deterministic and stochastic inputs **CTA** p25
Fuzzy reasoning for knowledge-based assessment of dynamic voltage security **GTD** p157
General entire-domain method for analysis of dielectric scatterers **MAP** p498
Genetic algorithm aided controller design with application to SVC **GTD** p258
Genetic algorithm for variable ordering of OBDDs **CDT** p364
Graph-theoretic algorithm for finding maximal supergates in combinational logic circuits **CDS** p313
Graph-theory-based protocol to provide centralised management of an extended LAN topology **COM** p182
H_2 robust digital vector control for the induction machine **CTA** p237
Harmonic generation by HVDC schemes involving converters and static VAr compensators **GTD** p66
Heuristics-guided evolutionary approach to multiobjective generation scheduling **GTD** p553
HVDC converter transformer core saturation instability: a frequency domain analysis **GTD** p75
Hybrid method of determining the transient stability margin of a power system **GTD** p27
Identification of discrete Volterra series using maximum length sequences **CDS** p241
Identification of linear systems in the presence of piecewise polynomial disturbances **CTA** p305
Identification of MA processes using cumulants: several sets of linear equations **VIS** p87
Image reconstruction of a perfectly conducting cylinder by the genetic algorithm **MAP** p249
Improved design for electric vehicle induction motors using an optimisation procedure **EPA** p410

Integral formulation for 3-D eddy current problems **SMT** p91
Iterative learning control for discrete-time systems with exponential rate of convergence **CTA** p217
Joint motion/disparity MAP estimation for stereo image sequences **VIS** p101
Lateral inhibition net and weighted matching algorithms for speech recognition in noise **VIS** p324
Learning systems in intelligent control: an appraisal of fuzzy, neural and genetic algorithm control applications **CTA** p367
Line monitoring and fault location using spread spectrum on power line carrier **GTD** p427
Loop transfer recovery for systems under sampled measurements **CTA** p333
Loss-constrained economic power dispatch **GTD** p387
Method for increasing the mode density in a reverberant screened room **SMT** p216
Minimax design of recursive digital filters with a lattice denominator **VIS** p377
Model predictive control algorithms for systems with slow sampled outputs **CTA** p551
Model reduction with time delay combining the least-squares method with the genetic algorithm **CTA** p247
Modelling partial discharge excitation of UHF signals in waveguide structures using Green's functions **SMT** p63
Modified Harn signature scheme based on factorising and discrete logarithms **CDT** p196
Morphological operations on crack coded binary images **VIS** p171
Multicriterion Compton backscatter imaging **SMT** p357
Neural network architectures for parameter estimation of dynamical systems **CTA** p387
New method of power swing blocking for digital distance protection **GTD** p19
New program model for program partitioning on NUMA multiprocessor systems **CDT** p431
Newton solution for the steady-state interaction of AC/DC systems **GTD** p200
Noise analysis of time-averaging interpolation in D/A conversion **CDS** p143
Nonlinear autoregressive integrated neural network model for short-term load forecasting **GTD** p500
Novel method of finding the first swing stability margin of a power system from time domain simulation **GTD** p413
Numerical and experimental evaluation of magnetic field generated by power busbar systems **GTD** p455
Online Chinese character recognition using attributed relational graph matching **VIS** p125
Optimal and robust digital current controller synthesis for vector-controlled induction motor drive systems **EPA** p141
Optimal entire eigenstructure assignment of discrete-time linear systems **CTA** p301
Optimal harmonic sensor placement in fundamental network topologies **GTD** p608
Optimal quantisation strategy for DCT image compression **VIS** p10
Optimised design of Jaumann radar absorbing materials using a genetic algorithm **RSN** p23
Optimum edge detection in SAR **RSN** p31
Optimum partitioning of rectilinear layouts **CDT** p440
Parametric uncertainty bounds for performance robustness of linear systems with output feedback **CTA** p509
Performance and design optimisation of electric motors with heteropolar surface magnets and homopolar windings **EPA** p429
Performance and statistical analysis of two-layer MPEG coding algorithms for ATM networks **COM** p155
Phase-decoupled load flow method for radial and weakly-meshed distribution networks **GTD** p39
Polarisation-independent optical filters based on co-directional phase-shifted grating-assisted couplers: theory and designs **OPT** p173
Predicting performance of three-phase induction motors connected to single-phase supplies **EPA** p339
Quadratic guaranteed cost control with robust pole placement in a disk **CTA** p37
Real-time synchronisation of multiaxis high-speed machines, from SFC specification to Petri net verification **CTA** p164
Region-based image coding using polynomial intensity functions **VIS** p15
Reliability-throughput: optimisation for adaptive forward error correction systems **COM** p341
Reliable online adaptation of models with variable time delays **CTA** p417
Removing CSC violations in asynchronous circuits by delay padding **CDT** p413
Review of numerical methods for predicting sonar array performance **RSN** p196
Robust speed-controlled induction-motor drive using EKF and RLS estimators **EPA** p186
Scattering from elongated objects: direct solution in O(N log^2 N) operations **MAP** p277
Scheduling short-term hydrothermal generation using evolutionary programming techniques **GTD** p371
Screening of variables for the empirical modelling of semiconductor devices **SMT** p319
Short-term hydro-scheduling using Hopfield neural network **GTD** p269
Simulated annealing applied to the Misell algorithm for phase retrieval **MAP** p298
Sojourn time analysis of prioritised DQDB (IEEE802.6) MAN with bursty traffic input **COM** p112
Solving the security constrained optimal power flow problem in a distributed computing environment **GTD** p593
Source coding of wavelet-transformed digital HDTV for recording applications **VIS** p1
Speculative parallel simulated annealing with acceptance prediction **CDT** p219
Static controllers for magnetic suspension and balance systems **CTA** p338
Statistical syntactic methods for high-performance OCR **VIS** p23
Symbolic method for simplifying AND-EXOR representations of Boolean functions using a binary-decision technique and a genetic algorithm **CDT** p151
Theory of state covariance assignment for linear single-input systems **CTA** p289
Three-phase fast decoupled power flow for distribution networks **GTD** p188
Time domain method for the nonlinear steady-state analysis of electromagnetic fields **SMT** p377
Time-harmonic two- and three-dimensional Green dyadics for a special class of gyrotropic bianisotropic media **MAP** p413
Two-degree-of-freedom design method of LQI servo systems: use of frequency-dependent weighting matrices for sensitivity reduction **CTA** p557
Two-dimensional analysis of bandwidth of open hard surface **MAP** p475
Use of group theory in symmetrical 3-D eddy-current problems **SMT** p369
Use of multilayer feedforward neural networks in identification and control of Wiener model **CTA** p255
Use of transmission-line modelling in BEM for solution of piece-homogeneous static field problems **SMT** p157
User-friendly design method for fuzzy logic controller **CTA** p358
Utilisation of the MV spectrum for diagnosis and estimation of harmonic fields **VIS** p273
Variable statistical wordlength in digital filters **VIS** p62
Visiplan: a knowledge-based modelling tool **CTA** p73
Volume-conformation method to study scattering by PEC objects with FDTD **MAP** p131
Weak bus oriented reactive power planning for system security **GTD** p541

MEASUREMENT OF SPECIFIC VARIABLES

Accelerated quasi-DC method and circuit for measuring the gate-drain coupling capacitance for devices within a CMOS process technology **CDS** p302
Advances in aircraft-height estimation using distance-measuring equipment **RSN** p47
Analysis of shielded-room error for screened rooms and its application to low-frequency emission measurements from electrically small sources **SMT** p209
Broken rotor bars: their effect on the transient performance of induction machines **EPA** p449
Calculation and measurement of unbalanced magnetic pull in cage induction motors with eccentric rotors. II. Experimental investigation **EPA** p202
Characterisation of electric alloys for electric drives **SMT** p173
Characterisation of nonoriented electric alloys under nonconventional conditions **SMT** p35
Coaxial shunt intended for transient current measurement in a pseudospark switch **SMT** p119
Coercivity measurements on high permeability nickel-iron alloys using a modified NPL vibrating coil magnetometer **SMT** p171
Current analysis of polyimide passivated InGaP/GaAs HBT **CDS** p307
Effect of an antioxidant additive on morphology and space-charge characteristics of low-density polyethylene **SMT** p26
Effect of cross-polar coupling on open area test site measurement correlation and repeatability **SMT** p202
Experimental study of the vibrational behaviour of machine stators **EPA** p242
Improved HTSC surface loss measurements evaluating a multipath transmission signal **MAP** p491
Improving the traceability of coaxial impedance measurements at lower RF in the UK **SMT** p241
Loss-of-mains detection for small generators **EPA** p225
Low measurement uncertainties in the frequency range 30 MHz to 1 GHz using a calculable standard dipole antenna and national reference ground plane **SMT** p221
NAMAS-accredited microwave permittivity/permeability measurement system **SMT** p247
New approach to characterisation of electric alloys under rotating magnetic flux density **SMT** p399
Nonstationary behaviour of partial discharges in a generator stator conductor due to voltage conditioning effects **SMT** p285
Novel nine-port network analyser for measuring scattering coefficients of two-port devices **MAP** p137
Numerical and experimental evaluation of magnetic field generated by power busbar systems **GTD** p455
On-line leakage current monitoring of 400 kV insulator strings in polluted areas **GTD** p560
Online compensation and calibration of a chromatically addressed, photoelastic strain sensor with optical fibre transmission **SMT** p166
Performance of FFT-rotor slot harmonic speed detector for sensorless induction motor drives **EPA** p258
Silica-based sol-gel optical waveguides on silicon **OPT** p287
Subsurface electrical impedance imaging using orthogonal linear electrode arrays **SMT** p41
Three-section sampled-grating DBR lasers: modelling and measurements **OPT** p24
Towards a new partial discharge calibration strategy based on the transfer function of machine stator windings **SMT** p57
Traceable magnetic field strength measurements to 120 kHz **SMT** p255
Two-stage bit allocation algorithm for stereo audio coder **VIS** p331
Ultrasonic pulse-phase method applied in fluid flow measurements **SMT** p327
Wideband I/Q demodulators: measurement technique and matching characteristics **RSN** p300

MEASUREMENT SCIENCE

Advances in aircraft-height estimation using distance-measuring equipment **RSN** p47
Analysis of shielded-room error for screened rooms and its application to low-frequency emission measurements from electrically small sources **SMT** p209
Automatic calibration of precision and programmable AC measuring instruments at IEN **SMT** p259
Compact antenna range performance evaluation using simulated pattern measurements **MAP** p200
Computational method for remote meter calibration in power systems **GTD** p393
Development of a library of low-loss silicon-on-insulator optoelectronic devices **OPT** p312
European intercomparison of antenna factors in the frequency range 30 MHz to 1 GHz **SMT** p229
Improving the traceability of coaxial impedance measurements at lower RF in the UK **SMT** p241
Low measurement uncertainties in the frequency range 30 MHz to 1 GHz using a calculable standard dipole antenna and national reference ground plane **SMT** p221
NAMAS-accredited microwave permittivity/permeability measurement system **SMT** p247
Online compensation and calibration of a chromatically addressed, photoelastic strain sensor with optical fibre transmission **SMT** p166
Sparkover voltage of sphere gaps under standard lightning and switching impulse voltages **SMT** p187
Towards a new partial discharge calibration strategy based on the transfer function of machine stator windings **SMT** p57
Traceable magnetic field strength measurements to 120 kHz **SMT** p255
Ultrasonic pulse-phase method applied in fluid flow measurements **SMT** p327
Wideband I/Q demodulators: measurement technique and matching characteristics **RSN** p300

MICROMECHANICAL DEVICE TECHNOLOGY

Hybrid integration onto silicon motherboards with planar silica waveguides **OPT** p316

MICROWAVE CIRCUITS

Analysis of multilayer inset dielectric guides containing magnetised ferrites **MAP** p390

Application of a source method for modelling step discontinuities in microstrip circuit **MAP** p169
Design of compact monolithic dielectric-filled metal-pipe rectangular waveguides for millimetre-wave applications **MAP** p451
Electronically steered antenna system for the Australian Mobilesat **MAP** p347
Fabrication and characterisation of transparent-gate field effect transistors using indium tin oxide **OPT** p7
Fabrication and microwave characterisation of multilayer circuits for MMIC applications **MAP** p225
Fully passivated W-band InAlAs/InGaAs/InP monolithic low noise amplifiers **MAP** p361
Improved approximation for effective permeability in microwave ferrites **MAP** p444
Large-signal optically controlled HEMT model and oscillator design **MAP** p487
Millimetre-wave frequency tripling using stacked heterostructure-barrier varactors on InP **MAP** p272
Modelling of thin-film HTS/ferroelectric interdigital capacitors **MAP** p397
Novel nine-port network analyser for measuring scattering coefficients of two-port devices **MAP** p137
Power amplifier performance and modelling of one-emitter-finger GaAlAs/GaAs heterojunction bipolar transistor **CDS** p352
S-band digital downconverter for radar applications based on a GaAs MMIC fast sample-and-hold **CDS** p337
Scattering parameters of arbitrarily oriented slot-coupled microstrip lines **MAP** p141
Signal-noise neural network model for active microwave devices **CDS** p1
Stability analysis of Cartesian feedback linearisation for amplifiers with weak nonlinearities **COM** p212
TLM diakoptics for coupled-mode analysis of GaAs MESFET distributed amplifier **MAP** p261
Unequal space charge region widths and deviation of avalanche region centre in symmetrical pulsed double-drift IMPATT diode **CDS** p348
Whispering gallery dielectric resonator mode GaAs FET oscillator **MAP** p441
Wideband active microwave isolators using GaAs MMIC technology **MAP** p179

MICROWAVE MEASUREMENT TECHNIQUES

Improved HTSC surface loss measurements evaluating a multipath transmission signal **MAP** p491
Microwave measurement of the nonlinear refractive index of PZT **MAP** p189
NAMAS-accredited microwave permittivity/permeability measurement system **SMT** p247
Novel nine-port network analyser for measuring scattering coefficients of two-port devices **MAP** p137
Wideband I/Q demodulators: measurement technique and matching characteristics **RSN** p300

MILITARY SYSTEMS

Factors affecting the development of the radio proximity fuse 1940-1944 **SMT** p1

MODULATION

Adaptive differential detection for M-ary DPSK **COM** p21
Adaptive phase diversity for MDPSK reception **COM** p267
Analysis of optical phase conjugation using four-wave mixing in a dispersion-shifted fibre **OPT** p195
Design of digital filters for precision quadrature demodulation **VIS** p73
Digital transmission using multimode phase-continuous chirp signals **COM** p87
Duobinary technique for dispersion reduction in high capacity optical systems–modelling, experiment and field trial **OPT** p228
Effect of electronic-ballast fluorescent lighting on wireless infrared links **OPT** p347
Estimated bit error probability of DS-SSMA/MDPSK with differential phase detector on satellite mobile channel **COM** p297
Experimental validation of Volterra series nonlinear modelling for microwave subcarrier optical systems **OPT** p209
Fast adaptive polynomial I and Q predistorter with global optimisation **COM** p78
Iterative interference cancellation for FFH/MFSK MA systems **COM** p380
Online compensation and calibration of a chromatically addressed, photoelastic strain sensor with optical fibre transmission **SMT** p166
Optically preamplified pulse-position modulation for fibre-optic communication systems **OPT** p153
Optimum time diversity for channels subject to pulse-burst interference **COM** p43
Performance of multiple pulse position modulation on multipath channels **OPT** p360
Phased array acoustic imaging in ground co-ordinates, with extension to synthetic aperture processing **RSN** p131
Procedure for automatic recognition of analogue and digital modulations **COM** p259
Sensitivity evaluation of optical wireless PPM systems utilising PIN-BJT receivers **OPT** p355.
Stability analysis of Cartesian feedback linearisation for amplifiers with weak nonlinearities **COM** p212
UHF intermodulation product prediction in digital systems using SPICE: the need for nonlinear macromodels **SMT** p313

MODULATORS AND DEMODULATORS

1 V FM demodulator circuit **CDS** p103
Design of digital filters for precision quadrature demodulation **VIS** p73
Performance of phase-locked loop frequency synthesiser using accumulative phase detector **CDS** p249
S-band digital downconverter for radar applications based on a GaAs MMIC fast sample-and-hold **CDS** p337
Suppression of image frequency mode in microprocessor-controlled frequency synthesising systems **CDS** p171
Use of second order Markov chains to model digital symbol synchroniser performance **COM** p250

MULTIMEDIA

Orwell-D: medium access control for data, speech and two-layer video **COM** p189

MULTIPROCESSOR SYSTEMS

Area efficient systolic interconnection networks **CDT** p232
Comparison of two common pipeline structures **CDT** p161
Decoupled asymmetrical three-phase load flow study by parallel processing **GTD** p61
Decoupled simulation of asymmetrical three-phase power network transients **GTD** p587
Delayed precise invalidation–a software cache coherence scheme **CDT** p337
Development of a method of optimising data distribution on a loosely coupled multiprocessor system **CDT** p239
Difference clocks: a new scheme for logical time in distributed systems **CDT** p426
New program model for program partitioning on NUMA multiprocessor systems **CDT** p431
Solving the security constrained optimal power flow problem in a distributed computing environment **GTD** p593
Speculative parallel simulated annealing with acceptance prediction **CDT** p219

MULTIVARIABLE CONTROL SYSTEMS

Control of rigid robot manipulators via combination of adaptive sliding mode control and compensated inverse dynamics approach **CTA** p283
Decentralised control design of uncertain nominally linear symmetric composite systems **CTA** p530
Design and analysis of neural/fuzzy variable structural PID control systems **CTA** p200
Discrete integral variable structure model following control for induction motor drivers **EPA** p467
Expert robust decentralised controller for uncertain large-scale systems **CTA** p519
Frequency based tuning of SISO controllers for two-by-two processes **CTA** p49
Graphical method of prediction of limit cycle for multivariable nonlinear systems **CTA** p423
Modelling and controlling one-degree-of-freedom impacts **CTA** p85
New scheme of sliding-mode control for high performance induction motor drives **EPA** p177
Nonlinear and direction-dependent dynamic process modelling using neural networks **CTA** p44
Optimal and robust digital current controller synthesis for vector-controlled induction motor drive systems **EPA** p141
Robust adaptive force/motion control of constrained robots **CTA** p103
Robust decentralised load-frequency control of multi-area power systems **GTD** p377
Robust stability for perturbed large-scale time-delay systems **CTA** p233
Satellite attitude control via sliding mode with perturbation estimation **CTA** p276
Sliding mode control using time-varying switching gain and boundary layer for electrohydraulic position and differential pressure control **CTA** p325
Temporal multiresolution analysis for a quantitative/qualitative interpretation of complex dynamic processes **CTA** p191
Time-varying sliding modes for second-order systems **CTA** p455
Variable structure control of voltage sourced reversible rectifiers **EPA** p18

NETWORK ANALYSIS

Analogue realisation of integrated FIR filters **CDS** p274
Factored state-space stray-insensitive switched-capacitor filters **CDS** p325

NEURAL NETS

Accurate approximation to the optimum parameter estimate for K-distributed clutter **RSN** p383
Adaptive step edge model for self-consistent training of neural network for probabilistic edge labelling **VIS** p41
Application of ultrasound to the inspection of insulation **SMT** p177
Artificial neural-network-based protection scheme for controllable series-compensated EHV transmission lines **GTD** p535
Artificial neural network power system stabiliser trained with an improved BP algorithm **GTD** p135
Artificial neural networks for nonlinear time-domain filtering of speech **VIS** p149
Backpropagation without multiplier for multilayer neural networks **CDS** p229
Closed semiring connectionist network for the Bellman-Ford computation **CDT** p189
Computer vision applied to the detection and localisation of acoustic neuromas from head MR images **VIS** p265
Design and analysis of neural/fuzzy variable structural PID control systems **CTA** p200
Estimating power consumption of CMOS circuits modelled as symbolic neural networks **CDT** p331
Feature-mapping data fusion **RSN** p65
Fuzzy neural network and fuzzy expert system for load forecasting **GTD** p106
Fuzzy neural networks and application to the FBC process **CTA** p259
Harmonic estimation in a power system using adaptive perceptrons **GTD** p565
Hybrid architecture for analogue neural network and its circuit implementation **CDS** p123
Improved prediction of I_{F2} and I_0 indices using neural networks **MAP** p341
Intelligent control of large power transformer cooling pumps **GTD** p474
Intelligent controller design for the ship steering problem **CTA** p17
Lateral inhibition net and weighted matching algorithms for speech recognition in noise **VIS** p324
Learning systems in intelligent control: an appraisal of fuzzy, neural and genetic algorithm control applications **CTA** p367
Modified neocognitron for improved 2-D pattern recognition **VIS** p31
Neural network architectures for parameter estimation of dynamical systems **CTA** p387
Neural network learning approach of intelligent multimodel controller **CTA** p395
Neuro-adaptive hybrid controller for robot-manipulator tracking control **CTA** p270
Nonlinear and direction-dependent dynamic process modelling using neural networks **CTA** p44
Nonlinear autoregressive integrated neural network model for short-term load forecasting **GTD** p500
Parametric fault identification and dynamic compensation techniques for cellular neural network hardware **CDS** p295
Performance of neural data associator **RSN** p71
Short-term hydro-scheduling using Hopfield neural network **GTD** p269
Signal-noise neural network model for active microwave devices **CDS** p1
Topology processing and static state estimation using artificial neural networks **GTD** p99
Transient stability screening using artificial neural networks within a dynamic security assessment system **GTD** p129
Use of multilayer feedforward neural networks in identification and control of Wiener model **CTA** p255

NONELECTRIC VARIABLES CONTROL

Application of nonlinear control to switched reluctance motors: a feedback linearisation approach **EPA** p371
Current sensorless field-oriented control of induction motors **EPA** p492
Design and analysis of neural/fuzzy variable structural PID control systems **CTA** p200
Design of a wire-suspended mobile robot capable of avoiding path obstacles **CTA** p349
Discrete integral variable structure model following control for induction motor drivers **EPA** p467
Doubly fed induction generator using back-to-back PWM converters and its application to variable-speed wind-energy generation **EPA** p231
Dynamic performance limitations for MRAS based sensorless induction motor drives. I. Stability analysis for the closed loop drive **EPA** p113
Fuzzy neural networks and application to the FBC process **CTA** p259
Guaranteed rates of convergence of a class of PD controllers for trajectory tracking problems of robotic manipulators with dynamic uncertainties **CTA** p186
Hybrid position/force control of a hydraulic underwater manipulator **CTA** p145
Input filter stability of drives fed from voltage inverters controlled by direct flux and torque control methods **EPA** p396
Intelligent control of large power transformer cooling pumps **GTD** p474
Modelling and controlling one-degree-of-freedom impacts **CTA** p85
New scheme of sliding-mode control for high performance induction motor drives **EPA** p177
Nonlinear and direction-dependent dynamic process modelling using neural networks **CTA** p44
Online compensation and calibration of a chromatically addressed, photoelastic strain sensor with optical fibre transmission **SMT** p166
Robust adaptive force/motion control of constrained robots **CTA** p103
Robust control of manipulators using the computed torque plus H_∞ compensation method **CTA** p64
Robust indirect adaptive control of the electrohydraulic velocity control systems **CTA** p448
Robust speed-controlled induction-motor drive using EKF and RLS estimators **EPA** p186
Satellite attitude control via sliding mode with perturbation estimation **CTA** p276
Sliding mode control using time-varying switching gain and boundary layer for electrohydraulic position and differential pressure control **CTA** p325
Weld bead placement system for multipass welding [using transputer-based laser triangulation vision system] **SMT** p85

NONLINEAR CONTROL SYSTEMS

Application of a full-order extended Luenberger observer for a position sensorless operation of a switched reluctance motor drive **CTA** p401
Application of nonlinear control to switched reluctance motors: a feedback linearisation approach **EPA** p371
Design of nonlinear robust excitation control for multimachine power systems **GTD** p253
Graphical method of prediction of limit cycle for multivariable nonlinear systems **CTA** p423
Identification of discrete Volterra series using maximum length sequences **CDS** p241
Input filter stability of drives fed from voltage inverters controlled by direct flux and torque control methods **EPA** p396
Nonlinear and direction-dependent dynamic process modelling using neural networks **CTA** p44
Nonlinear and sampled data control systems analysis using spreadsheets **SMT** p52
Nonlinear optimal-variable-aim strategy for improving multimachine power system transient stability **GTD** p249
Output tracking control of uncertain nonlinear systems with an input time delay **CTA** p309
Reliable online adaptation of models with variable time delays **CTA** p417
Robust control of manipulators using the computed torque plus H_∞ compensation method **CTA** p64
Robust nonlinear controller for power system transient stability enhancement with voltage regulation **GTD** p407
Satellite attitude control via sliding mode with perturbation estimation **CTA** p276

NONLINEAR NETWORK ANALYSIS

Amplifier linearisation through the use of special negative linear feedback **CDS** p61
Bifurcation route to chaos for a ferroresonant circuit using an electromagnetic transients program **GTD** p238

NONLINEAR OPTICS

Analysis of optical phase conjugation using four-wave mixing in a dispersion-shifted fibre **OPT** p195
Approximate solution to the envelope of a pulse propagating in a nonlinear optical fibre **OPT** p200
Duobinary technique for dispersion reduction in high capacity optical systems–modelling, experiment and field trial **OPT** p228
Estimation of maximal modulation bandwidth and group velocity dispersion in strained InGaAs quantum-well lasers **OPT** p57
Experimental validation of Volterra series nonlinear modelling for microwave subcarrier optical systems **OPT** p209
Fabrication and characterisation of a CdS-doped silica-on-silicon planar waveguide **OPT** p298
Fabrication and characteristics of tapered waveguide semiconductor Raman lasers **OPT** p113
Frequency conversion in travelling wave semiconductor laser amplifiers with bulk and quantum well structures **OPT** p119
Influence of transverse modes on the dynamic response of vertical cavity surface emitting lasers **OPT** p189
Numerical analysis of thermally induced optical nonlinearity in GaSe layered crystal **OPT** p244
Optical switching with gain in waveguide-modulator structures **OPT** p101
Semiconductor optical amplifiers in WDM star networks **OPT** p144
THz frequency conversion in injection locked semiconductor laser oscillators **OPT** p41
Upgrading the embedded standard-fibre network by optical-phase conjugation **OPT** p205
VCSEL-polarisation control with polarised feedback **OPT** p104

NUMERICAL ANALYSIS

3-dimensional systolic architecture for parallel VLSI implementation of the discrete cosine transform **CDS** p255
Accuracy of an interferometer in noise **RSN** p217
Accurate approximation to the optimum parameter estimate for K-distributed clutter **RSN** p383
Active stereo vision and direct surface parameter estimation: curve-to-curve image plane mappings **VIS** p109
Ambiguity function and Cramer-Rao bound in the multisignal case **RSN** p227
Analysis of interconnect networks with conducting wedge loaded by an inhomogeneous dielectric substrate **MAP** p217
Analysis of microwave resonators using transmission line modelling **SMT** p362
Analysis of quasiperiodic reflector antenna **MAP** p293
Analysis of shielded-room error for screened rooms and its application to low-frequency emission measurements from electrically small sources **SMT** p209
Analysis of stabilised output error methods **CTA** p209
Analysis of surface-wave excitation and radiation mechanisms of a monopole on a circular grounded dielectric slab with critical thickness **MAP** p335
Analysis of TM scattering from open two-dimensional perfectly conducting shells using aggregated compactly-supported wavelet bases **MAP** p152
Application of a source method for modelling step discontinuities in microstrip circuit **MAP** p169
Application of adaptive absorbing boundary condition to finite element solution of three-dimensional scattering **MAP** p57
Application of Gabor transform technique to supervise power system transient harmonics **GTD** p461
Bayesian channel equalisation and robust features for speech recognition **VIS** p223
Bayesian decision feedback equaliser for overcoming co-channel interference **COM** p219
Bifurcated waveguide fed broadwall slots radiating through a baffle **MAP** p465
Block classification for an adaptive 1-D/2-D DCT video coding **VIS** p155
Capacitance relations for a class of two-dimensional conductor configurations **SMT** p302
Cellular CDMA overlay systems **COM** p389
Characterisation of near-field focusing with application to low altitude beam focusing of the Arecibo tri-reflector system **MAP** p284
Comparative study of two integral-equation formulations for inductive irises in rectangular waveguides **MAP** p483
Complex gyrator circuit of a junction circulator using weakly magnetised planar irregular hexagonal resonator **MAP** p532
Computational method for remote meter calibration in power systems **GTD** p393
Convergence and steady-state properties of the least-mean mixed-norm (LMMN) adaptive algorithm **VIS** p137
Convergence of the fictitious-current model **MAP** p163
Cross-coupling between open-ended coaxial radiators **MAP** p265
Decoupled asymmetrical three-phase load flow study by parallel processing **GTD** p61
Design of nonseparable 3-D filter banks/wavelet bases using transformations of variables **VIS** p51
Design of some 2-D filters through the transformation technique **VIS** p184
Design of two-channel nonuniform-division maximally decimated filter banks using L_1 error criteria **VIS** p79
Detection of the number of signals in noise with banded covariance matrices **RSN** p289
Determining the number of interpole turns needed for the perfect commutation of a DC machine **EPA** p135
Development and hardware implementation of a compensating algorithm for the secondary current of current transformers **EPA** p41
Development of a method of optimising data distribution on a loosely coupled multiprocessor system **CDT** p239
Distribution fast decoupled state estimation by measurement pairing **GTD** p43
Dual topological theorems of linear active networks **CDS** p225
Electric field integral equation for cylindrical structures **MAP** p147
Electromagnetic field behaviour at edges in general bianisotropic media **MAP** p527
Entire-domain analysis of thin-wire antennas in layered media **MAP** p317
Fault-tolerant QRD recursive least squares **CDT** p137
Finite difference solution of EM fields by asymptotic waveform techniques **MAP** p512
Free space dyadic Green's function applied to the full-wave numerical analysis of planar transmission lines and dielectric waveguides **MAP** p328
Functionally asynchronous array processor for morphological filtering of greyscale images **CDT** p273
General entire-domain method for analysis of dielectric scatterers **MAP** p498
Higher-dimension detection of targets from scanned radar **RSN** p313
Hybrid FE/MoM analysis of a cavity-backed slit loaded with anisotropic material **MAP** p422
Identification of MA processes using cumulants: several sets of linear equations **VIS** p87
Image coding by multistep, adaptive flux interpolation **VIS** p337
Image coding using wavelet transform and classified vector quantisation **VIS** p285
Image reconstruction of a perfectly conducting cylinder by the genetic algorithm **MAP** p249
Improved approximation for effective permeability in microwave ferrites **MAP** p444
Improved solution for mode coupling in different-sized circular apertures and its application **MAP** p457
Improvements of dipole, helix, spiral, microstrip patch and aperture antennas with ground planes by using corrugated soft surfaces **MAP** p244
Input filter stability of drives fed from voltage inverters controlled by direct flux and torque control methods **EPA** p396
Integral formulation for 3-D eddy current problems **SMT** p91
Inverse kinematics computations with modified CORDIC iterations **CDT** p87
Iterative interference cancellation for FFH/MFSK MA systems **COM** p380
Iterative learning control for discrete-time systems with exponential rate of convergence **CTA** p217
Iterative techniques for the solution of complex DC-rail-traction systems including regenerative braking **GTD** p613
KGPMAP: library-based technology-mapping technique for antifuse based FPGAs **CDT** p203
Loss-constrained economic power dispatch **GTD** p387
Low-bit-rate video coding with spatio-temporal geometric transforms **VIS** p164
Manifold of a planar array and its effects on the accuracy of direction-finding systems **RSN** p349
Mean-level detection in the frequency domain **RSN** p307
Method of lines for analysis of crossing transmission lines with finite-thickness conductors **MAP** p254
Method of residuals applied to wire antenna calculations **SMT** p309
Minimax design of recursive digital filters with a lattice denominator **VIS** p377
Model reduction with time delay combining the least-squares method with the genetic algorithm **CTA** p247

Modelling and design of switched reluctance motors with two phases simultaneously excited **EPA** p361
Multicriterion Compton backscatter imaging **SMT** p357
New approach to characterisation of electric alloys under rotating magnetic flux density **SMT** p399
New reduced load heuristic for computing blocking in large multirate loss networks **COM** p206
Newton-Raphson algorithm for the reliable solution of large power networks with embedded FACTS devices **GTD** p447
Newton solution for the steady-state interaction of AC/DC systems **GTD** p200
Noise analysis of time-averaging interpolation in D/A conversion **CDS** p143
Novel approach to the measurement of iron and stray load losses in induction motors **EPA** p78
Numerical and experimental evaluation of magnetic field generated by power busbar systems **GTD** p455
Outlier removal and discontinuity preserving smoothing of range data **VIS** p191
Parameter-extraction-like approach to derivation of boundary integral equation for shielded transmission lines **MAP** p73
Paving: a new implementation of dual-bound resistance calculations **SMT** p15
Performance and design optimisation of electric motors with heteropolar surface magnets and homopolar windings **EPA** p429
Performance, interarrival, and correlation analysis of four-phase MMPP model in ATM-based B-ISDN **COM** p363
Performance of FFT-rotor slot harmonic speed detector for sensorless induction motor drives **EPA** p258
Phase-decoupled load flow method for radial and weakly-meshed distribution networks **GTD** p39
Quasistatic analysis of microstrip lines on lossy inhomogeneous substrates **MAP** p379
Radiation by axial slots on a dielectric-coated nonconfocal conducting elliptic cylinder **MAP** p124
Radiation characteristics of rectangular patch antennas with a laminated ground plane **MAP** p107
Reconstruction of the spatial distribution of radar reflectivity of precipitation through linear-inversion techniques **RSN** p375
Representation of rotor spiders and axial ventilation ducts in reduced finite-element models for cage rotors **EPA** p423
Review of numerical methods for predicting sonar array performance **RSN** p196
Robust decentralised load-frequency control of multi-area power systems **GTD** p377
Robust indirect adaptive control of the electrohydraulic velocity control systems **CTA** p448
Robust speed-controlled induction-motor drive using EKF and RLS estimators **EPA** p186
S-parameter analysis of multislot microstrip patch arrays: spectral domain approach **MAP** p430
Scattering from elongated objects: direct solution in O(N log^2 N) operations **MAP** p277
Screening of variables for the empirical modelling of semiconductor devices **SMT** p319
Simple method for generating distance spectrum and multiplicities of convolutional codes **COM** p247
Simultaneous mean and texture edge detection in SAR clutter **RSN** p391
Single-layer dipole array for linear-to-circular polarisation conversion of slotted waveguide array **MAP** p211
Stabilised CPFDTD algorithm for the analysis of arbitrary 3D PEC structures **MAP** p367
Synthesis technique for scanning and/or reconfigurable beam reflector antennas with phase-only control **MAP** p402
Synthetic aperture radar imaging from phase-corrupted data **RSN** p268
Telerobot control and real-time simulation environment using parallel processing **CTA** p543
Theoretical and experimental characterisation of CPW-fed microstrip antennas **MAP** p13
Time domain method for the nonlinear steady-state analysis of electromagnetic fields **SMT** p377
TM-wave radiation from flanged parallel plate into dielectric slab **MAP** p207
Two-dimensional analysis of bandwidth of open hard surface **MAP** p475
Two-dimensional spatial-spectrum estimation of coherent signals without spatial smoothing and eigendecomposition **RSN** p295
Unitary Hessenberg and state-space model based methods for the harmonic retrieval problem **RSN** p346
Use of group theory in symmetrical 3-D eddy-current problems **SMT** p369
Use of transmission-line modelling in BEM for solution of piece-homogeneous static field problems **SMT** p157
Using symbolic Rademacher-Walsh spectral transforms to evaluate the agreement between Boolean functions **CDT** p64
Volume-conformation method to study scattering by PEC objects with FDTD **MAP** p131
Walsh-like functions and their relations **VIS** p279

OPTICAL BEAM MODULATORS

Development of a library of low-loss silicon-on-insulator optoelectronic devices **OPT** p312
Optical switching with gain in waveguide-modulator structures **OPT** p101
Unmodulated external-cavity diode laser stabilised on caesium D_2 line **SMT** p263

OPTICAL COMMUNICATION

1 Gbit/s optical free space link operating over 40 m system and applications **OPT** p330
Arrayed-waveguide grating lasers and their applications to tuning-free wavelength routing **OPT** p322
Development of a library of low-loss silicon-on-insulator optoelectronic devices **OPT** p312
Effect of electronic-ballast fluorescent lighting on wireless infrared links **OPT** p347
Experimental validation of Volterra series nonlinear modelling for microwave subcarrier optical systems **OPT** p209
Guided-wave optics in silicon-on-insulator technology **OPT** p307
Hybrid integration onto silicon motherboards with planar silica waveguides **OPT** p316
Indoor ambient light noise and its effect on wireless optical links **OPT** p334
Performance of infrared transmission systems under ambient light interference **OPT** p339
Recent progress in silica-based planar lightwave circuits on silicon **OPT** p257
Semiconductor optical amplifiers in WDM star networks **OPT** p144
Silica-based optical integrated circuits **OPT** p263
Upgrading the embedded standard-fibre network by optical-phase conjugation **OPT** p205

OPTICAL IMAGE PROCESSING

Accurate approximation to the optimum parameter estimate for K-distributed clutter **RSN** p383
Active stereo vision and direct surface parameter estimation: curve-to-curve image plane mappings **VIS** p109
Adaptive step edge model for self-consistent training of neural network for probabilistic edge labelling **VIS** p41
Automatic visual inspection based upon a variant of the n-tuple technique **VIS** p301
Block classification for an adaptive 1-D/2-D DCT video coding **VIS** p155
Building and training radiographic models for flexible object identification from incomplete data **VIS** p257
Cellular architecture for affine transforms on raster images **CDT** p103
Check! a generic and specific industrial inspection tool **VIS** p241
Colour image detection and matching using modified generalised Hough transform **VIS** p201
Compressed video processing for cut detection **VIS** p315
Computer vision applied to the detection and localisation of acoustic neuromas from head MR images **VIS** p265
Delays versus performance of visually guided systems **CTA** p436
Design of some 2-D filters through the transformation technique **VIS** p184
Detection and tracking of returns in sector-scan sonar image sequences **RSN** p157
DM-like differential chain code for handwriting and line graphics **VIS** p96
Efficient classification and codebook design for CVQ **VIS** p344
Efficient digital signal processing algorithm for sonar imaging **RSN** p149
Efficient hybrid tree/linear array architectures for block-matching motion estimation algorithms **VIS** p217
Efficient technique for circle detection using hypothesis filtering and Hough transform **VIS** p292
Functionally asynchronous array processor for morphological filtering of greyscale images **CDT** p273
Genetic algorithm implementation of stack filter design for image restoration **VIS** p177
High resolution processing of hybrid strip-map/spotlight mode SAR **RSN** p366
Image coding by multistep, adaptive flux interpolation **VIS** p337
Image coding using wavelet transform and classified vector quantisation **VIS** p285
Image reconstruction of a perfectly conducting cylinder by the genetic algorithm **MAP** p249
Joint motion/disparity MAP estimation for stereo image sequences **VIS** p101
Low bit-rate video coding with spatio-temporal geometric transforms **VIS** p164
Modified neocognitron for improved 2-D pattern recognition **VIS** p31
Morphological operations on crack coded binary images **VIS** p171
Motion detection using the randomised Hough transform: exploiting gradient information and detecting multiple moving objects **VIS** p361
Multicriterion Compton backscatter imaging **SMT** p357
Object boundary location by region and contour deformation **VIS** p353
Online Chinese character recognition using attributed relational graph matching **VIS** p125
Optimal quantisation strategy for DCT image compression **VIS** p10
Optimum edge detection in SAR **RSN** p31
Outlier removal and discontinuity preserving smoothing of range data **VIS** p191
Parametric fault identification and dynamic compensation techniques for cellular neural network hardware **CDS** p295
Performance analysis of optical receivers with space diversity reception **COM** p369
Performance and statistical analysis of two-layer MPEG coding algorithms for ATM networks **COM** p155
Phased array acoustic imaging in ground co-ordinates, with extension to synthetic aperture processing **RSN** p131
Preventive flow control method for packet video **COM** p98
Pyramid-structured progressive image transmission using quantisation error delivery in transform domains **VIS** p132
Real-time synthetic aperture sonar processing system **RSN** p169
Region-based image coding using polynomial intensity functions **VIS** p15
Seabed classification through multifractal analysis of sidescan sonar imagery **RSN** p140
Segmentation of plants and weeds for a precision crop protection robot using infrared images **VIS** p118
Side scan sonar using phased arrays for high resolution imaging and wide swath bathymetry **RSN** p163
Simultaneous mean and texture edge detection in SAR clutter **RSN** p391
Statistical syntactic methods for high-performance OCR **VIS** p23
Subsurface electrical impedance imaging using orthogonal linear electrode arrays **SMT** p41
Surface triangulation for 3-D scene model construction from stereo **VIS** p310
Synthetic aperture radar imaging from phase-corrupted data **RSN** p268
Temporal integration method for image-processing-based super-high-resolution image acquisition **VIS** p234
Text string extraction from images of colour-printed documents **VIS** p210
Watermarking digital images for copyright protection **VIS** p250
Weld bead placement system for multipass welding [using transputer-based laser triangulation vision system] **SMT** p85

OPTICAL LINKS AND EQUIPMENT

Cascading gain-saturation semiconductor laser-amplifier wavelength translators **OPT** p1
Duobinary technique for dispersion reduction in high capacity optical systems–modelling, experiment and field trial **OPT** p228
Effects of dry-band arc current on ageing of self-supporting dielectric cables in high fields **SMT** p10
Holograms for optical wireless LANs **OPT** p365
Hybrid wavelength hopping/time spreading code division multiple access systems **OPT** p161
Improved resonance and chirp mechanisms for multigigabit/s push-pull modulated DFB lasers **OPT** p49
Lossless packet switching with small buffers **COM** p335
Optical power distribution in wireless infrared LANs **COM** p93
Optically preamplified pulse-position modulation for fibre-optic communication systems **OPT** p153
Performance analysis of optical receivers with space diversity reception **COM** p369
Performance of an optical backplane bus for switch interconnection **OPT** p237
Performance of multiple pulse position modulation on multipath channels **OPT** p360
Power management system design of an optical multiwavelength transport network **OPT** p178

Sensitivity evaluation of optical wireless PPM systems utilising PIN-BJT receivers **OPT** p355
Silicon-based fabrication process for production of optical waveguides **OPT** p37
Theoretical investigations of electro-optical synchronisation of self-pulsating laser diodes **OPT** p31

OPTICAL MATERIALS AND DEVICES

8-band k.p theory of the material gain of strained tetrahedral semiconductors: application to 1.3 μm-InGaAsP lasers subject to additional external uniaxial stress **OPT** p62
Acousto-optic Bragg diffraction in SiGe/Si planar waveguides **OPT** p303
Analysis of dynamics of monolithic passively mode-locked laser diodes under external periodic excitation **OPT** p81
Analysis of optical phase conjugation using four-wave mixing in a dispersion-shifted fibre **OPT** p195
Antireflection-coated angled facet design **OPT** p214
Arrayed-waveguide grating lasers and their applications to tuning-free wavelength routing **OPT** p322
Cascading gain-saturation semiconductor laser-amplifier wavelength translators **OPT** p1
Channel waveguides formed in fused silica and silica-on-silicon by Si, P and Ge ion implantation **OPT** p281
Co-doping effects in rare-earth-doped planar waveguides **OPT** p293
Development of a library of low-loss silicon-on-insulator optoelectronic devices **OPT** p312
Effect of an antioxidant additive on morphology and space-charge characteristics of low-density polyethylene **SMT** p26
Fabrication and characterisation of a CdS-doped silica-on-silicon planar waveguide **OPT** p298
Fabrication and characterisation of transparent-gate field effect transistors using indium tin oxide **OPT** p7
Fabrication and spectral response analysis of AlGaAs/GaAs and InP/InGaAs HPTs with transparent ITO emitter contacts **OPT** p89
Fabrication of high-performance extended-cavity double-quantum-well lasers with integrated passive sections **OPT** p94
Generalised impedance boundary method of moments for multilayer graded-index dielectric waveguide structures **OPT** p167
Genesis of silicon-based guided-wave optics **OPT** p255
Guided-wave optics in silicon-on-insulator technology **OPT** p307
High number of wavelength channels demonstrated by a widely tunable sampled-grating DBR laser **OPT** p77
Hybrid integration onto silicon motherboards with planar silica waveguides **OPT** p316
Improved resonance and chirp mechanisms for multigigabit/s push-pull modulated DFB lasers **OPT** p49
Intensity modulated photoeffects in InP-MIS capacitors **OPT** p248
Numerical analysis of thermally induced optical nonlinearity in GaSe layered crystal **OPT** p244
Optical modulation with a resonant tunnelling diode **OPT** p12
Optical switching with gain in waveguide-modulator structures **OPT** p101
Performance of an optical backplane bus for switch interconnection **OPT** p237
Polarisation-independent optical filters based on co-directional phase-shifted grating-assisted couplers: theory and designs **OPT** p173
Realisation of Butterworth-type optical filters using 3×3 coupler ring resonators **OPT** p126
Recent progress in silica-based planar lightwave circuits on silicon **OPT** p257
Review of interferometric optical fibre hydrophone technology **RSN** p204
Rigorous electromagnetic study of diffraction loss in VCSEL mirrors **OPT** p221
Silica-based optical integrated circuits **OPT** p263
Silica-based sol-gel optical waveguides on silicon **OPT** p287
Silicon-based fabrication process for production of optical waveguides **OPT** p37
Three-section sampled-grating DBR lasers: modelling and measurements **OPT** p24
Wide-angle full vectorial beam propagation method **OPT** p139

OPTICAL RADAR

Outlier removal and discontinuity preserving smoothing of range data **VIS** p191

OPTICAL SPECTROSCOPY

Silica-based sol-gel optical waveguides on silicon **OPT** p287

OPTIMAL CONTROL

Design of nonlinear robust excitation control for multimachine power systems **GTD** p253
Economy/regularity fuzzy-logic-control of DC railway systems using event-driven approach **EPA** p9
Frequency based tuning of SISO controllers for two-by-two processes **CTA** p49
Frequency-shaping LQ control of Maglev suspension systems for optimal performance with deterministic and stochastic inputs **CTA** p25
Genetic algorithm aided controller design with application to SVC **GTD** p258
Guaranteeing feasibility in constrained stable generalised predictive control **CTA** p463
Iterative learning control for discrete-time systems with exponential rate of convergence **CTA** p217
Loop transfer recovery for systems under sampled measurements **CTA** p333
Model predictive control algorithms for systems with slow sampled outputs **CTA** p551
Nonlinear optimal-variable-aim strategy for improving multimachine power system transient stability **GTD** p249
Online rescheduling of mass rapid transit systems: fuzzy expert system approach **EPA** p307
Optimal and robust digital current controller synthesis for vector-controlled induction motor drive systems **EPA** p141
Optimal blocked random access algorithm for CDMA-random access systems **COM** p396
Optimal entire eigenstructure assignment of discrete-time linear systems **CTA** p301
Optimal strictly positive real approximations for stable transfer functions **CTA** p537
Parametric uncertainty bounds for performance robustness of linear systems with output feedback **CTA** p509
Robust control of manipulators using the computed torque plus H_∞ compensation method **CTA** p64
Self-tuning control applied to turbogenerator AVRs **GTD** p492
Time-varying sliding modes for second-order systems **CTA** p455
Two-degree-of-freedom design method of LQI servo systems: use of frequency-dependent weighting matrices for sensitivity reduction **CTA** p557

OPTIMISATION

Anytime heuristic schedule repair in manufacturing industry **CTA** p114
Connection optimisation for two types of videoconference **COM** p133
Design theory of thermoelectric modules for electrical power generation **SMT** p351
Dual space optimisation method for extracting the natural frequencies of a radar target **RSN** p286
Efficient algorithm to optimise the energy generation by pumped storage units in probabilistic production costing **GTD** p546
Experimental optimisation of flexible measurement systems **SMT** p77
Fast adaptive polynomial I and Q predistorter with global optimisation **COM** p78
Frequency based tuning of SISO controllers for two-by-two processes **CTA** p49
Frequency conversion in travelling wave semiconductor laser amplifiers with bulk and quantum well structures **OPT** p119
H_2 robust digital vector control for the induction machine **CTA** p237
Iterative learning control for discrete-time systems with exponential rate of convergence **CTA** p217
Loss-constrained economic power dispatch **GTD** p387
Neural network architectures for parameter estimation of dynamical systems **CTA** p387
Optimal harmonic sensor placement in fundamental network topologies **GTD** p608
Optimal quantisation strategy for DCT image compression **VIS** p10
Optimum edge detection in SAR **RSN** p31
Performance and design optimisation of electric motors with heteropolar surface magnets and homopolar windings **EPA** p429
Polarisation-independent optical filters based on co-directional phase-shifted grating-assisted couplers: theory and designs **OPT** p173
Predicting performance of three-phase induction motors connected to single-phase supplies **EPA** p339
Reliability-throughput: optimisation for adaptive forward error correction systems **COM** p341
Reliable online adaptation of models with variable time delays **CTA** p417
Scheduling short-term hydrothermal generation using evolutionary programming techniques **GTD** p371
Screening of variables for the empirical modelling of semiconductor devices **SMT** p319
Short-term hydro-scheduling using Hopfield neural network **GTD** p269
Solving the security constrained optimal power flow problem in a distributed computing environment **GTD** p593
Synchronised call handoff performance model **COM** p56
Visiplan: a knowledge-based modelling tool **CTA** p73

PARALLEL PROCESSING

3-dimensional systolic architecture for parallel VLSI implementation of the discrete cosine transform **CDS** p255
A loop partition technique for reducing cache bank conflict in multithreaded architecture **CDT** p30
All-fault-tolerant embedding of a complete binary tree in a group of Cayley graphs **CDT** p156
Architectural considerations for a self-timed decoupled processor **CDT** p251
Area efficient systolic interconnection networks **CDT** p232
Asynchronous implementation of the SCPP-A counterflow pipeline processor **CDT** p287
Backpropagation without multiplier for multilayer neural networks **CDS** p229
Branch merging for scheduling concurrent executions of branch operations **CDT** p369
Comparison of two common pipeline structures **CDT** p161
Concurrent programming and simulation of decoupled power electronic circuits **SMT** p131
Cost-effective novel flexible cell-level systolic architecture for high throughput implementation of 2-D FIR filters **CDT** p436
Decoupled asymmetrical three-phase load flow study by parallel processing **GTD** p61
Design of a distributed software architecture for an intelligent planning system **CTA** p125
Difference clocks: a new scheme for logical time in distributed systems **CDT** p426
Dynamic evaluation strategy for fine-grain data-parallel computing **CDT** p181
Efficient hybrid tree/linear array architectures for block-matching motion estimation algorithms **VIS** p217
Evaluating the performance of parallel programs in a distributed environment **CDT** p97
Fast algorithm and its systolic realisation for distance transformation **CDT** p168
Functional testing of pipelined processors **CDT** p318
Functionally asynchronous array processor for morphological filtering of greyscale images **CDT** p273
Gaussian-elimination-based algorithm for solving linear equations on mesh-connected processors **CDT** p407
Genetic algorithm implementation of stack filter design for image restoration **VIS** p177
New program model for program partitioning on NUMA multiprocessor systems **CDT** p431
Parallel event-driven logic simulation algorithms: tutorial and comparative evaluation **CDS** p177
Parallel event-driven MOS timing simulator on distributed memory multiprocessors **CDS** p207
Performance of an optical backplane bus for switch interconnection **OPT** p237
QR versus IQR algorithms for adaptive signal processing: performance evaluation for radar applications **RSN** p328
Reconfigurable parallel VLSI processor for dynamic control of intelligent robots **CDT** p23
Rotary pipeline processors **CDT** p259
Speculative parallel simulated annealing with acceptance prediction **CDT** p219
Superscalar instruction issue in an asynchronous microprocessor **CDT** p266
Systolic digit-serial multiplier **CDS** p14
Telerobot control and real-time simulation environment using parallel processing **CTA** p543
XMESH interconnection network for massively parallel computers **CDT** p401

PARAMETER ESTIMATION

Accurate approximation to the optimum parameter estimate for K-distributed clutter **RSN** p383

Active stereo vision and direct surface parameter estimation: curve-to-curve image plane mappings **VIS** p109
Analysis of stabilised output error methods **CTA** p209
Bayesian channel equalisation and robust features for speech recognition **VIS** p223
Closed-loop power control in CDMA systems **COM** p231
Dynamic performance limitations for MRAS based sensorless induction motor drives. I. Stability analysis for the closed loop drive **EPA** p113
Electromagnetic modelling and transient simulation of interconnects in high speed VLSI circuits **MAP** p373
Estimation of rotor resistance in induction motors **EPA** p87
Fractional lower-order statistics-based ambiguity functions for differential delay Doppler estimation **RSN** p358
Identification of linear systems in the presence of piecewise polynomial disturbances **CTA** p305
Identification of MA processes using cumulants: several sets of linear equations **VIS** p87
Manifold of a planar array and its effects on the accuracy of direction-finding systems **RSN** p349
Neural network architectures for parameter estimation of dynamical systems **CTA** p387
Nonlinear dynamics in telecommunication systems: complex behaviour in nonlinear processing systems **COM** p347
Parasitic series resistance-independent method for device-model parameter extraction **CDS** p68
Reliability-throughput: optimisation for adaptive forward error correction systems **COM** p341
Reliable online adaptation of models with variable time delays **CTA** p417
Use of naturally occurring system disturbances to estimate the fault current contribution of induction motors **GTD** p243
Utilisation of the MV spectrum for diagnosis and estimation of harmonic fields **VIS** p273

PATTERN RECOGNITION

Active stereo vision and direct surface parameter estimation: curve-to-curve image plane mappings **VIS** p109
Bayesian channel equalisation and robust features for speech recognition **VIS** p223
Bound for Minkowski metric or quadratic metric applied to VQ codeword search **VIS** p67
Building and training radiographic models for flexible object identification from incomplete data **VIS** p257
Colour image detection and matching using modified generalised Hough transform **VIS** p201
Compressed video processing for cut detection **VIS** p315
Efficient classification and codebook design for CVQ **VIS** p344
Efficient technique for circle detection using hypothesis filtering and Hough transform **VIS** p292
Feature-mapping data fusion **RSN** p65
Functionally asynchronous array processor for morphological filtering of greyscale images **CDT** p273
Image coding by multistep, adaptive flux interpolation **VIS** p337
Image coding using wavelet transform and classified vector quantisation **VIS** p285
Joint motion/disparity MAP estimation for stereo image sequences **VIS** p101
Lateral inhibition net and weighted matching algorithms for speech recognition in noise **VIS** p324
Modified neocognitron for improved 2-D pattern recognition **VIS** p31
Morphological operations on crack coded binary images **VIS** p171
Motion detection using the randomised Hough transform: exploiting gradient information and detecting multiple moving objects **VIS** p361
Object boundary location by region and contour deformation **VIS** p353
Online Chinese character recognition using attributed relational graph matching **VIS** p125
Pyramid-structured progressive image transmission using quantisation error delivery in transform domains **VIS** p132
Region based image coding using polynomial intensity functions **VIS** p15
Statistical syntactic methods for high-performance OCR **VIS** p23
Surface triangulation for 3-D scene model construction from stereo **VIS** p310
Temporal integration method for image-processing-based super-high-resolution image acquisition **VIS** p234
Walsh-like functions and their relations **VIS** p279

PERFORMANCE EVALUATION

1.1 V full-swing double bootstrapped BiCMOS logic gates **CDS** p41
All-fault-tolerant embedding of a complete binary tree in a group of Cayley graphs **CDT** p156
Cellular architecture for affine transforms on raster images **CDT** p103
Cost-effective novel flexible cell-level systolic architecture for high throughput implementation of 2-D FIR filters **CDT** p436
Development of a method of optimising data distribution on a loosely coupled multiprocessor system **CDT** p239
Fault-tolerant QRD recursive least squares **CDT** p137
Functional testing of pipelined processors **CDT** p318
Non-referenced prefetch (NRP) cache for instruction prefetching **CDT** p37
Piecewise estimation of the performability of computer systems **CDT** p129
Reliability levels for fault-tolerant linear processing using real number error correction **CDT** p355
Signal-noise neural network model for active microwave devices **CDS** p1
Software acceleration using programmable hardware devices **CDT** p55
Sojourn time analysis of prioritised DQDB (IEEE802.6) MAN with bursty traffic input **COM** p112
Speculative parallel simulated annealing with acceptance prediction **CDT** p219
XMESH interconnection network for massively parallel computers **CDT** p401

POWER ELECTRONICS

A doubly fed induction generator using back-to-back PWM converters supplying an isolated load from a variable speed wind turbine **EPA** p380
A new single-phase active power filter with reduced energy-storage capacity **EPA** p25
Automatic calibration of precision and programmable AC measuring instruments at IEN **SMT** p259
Comparison between space vector modulation and subharmonic methods for current harmonics of DSP-based permanent-magnet AC servo motor drive system **EPA** p151
Concurrent programming and simulation of decoupled power electronic circuits **SMT** p131
Doubly fed induction generator using back-to-back PWM converters and its application to variable-speed wind-energy generation **EPA** p231
Improved TLM link model for reactive circuit components **SMT** p341
Instantaneous power components in polyphase systems under nonsinusoidal conditions **SMT** p151
Medium frequency combined inverter for electroheat with improved starting arrangements **EPA** p165
Multiphase AC-DC conversion by means of loss-free resistive networks **CDS** p233
New snubber circuit with passive energy recovery for power inverters **EPA** p403
Nonstuck behaviour of open circuit supply faults in CMOS logic circuits **CDS** p9
Novel grid-connected photovoltaic inverter **GTD** p219
Series-parallel load-resonant converter for controlled-current arc welding power supply **EPA** p211
Simplified control method for the single-phase active power filter **EPA** p219

POWER ENGINEERING COMPUTING

Application of ultrasound to the inspection of insulation **SMT** p177
Artificial neural-network-based protection scheme for controllable series-compensated EHV transmission lines **GTD** p535
Artificial neural network power system stabiliser trained with an improved BP algorithm **GTD** p135
Bifurcation route to chaos for a ferroresonant circuit using an electromagnetic transients program **GTD** p238
Combining design and operational knowledge to enhance generator plant diagnostics **GTD** p300
Computer-aided design of a new nonunit protection scheme for EHV teed circuits **GTD** p142
Current sensorless field-oriented control of induction motors **EPA** p492
Decoupled asymmetrical three-phase load flow study by parallel processing **GTD** p61
Decoupled simulation of asymmetrical three-phase power network transients **GTD** p587
Discrete integral variable structure model following control for induction motor drivers **EPA** p467
Formula for the effect of a static VAr compensator on synchronising torque coefficient **GTD** p582
Fuzzy neural network and fuzzy expert system for load forecasting **GTD** p106
Fuzzy reasoning for knowledge-based assessment of dynamic voltage security **GTD** p157
Harmonic estimation in a power system using adaptive perceptrons **GTD** p565
Instantaneous power components in polyphase systems under nonsinusoidal conditions **SMT** p151
Interactive expert system for optimal design of electricity distribution systems **GTD** p151
Investigation into optimising high switching frequency regular sampled PWM control for drives and static power converters **EPA** p281
New approach to characterisation of electric alloys under rotating magnetic flux density **SMT** p399
New inverter-driven design and control method for two-phase induction motor drives **EPA** p458
Nonlinear autoregressive integrated neural network model for short-term load forecasting **GTD** p500
Nonlinear optimal-variable-aim strategy for improving multimachine power system transient stability **GTD** p249
Optimal and robust digital current controller synthesis for vector-controlled induction motor drive systems **EPA** p141
Rule-based approach to load transfer to alternate supplies based on the phase of the residual voltage on the disconnected busbar **GTD** p467
Self-tuning control applied to turbogenerator AVRs **GTD** p492
Short-term hydro-scheduling using Hopfield neural network **GTD** p269
Solid-state on-load transformer tap changer **EPA** p481
Solving the security constrained optimal power flow problem in a distributed computing environment **GTD** p593
Topology processing and static state estimation using artificial neural networks **GTD** p99
Transient stability screening using artificial neural networks within a dynamic security assessment system **GTD** p129
Use of naturally occurring system disturbances to estimate the fault current contribution of induction motors **GTD** p243

POWER SYSTEM CONTROL

A new single-phase active power filter with reduced energy-storage capacity **EPA** p25
Adaptive power system stabiliser based on pole-shifting technique **GTD** p96
Application of a full-order extended Luenberger observer for a position sensorless operation of a switched reluctance motor drive **CTA** p401
Application of fuzzy logic stabilisers in a multimachine power system environment **GTD** p263
Application of nonlinear control to switched reluctance motors: a feedback linearisation approach **EPA** p371
Application of the controllable series compensator in damping power system oscillations **GTD** p359
Artificial neural-network-based protection scheme for controllable series-compensated EHV transmission lines **GTD** p535
Artificial neural network power system stabiliser trained with an improved BP algorithm **GTD** p135
Capability of the static VAr compensator in damping power system oscillations **GTD** p353
Comparison of modal controllability between FACTS-based stabilisers and PSS in increasing the oscillation stability of multimachine power systems **GTD** p575
Current sensorless field-oriented control of induction motors **EPA** p492
Design of nonlinear robust excitation control for multimachine power systems **GTD** p253
Digitally controlled transducerless magnetic suspension system **SMT** p47
Discrete integral variable structure model following control for induction motor drivers **EPA** p467
Doubly fed induction generator using back-to-back PWM converters and its application to variable-speed wind-energy generation **EPA** p231
Dynamic characteristics and closed-loop performance of the series-parallel resonant converter **EPA** p345
Dynamic performance limitations for MRAS based sensorless induction motor drives. I. Stability analysis for the closed loop drive **EPA** p113
Formula for the effect of a static VAr compensator on synchronising torque coefficient **GTD** p582
Fuzzy reasoning for knowledge-based assessment of dynamic voltage security **GTD** p157

Genetic algorithm aided controller design with application to SVC **GTD** p258
H_∞ robust digital vector control for the induction machine **CTA** p237
Harmonic generation by HVDC schemes involving converters and static VAr compensators **GTD** p66
Improved design for electric vehicle induction motors using an optimisation procedure **EPA** p410
Input filter stability of drives fed from voltage inverters controlled by direct flux and torque control methods **EPA** p396
Intelligent control of large power transformer cooling pumps **GTD** p474
Modified LCLC-type series resonant converter with improved performance **EPA** p354
New inverter-driven design and control method for two-phase induction motor drives **EPA** p458
New scheme of sliding-mode control for high performance induction motor drives **EPA** p177
Newton-Raphson algorithm for the reliable solution of large power networks with embedded FACTS devices **GTD** p447
Nonlinear optimal-variable-aim strategy for improving multimachine power system transient stability **GTD** p249
Operation control of paralleled three-phase battery energy storage system **EPA** p317
Optimal and robust digital current controller synthesis for vector-controlled induction motor drive systems **EPA** p141
Performance of FFT-rotor slot harmonic speed detector for sensorless induction motor drives **EPA** p258
Practical evaluation of different modulation techniques for current-controlled voltage source inverters **EPA** p301
Robust decentralised load-frequency control of multi-area power systems **GTD** p377
Robust nonlinear controller for power system transient stability enhancement with voltage regulation **GTD** p407
Robust speed-controlled induction-motor drive using EKF and RLS estimators **EPA** p186
Rule-based approach to load transfer to alternate supplies based on the phase of the residual voltage on the disconnected busbar **GTD** p467
Self-tuning control applied to turbogenerator AVRs **GTD** p492
Series-parallel load-resonant converter for controlled-current arc welding power supply **EPA** p211
Simplified control method for the single-phase active power filter **EPA** p219
Solid-state on-load transformer tap changer **EPA** p481
Space vector representation of advanced motor models for vector controlled induction motors **EPA** p69
Static controllers for magnetic suspension and balance systems **CTA** p338
Synchronous generator damping enhancement through coordinated control of exciter and SVC **GTD** p211
Variable structure control of voltage sourced reversible rectifiers **EPA** p18
Vector control of cage induction motors: a physical insight **EPA** p59

POWER SYSTEM MANAGEMENT

Adaptive power system stabiliser based on pole-shifting technique **GTD** p96
Application of fuzzy logic stabilisers in a multimachine power system environment **GTD** p263
Application of the controllable series compensator in damping power system oscillations **GTD** p359
Applications of customer outage costs in system planning, design and operation **GTD** p305
Artificial neural-network-based protection scheme for controllable series-compensated EHV transmission lines **GTD** p535
Artificial neural network power system stabiliser trained with an improved BP algorithm **GTD** p135
Assessment of customer outage costs due to electric service interruptions: residential sector **GTD** p163
Capability of the static VAr compensator in damping power system oscillations **GTD** p353
Combined active and reactive dispatch with multiple objectives using an analytic hierarchical process **GTD** p344
Comparison of modal controllability between FACTS-based stabilisers and PSS in increasing the oscillation stability of multimachine power systems **GTD** p575
Constrained multiobjective global optimisation of longitudinal interconnected power system by genetic algorithm **GTD** p435
Design of nonlinear robust excitation control for multimachine power systems **GTD** p253
Economic dispatch of generators with prohibited operating zones: a genetic algorithm approach **GTD** p529
Efficient algorithm to optimise the energy generation by pumped storage units in probabilistic production costing **GTD** p546
Enhanced adequacy equivalent for composite power system reliability evaluation **GTD** p420
Evaluation of reliability worth and value of lost load **GTD** p171
Factors affecting customer outage costs due to electric service interruptions **GTD** p521
Formula for the effect of a static VAr compensator on synchronising torque coefficient **GTD** p582
Framework for the incorporation of demand-side in a competitive electricity market **GTD** p232
Fuzzy reasoning for knowledge-based assessment of dynamic voltage security **GTD** p157
Genetic algorithm aided controller design with application to SVC **GTD** p258
Harmonic generation by HVDC schemes involving converters and static VAr compensators **GTD** p66
Impacts of demand-side management on reliability cost/reliability worth analysis **GTD** p225
Instantaneous power components in polyphase systems under nonsinusoidal conditions **SMT** p151
Loss-constrained economic power dispatch **GTD** p387
Newton-Raphson algorithm for the reliable solution of large power networks with embedded FACTS devices **GTD** p447
Newton solution for the steady-state interaction of AC/DC systems **GTD** p200
Nonlinear optimal-variable-aim strategy for improving multimachine power system transient stability **GTD** p249
Novel grid-connected photovoltaic inverter **GTD** p219
Response health constraints in economic load dispatch considering standby units, interruptible loads and postponable outages **GTD** p599
Robust decentralised load-frequency control of multi-area power systems **GTD** p377
Robust nonlinear controller for power system transient stability enhancement with voltage regulation **GTD** p407
Rule-based approach to load transfer to alternate supplies based on the phase of the residual voltage on the disconnected busbar **GTD** p467
Spinning reserve allocation using response health analysis **GTD** p337
Synchronous generator damping enhancement through coordinated control of exciter and SVC **GTD** p211
Three-phase optimal harmonic power flow **GTD** p321
Tracing the flow of electricity **GTD** p313
Weak bus oriented reactive power planning for system security **GTD** p541

POWER SYSTEM PROTECTION

Artificial neural-network-based protection scheme for controllable series-compensated EHV transmission lines **GTD** p535
Computer-aided design of a new nonunit protection scheme for EHV teed circuits **GTD** p142
Degradation of ZnO based surge arresters under field conditions **SMT** p291
Development and hardware implementation of a compensating algorithm for the secondary current of current transformers **EPA** p41
Effects of magnetic field induction and ground potential rise on pilot wire relay system operations **GTD** p290
Models of grounded mid-tap open-wye and open-delta connected transformers for rigorous analysis of a distribution system **GTD** p82
New method of power swing blocking for digital distance protection **GTD** p19
Nonunit protection technique for EHV transmission systems based on fault-generated noise. Part 3: Engineering and HV laboratory testing **GTD** p276
On the equivalence of uniform and two-layer soils to multilayer soils in the analysis of grounding systems **GTD** p49
Phase selection based on superimposed components **GTD** p295
Simple model for post-fault motor behaviour for reliability/power quality assessment of industrial power systems **GTD** p56
Sparkover voltage of sphere gaps under standard lightning and switching impulse voltages **SMT** p187
Thermal fatigue of the contact/conductors system in emergency load panels **SMT** p298
Thermal response of coated steel conductors under surge currents taking the skin effect into account **SMT** p389
Weak bus oriented reactive power planning for system security **GTD** p541

POWER SYSTEMS AND APPLICATIONS

Analysis of power distribution in reinforced concrete during accelerated curing using electroheat **EPA** p172
Application of a full-order extended Luenberger observer for a position sensorless operation of a switched reluctance motor drive **CTA** p401
Application of Gabor transform technique to supervise power system transient harmonics **GTD** p461
Characterisation of electric alloys for electric drives **SMT** p173
Comparison between space vector modulation and subharmonic methods for current harmonics of DSP-based permanent-magnet AC servo motor drive system **EPA** p151
Compound matrix partitioning and modification for the solution of branched autotransformer traction feeds **EPA** p251
Current sensorless field-oriented control of induction motors **EPA** p492
Digitally controlled transducerless magnetic suspension system **SMT** p47
Discrete integral variable structure model following control for induction motor drivers **EPA** p467
Dynamic performance limitations for MRAS based sensorless induction motor drives. I. Stability analysis for the closed loop drive **EPA** p113
Economy/regularity fuzzy-logic control of DC railway systems using event-driven approach **EPA** p9
Effect of electronic-ballast fluorescent lighting on wireless infrared links **OPT** p347
Estimation of rotor resistance in induction motors **EPA** p87
Fault-tolerant permanent magnet machine drives **EPA** p437
Frequency-shaping LQ control of Maglev suspension systems for optimal performance with deterministic and stochastic inputs **CTA** p25
Improved design for electric vehicle induction motors using an optimisation procedure **EPA** p410
Indoor ambient light noise and its effect on wireless optical links **OPT** p334
Input filter stability of drives fed from voltage inverters controlled by direct flux and torque control methods **EPA** p396
Interaction of helical arc devices with interconnected networks **GTD** p89
Investigation into optimising high switching frequency regular sampled PWM control for drives and static power converters **EPA** p281
Iterative techniques for the solution of complex DC-rail-traction systems including regenerative braking **GTD** p613
Medium frequency combined inverter for electroheat with improved starting arrangements **EPA** p165
Models of grounded mid-tap open-wye and open-delta connected transformers for rigorous analysis of a distribution system **GTD** p82
New inverter-driven design and control method for two-phase induction motor drives **EPA** p458
New scheme of sliding-mode control for high performance induction motor drives **EPA** p177
Optimal and robust digital current controller synthesis for vector-controlled induction motor drive systems **EPA** p141
Performance of FFT-rotor slot harmonic speed detector for sensorless induction motor drives **EPA** p258
Performance of infrared transmission systems under ambient light interference **OPT** p339
Robust speed-controlled induction-motor drive using EKF and RLS estimators **EPA** p186
Series-parallel load-resonant converter for controlled-current arc welding power supply **EPA** p211
Slotless-armature DC drives for surface warship propulsion **EPA** p443
Weld bead placement system for multipass welding [using transputer-based laser triangulation vision system] **SMT** p85

POWER SYSTEMS AND PLANTS

A doubly fed induction generator using back-to-back PWM converters supplying an isolated load from a variable speed wind turbine **EPA** p380
Adequacy and reliability cost/worth implications of nonutility generation **GTD** p115
Analysis of power distribution in reinforced concrete during accelerated curing using electroheat **EPA** p172
Application of a full-order extended Luenberger observer for a position sensorless operation of a switched reluctance motor drive **CTA** p401
Application of Gabor transform technique to supervise power system transient harmonics **GTD** p461
Application of the decomposition technique for forecasting the load of a large electric power network **GTD** p13

Application of unique measuring techniques to positive impulse corona stabilisation in SF_6 **SMT** p182
Applications of customer outage costs in system planning, design and operation **GTD** p305
Bifurcation route to chaos for a ferroresonant circuit using an electromagnetic transients program **GTD** p238
Capability of the static VAr compensator in damping power system oscillations **GTD** p353
Characterisation of electric alloys for electric drives **SMT** p173
Combining design and operational knowledge to enhance generator plant diagnostics **GTD** p300
Comparison between space vector modulation and subharmonic methods for current harmonics of DSP-based permanent-magnet AC servo motor drive system **EPA** p151
Compound matrix partitioning and modification for the solution of branched autotransformer traction feeds **EPA** p251
Computational method for remote meter calibration in power systems **GTD** p393
Computer-aided design of a new nonunit protection scheme for EHV teed circuits **GTD** p142
Continuous harmonic state estimation of power systems **GTD** p329
Current sensorless field-oriented control of induction motors **EPA** p492
Damping the power-angle oscillations of a permanent-magnet synchronous generator with particular reference to wind turbine applications **EPA** p269
Decoupled asymmetrical three-phase load flow study by parallel processing **GTD** p61
Decoupled simulation of asymmetrical three-phase power network transients **GTD** p587
Digitally controlled transducerless magnetic suspension system **SMT** p47
Direct coupled, permanent magnet generators for wind turbine applications **EPA** p1
Discrete integral variable structure model following control for induction motor drivers **EPA** p467
Doubly fed induction generator using back-to-back PWM converters and its application to variable-speed wind-energy generation **EPA** p231
Dynamic performance limitations for MRAS based sensorless induction motor drives. I. Stability analysis for the closed loop drive **EPA** p113
Economic dispatch of generators with prohibited operating zones: a genetic algorithm approach **GTD** p529
Economy/regularity fuzzy-logic control of DC railway systems using event-driven approach **EPA** p9
Effect of electronic-ballast fluorescent lighting on wireless infrared links **OPT** p347
Effect of rotational load shedding on overall power system adequacy indices **GTD** p181
Effects of magnetic field induction and ground potential rise on pilot wire relay system operations **GTD** p290
Efficient algorithm to optimise the energy generation by pumped storage units in probabilistic production costing **GTD** p546
Electricity generation in the home: evaluation of single-house domestic combined heat and power **SMT** p345
Estimation of rotor resistance in induction motors **EPA** p87
Evolutionary programming approach to reactive power planning **GTD** p365
Fault location on two-terminal transmission lines based on voltages **GTD** p1
Fault-tolerant permanent magnet machine drives **EPA** p437
Frequency-shaping LQ control of Maglev suspension systems for optimal performance with deterministic and stochastic inputs **CTA** p25
Fuzzy neural network and fuzzy expert system for load forecasting **GTD** p106
Generation availability assessment of wind farms **GTD** p507
Harmonic estimation in a power system using adaptive perceptrons **GTD** p565
Harmonic generation by HVDC schemes involving converters and static VAr compensators **GTD** p66
Heuristics-guided evolutionary approach to multiobjective generation scheduling **GTD** p553
Hybrid method of determining the transient stability margin of a power system **GTD** p27
Impacts of demand-side management on reliability cost/reliability worth analysis **GTD** p225
Improved design for electric vehicle induction motors using an optimisation procedure **EPA** p410
Indoor ambient light noise and its effect on wireless optical links **OPT** p334
Input filter stability of drives fed from voltage inverters controlled by direct flux and torque control methods **EPA** p396
Interaction of helical arc devices with interconnected networks **GTD** p89
Interactive expert system for optimal design of electricity distribution systems **GTD** p151
Investigation into optimising high switching frequency regular sampled PWM control for drives and static power converters **EPA** p281
Iterative techniques for the solution of complex DC-rail-traction systems including regenerative braking **GTD** p613
Line monitoring and fault location using spread spectrum on power line carrier **GTD** p427
Medium frequency combined inverter for electroheat with improved starting arrangements **EPA** p165
Modelling partial discharge excitation of UHF signals in waveguide structures using Green's functions **SMT** p63
Models of grounded mid-tap open-wye and open-delta connected transformers for rigorous analysis of a distribution system **GTD** p82
Modified two-level state estimation approach [for power systems] **GTD** p193
Modular design of permanent-magnet generators for wind turbines **EPA** p388
Network observability: theory and algorithms based on triangular factorisation and path graph concepts **GTD** p123
New approach to characterisation of electric alloys under rotating magnetic flux density **SMT** p399
New inverter-driven design and control method for two-phase induction motor drives **EPA** p458
New method of power swing blocking for digital distance protection **GTD** p19
New scaling concept in power system analysis **GTD** p399
New scheme of sliding-mode control for high performance induction motor drives **EPA** p177
Nonlinear autoregressive integrated neural network model for short-term load forecasting **GTD** p500
Nonstationary behaviour of partial discharges in a generator stator conductor due to voltage conditioning effects **SMT** p285
Nonunit protection technique for EHV transmission systems based on fault-generated noise. Part 3: Engineering and HV laboratory testing **GTD** p276
Novel grid-connected photovoltaic inverter **GTD** p219
Novel method of finding the first swing stability margin of a power system from time domain simulation **GTD** p413
Operation control of paralleled three-phase battery energy storage system **EPA** p317
Optimal and robust digital current controller synthesis for vector-controlled induction motor drive systems **EPA** p141
Optimal harmonic sensor placement in fundamental network topologies **GTD** p608
Performance of FFT-rotor slot harmonic speed detector for sensorless induction motor drives **EPA** p258
Performance of infrared transmission systems under ambient light interference **OPT** p339
Response health constraints in economic load dispatch considering standby units, interruptible loads and postponable outages **GTD** p599
Robust speed-controlled induction-motor drive using EKF and RLS estimators **EPA** p186
Rule-based approach to load transfer to alternate supplies based on the phase of the residual voltage on the disconnected busbar **GTD** p467
Scheduling short-term hydrothermal generation using evolutionary programming techniques **GTD** p371
SF_6 breakdown in GIS **SMT** p270
Short-term hydro-scheduling using Hopfield neural network **GTD** p269
Simple model for post-fault motor behaviour for reliability/power quality assessment of industrial power systems **GTD** p56
Slotless-armature DC drives for surface warship propulsion **EPA** p443
Solving the security constrained optimal power flow problem in a distributed computing environment **GTD** p593
Spinning reserve allocation using response health analysis **GTD** p337
Suppression of transmission system oscillations by thyristor-controlled series compensation **GTD** p7
Three-phase fast decoupled power flow for distribution networks **GTD** p188
Topology processing and static state estimation using artificial neural networks **GTD** p99
Tracing the flow of electricity **GTD** p313
Transient stability screening using artificial neural networks within a dynamic security assessment system **GTD** p129
Use of naturally occurring system disturbances to estimate the fault current contribution of induction motors **GTD** p243
Weak bus oriented reactive power planning for system security **GTD** p541

POWER TRANSMISSION AND DISTRIBUTION

Applications of customer outage costs in system planning, design and operation **GTD** p305
Artificial neural-network-based protection scheme for controllable series-compensated EHV transmission lines **GTD** p535
Comparison of modal controllability between FACTS-based stabilisers and PSS in increasing the oscillation stability of multimachine power systems **GTD** p575
Design method for impedance matching networks **CDS** p186
Distribution fast decoupled state estimation by measurement pairing **GTD** p43
Effects of magnetic field induction and ground potential rise on pilot wire relay system operations **GTD** p290
Efficient load flow method for distribution systems with radial or mesh configuration **GTD** p33
Evaluation of reliability worth and value of lost load **GTD** p171
Harmonic generation by HVDC schemes involving converters and static VAr compensators **GTD** p66
HVDC converter transformer core saturation instability: a frequency domain analysis **GTD** p75
Interaction of helical arc devices with interconnected networks **GTD** p89
Interactive expert system for optimal design of electricity distribution systems **GTD** p151
Loss-constrained economic power dispatch **GTD** p387
Models of grounded mid-tap open-wye and open-delta connected transformers for rigorous analysis of a distribution system **GTD** p82
New scaling concept in power system analysis **GTD** p399
Newton-Raphson algorithm for the reliable solution of large power networks with embedded FACTS devices **GTD** p447
Nonunit protection technique for EHV transmission systems based on fault-generated noise. Part 3: Engineering and HV laboratory testing **GTD** p276
Optimal harmonic sensor placement in fundamental network topologies **GTD** p608
Phase-decoupled load flow method for radial and weakly-meshed distribution networks **GTD** p39
Power management system design of an optical multiwavelength transport network **OPT** p178
Simple model for post-fault motor behaviour for reliability/power quality assessment of industrial power systems **GTD** p56
Suppression of transmission system oscillations by thyristor-controlled series compensation **GTD** p7
Three-phase fast decoupled power flow for distribution networks **GTD** p188
Tracing the flow of electricity **GTD** p313

PREDICTIVE CONTROL

Economy/regularity fuzzy-logic control of DC railway systems using event-driven approach **EPA** p9
Frequency based tuning of SISO controllers for two-by-two processes **CTA** p49
Guaranteeing feasibility in constrained stable generalised predictive control **CTA** p463
Model predictive control algorithms for systems with slow sampled outputs **CTA** p551
Online rescheduling of mass rapid transit systems: fuzzy expert system approach **EPA** p307
Self-tuning control applied to turbogenerator AVRs **GTD** p492

PROBABILITY AND STATISTICS

Adaptive phase diversity for MDPSK reception **COM** p267
Adaptive probabilistic data-association algorithm for tracking in cluttered environment **RSN** p17
Adaptive step edge model for self-consistent training of neural network for probabilistic edge labelling **VIS** p41
Ambiguity function and Cramer-Rao bound in the multisignal case **RSN** p227
Analysis of mobile radio channel sounding measurements in inner city Dublin at 1.808 GHz **COM** p311
Application of unique measuring techniques to positive impulse corona stabilisation in SF_6 **SMT** p182
Bayesian channel equalisation and robust features for speech recognition **VIS** p223
Bayesian decision feedback equaliser for overcoming co-channel interference **COM** p219
Bound for Minkowski metric or quadratic metric applied to VQ codeword search **VIS** p67
Call blocking performance for dynamic channel allocation technique in future mobile satellite systems **COM** p289
Cell-averaging CFAR gain in spatially correlated K-distributed clutter **RSN** p321

Cellular CDMA overlay systems **COM** p389
Compressed video processing for cut detection **VIS** p315
Design and performance evaluation of a distributed knockout switch with input and output buffers **COM** p149
Detection of coherent radar signals with unknown Doppler shift **RSN** p79
Determination of formative time of electrical breakdown in nitrogen-filled tube **SMT** p413
Digital transmission using multimode phase-continuous chirp signals **COM** p87
Discrete-time analysis of the leaky bucket scheme with threshold-based token generation intervals **COM** p105
Dynamic control of time slot assignment in multiaccess reservation protocols **COM** p167
Efficient algorithm to optimise the energy generation by pumped storage units in probabilistic production costing **GTD** p546
Fast algorithm for pseudodiscrete Wigner-Ville distribution using moving discrete Hartley transform **VIS** p383
Fractional lower-order statistics-based ambiguity functions for differential delay Doppler estimation **RSN** p358
Generation availability assessment of wind farms **GTD** p507
Hybrid clutter-map/L-CFAR procedure for clutter rejection in nonhomogeneous environment **RSN** p239
Identification of MA processes using cumulants: several sets of linear equations **VIS** p87
Improvement factor for real sea-clutter Doppler frequency spectra **RSN** p341
Improving the traceability of coaxial impedance measurements at lower RF in the UK **SMT** p241
Iterative interference cancellation for FFH/MFSK MA systems **COM** p380
Joint motion/disparity MAP estimation for stereo image sequences **VIS** p101
Lateral inhibition net and weighted matching algorithms for speech recognition in noise **VIS** p324
Monopulse detection analysis of the trimmed mean CFAR processor in nonhomogeneous situations **RSN** p87
New reduced load heuristic for computing blocking in large multirate loss networks **COM** p206
Noise analysis of time-averaging interpolation in D/A conversion **CDS** p143
Nonlinear autoregressive integrated neural network model for short-term load forecasting **GTD** p500
Optically preamplified pulse-position modulation for fibre-optic communication systems **OPT** p153
Optimal blocked random access algorithm for CDMA-random access systems **COM** p396
Optimum CFAR detection against compound Gaussian clutter with partially correlated texture **RSN** p95
Performance analysis of an output queueing ATM switch with heterogeneous traffic and multiple QoS **COM** p356
Performance analysis of nonpersistent idle-signal casting multiple access with collision-detection (ICMA/CD) protocol **COM** p162
Performance analysis of optical receivers with space diversity reception **COM** p369
Performance and statistical analysis of two-layer MPEG coding algorithms for ATM networks **COM** p155
Performance, interarrival, and correlation analysis of four-phase MMPP model in ATM-based B-ISDN **COM** p363
Performance of excision GO-CFAR detectors in nonhomogeneous environments **RSN** p105
Performance of multiple pulse position modulation on multipath channels **OPT** p360
Procedure for automatic recognition of analogue and digital modulations **COM** p259
Queueing system with queue length dependent service times and its application to cell discarding scheme in ATM networks **COM** p5
Reduced-state trellis and its decoding for full-response CPM **COM** p68
Region-based image coding using polynomial intensity functions **VIS** p15
Response health constraints in economic load dispatch considering standby units, interruptible loads and postponable outages **GTD** p599
Robust speed-controlled induction-motor drive using EKF and RLS estimators **EPA** p186
Screening of variables for the empirical modelling of semiconductor devices **SMT** p319
Serving system with the correlated component of overflow traffic having changed serving intensity **COM** p1
Simple model for post-fault motor behaviour for reliability/power quality assessment of industrial power systems **GTD** p56
Simultaneous mean and texture edge detection in SAR clutter **RSN** p391
Sojourn time analysis of prioritised DQDB (IEEE802.6) MAN with bursty traffic input **COM** p112
Source combined linear predictive analysis in pulse-based speech coders **VIS** p143
Source modelling, queueing analysis, and bandwidth allocation for VBR MPEG-2 video traffic in ATM networks **COM** p197
Spinning reserve allocation using response health analysis **GTD** p337
Statistical multiplexing of random processes in packet switching networks **COM** p325
Stochastic evaluation of turbine-generator shaft torsional torques during faulty synchronisation **GTD** p487
Synchronised call handoff performance model **COM** p56
Use of second order Markov chains to model digital symbol synchroniser performance **COM** p250
Utilisation of the MV spectrum for diagnosis and estimation of harmonic fields **VIS** p273
Variable statistical wordlength in digital filters **VIS** p62

PRODUCTION ENGINEERING

Adequacy and reliability cost/worth implications of nonutility generation **GTD** p115
Analysis of shielded-room error for screened rooms and its application to low-frequency emission measurements from electrically small sources **SMT** p209
Application of ultrasound to the inspection of insulation **SMT** p177
Applications of customer outage costs in system planning, design and operation **GTD** p305
Assessment of customer outage costs due to electric service interruptions: residential sector **GTD** p163
Automatic test generation algorithms for analogue circuits **CDS** p366
Automatic visual inspection based upon a variant of the n-tuple technique **VIS** p301
Check! a generic and specific industrial inspection tool **VIS** p241
Compact antenna range performance evaluation using simulated pattern measurements **MAP** p200
Control and integration techniques in a fully automated manufacturing cell for carbon composites **CTA** p159
Cost/benefit analysis of the P1149.4 mixed-signal test bus **CDS** p393
Design-for-test (DfT) study on a current mode DAC **CDS** p374
Determination of safe working 50 Hz AC electrical stresses for ceramics at high temperatures **SMT** p406
Effect of cross-polar coupling on open area test site measurement correlation and repeatability **SMT** p202
Effect of rotational load shedding on overall power system adequacy indices **GTD** p181
Enhanced adequacy equivalent for composite power system reliability evaluation **GTD** p420
Error specification, monitoring and recovery in computer-integrated manufacturing: an analytic approach **CTA** p499
European intercomparison of antenna factors in the frequency range 30 MHz to 1 GHz **SMT** p229
Evaluation of reliability worth and value of lost load **GTD** p171
Experimental optimisation of flexible measurement systems **SMT** p77
Factors affecting customer outage costs due to electric service interruptions **GTD** p521
Fault-tolerant permanent magnet machine drives **EPA** p437
Fuzzy neural networks and application to the FBC process **CTA** p259
Generation availability assessment of wind farms **GTD** p507
Impacts of demand-side management on reliability cost/reliability worth analysis **GTD** p225
Mixed signal test–techniques, applications and demands **CDS** p358
NAMAS-accredited microwave permittivity/permeability measurement system **SMT** p247
Nonlinear and direction-dependent dynamic process modelling using neural networks **CTA** p44
Nonstuck behaviour of open circuit supply faults in CMOS logic circuits **CDS** p9
Process performance monitoring using multivariate statistical process control **CTA** p132
Recent progress in silica-based planar lightwave circuits on silicon **OPT** p257
Simple model for post-fault motor behaviour for reliability/power quality assessment of industrial power systems **GTD** p56
Spinning reserve allocation using response health analysis **GTD** p337
Supply current test of analogue and mixed signal circuits **CDS** p399
Testable on-the-fly carry-save multiplier by alternating input data **CDT** p345
Towards a new partial discharge calibration strategy based on the transfer function of machine stator windings **SMT** p57
Use of quiet zone prediction in the design of compact antenna test ranges **MAP** p193
Weld bead placement system for multipass welding [using transputer-based laser triangulation vision system] **SMT** p85

PROGRAMMING THEORY

Adaptive scheduling algorithm based on mixed graph model **CTA** p9
Application of aggregation strategies in the solution of the optimal routing problem in data networks **CDT** p120
Backpropagation without multiplier for multilayer neural networks **CDS** p229
Cellular automata based scheme for solution of Boolean equations **CDT** p174
Dynamic evaluation strategy for fine-grain data-parallel computing **CDT** p181
Functional testing of pipelined processors **CDT** p318
Gaussian-elimination-based algorithm for solving linear equations on mesh-connected processors **CDT** p407
Graph-theoretic algorithm for finding maximal supergates in combinational logic circuits **CDS** p313
Intelligent controller design for the ship steering problem **CTA** p17
Optimum partitioning of rectilinear layouts **CDT** p440
Parallel event-driven logic simulation algorithms: tutorial and comparative evaluation **CDS** p177
Piecewise estimation of the performability of computer systems **CDT** p129

RADAR AND RADIONAVIGATION

Automated propagation advice for OTHR ship detection **RSN** p53
Bifurcated waveguide fed broadwall slots radiating through a baffle **MAP** p465
Cell-averaging CFAR gain in spatially correlated K-distributed clutter **RSN** p321
Characterisation of near-field focusing with application to low altitude beam focusing of the Arecibo tri-reflector system **MAP** p284
Design and demonstration of a real time processor for one-bit coded SAR signals **RSN** p261
Detection of coherent radar signals with unknown Doppler shift **RSN** p79
Distributed sequential nearest neighbour multitarget tracking algorithm **RSN** p255
Evaluation of multiple target track initiation techniques in real radar tracking environments **RSN** p246
Ground clutter model for airborne MPRF radars in look-down search mode **RSN** p113
HF skywave radar: estimating aircraft heights using super-resolution in range **RSN** p281
High resolution processing of hybrid strip-map/spotlight mode SAR **RSN** p366
Improvement factor for real sea-clutter Doppler frequency spectra **RSN** p341
Monopulse detection analysis of the trimmed mean CFAR processor in nonhomogeneous situations **RSN** p87
Monopulse estimation with subarray-adaptive arrays and arbitrary sum and difference beams **RSN** p232
Multifrequency SAR observation of a ship wake **RSN** p275
MVDR vectorial lattice applied to space-time processing for AEW radar with large instantaneous bandwidth **RSN** p41
Optimum CFAR detection against compound Gaussian clutter with partially correlated texture **RSN** p95
Performance of excision GO-CFAR detectors in nonhomogeneous environments **RSN** p105
Performance of neural data associator **RSN** p71
QR versus IQR algorithms for adaptive signal processing: performance evaluation for radar applications **RSN** p328
Reconstruction of the spatial distribution of radar reflectivity of precipitation through linear-inversion techniques **RSN** p375
S-band digital downconverter for radar applications based on a GaAs MMIC fast sample-and-hold **CDS** p337
Wideband I/Q demodulators: measurement technique and matching characteristics **RSN** p300

RADAR CLUTTER

Accurate approximation to the optimum parameter estimate for K-distributed clutter **RSN** p383
Adaptive probabilistic data-association algorithm for tracking in cluttered environment **RSN** p17

Automated propagation advice for OTHR ship detection **RSN** p53
Cell-averaging CFAR gain in spatially correlated K-distributed clutter **RSN** p321
Detection of coherent radar signals with unknown Doppler shift **RSN** p79
Ground clutter model for airborne MPRF radars in look-down search mode **RSN** p113
Higher-dimension detection of targets from scanned radar **RSN** p313
Hybrid clutter-map/L-CFAR procedure for clutter rejection in nonhomogeneous environment **RSN** p239
Improvement factor for real sea-clutter Doppler frequency spectra **RSN** p341
Monopulse detection analysis of the trimmed mean CFAR processor in nonhomogeneous situations **RSN** p87
Multifrequency SAR observation of a ship wake **RSN** p275
MVDR vectorial lattice applied to space-time processing for AEW radar with large instantaneous bandwidth **RSN** p41
Optimum CFAR detection against compound Gaussian clutter with partially correlated texture **RSN** p95
Performance of excision GO-CFAR detectors in nonhomogeneous environments **RSN** p105
Simultaneous mean and texture edge detection in SAR clutter **RSN** p391

RADAR THEORY

Accurate approximation to the optimum parameter estimate for K-distributed clutter **RSN** p383
Adaptive probabilistic data-association algorithm for tracking in cluttered environment **RSN** p17
Application of parametric models to inverse scattering problems **MAP** p31
Cell-averaging CFAR gain in spatially correlated K-distributed clutter **RSN** p321
Detection of coherent radar signals with unknown Doppler shift **RSN** p79
Dual space optimisation method for extracting the natural frequencies of a radar target **RSN** p286
Evaluation of multiple target track initiation techniques in real radar tracking environments **RSN** p246
Fractional lower-order statistics-based ambiguity functions for differential delay Doppler estimation **RSN** p358
Ground clutter model for airborne MPRF radars in look-down search mode **RSN** p113
High resolution processing of hybrid strip-map/spotlight mode SAR **RSN** p366
Higher-dimension detection of targets from scanned radar **RSN** p313
Hybrid clutter-map/L-CFAR procedure for clutter rejection in nonhomogeneous environment **RSN** p239
Improvement factor for real sea-clutter Doppler frequency spectra **RSN** p341
Mean-level detection in the frequency domain **RSN** p307
Monopulse detection analysis of the trimmed mean CFAR processor in nonhomogeneous situations **RSN** p87
Monopulse estimation with subarray-adaptive arrays and arbitrary sum and difference beams **RSN** p232
Multifrequency SAR observation of a ship wake **RSN** p275
MVDR vectorial lattice applied to space-time processing for AEW radar with large instantaneous bandwidth **RSN** p41
Optimised design of Jaumann radar absorbing materials using a genetic algorithm **RSN** p23
Optimum CFAR detection against compound Gaussian clutter with partially correlated texture **RSN** p95
Optimum edge detection in SAR **RSN** p31
Outlier removal and discontinuity preserving smoothing of range data **VIS** p191
Performance of excision GO-CFAR detectors in nonhomogeneous environments **RSN** p105
QR versus IQR algorithms for adaptive signal processing: performance evaluation for radar applications **RSN** p328
Reconstruction of the spatial distribution of radar reflectivity of precipitation through linear-inversion techniques **RSN** p375
Simultaneous mean and texture edge detection in SAR clutter **RSN** p391
Synthetic aperture radar imaging from phase-corrupted data **RSN** p268

RADIO DIRECTION-FINDING

Simulations of the positioning accuracy of integrated vehicular navigation systems **RSN** p121

RADIO SYSTEMS

Adaptive differential detection for M-ary DPSK **COM** p21
Adaptive phase diversity for MDPSK reception **COM** p267
Analysis of bandwidth allocation schemes for transmission of VBR video traffic on a FODA satellite network **COM** p12
Analysis of mobile radio channel sounding measurements in inner city Dublin at 1.808 GHz **COM** p311
Call blocking performance for dynamic channel allocation technique in future mobile satellite systems **COM** p289
Cellular CDMA overlay systems **COM** p389
Closed-loop power control in CDMA systems **COM** p231
Comparison of computational electromagnetic codes applied to a sphere canonical problem **MAP** p309
D-fibre antenna for microcellular mobile communication systems **OPT** p370
Destructive collision-free protocol for distributed DS/CDMA wireless networks using code-sensing and chip-rate-division techniques **COM** p47
Digital transmission using multimode phase-continuous chirp signals **COM** p87
Discrete-time model for digital communications over a frequency-selective Rician fading WSSUS channel **COM** p37
Dynamic control of time slot assignment in multiaccess reservation protocols **COM** p167
Electronically steered antenna system for the Australian Mobilesat **MAP** p347
Estimated bit error probability of DS-SSMA/MDPSK with differential phase detector on satelliite mobile channel **COM** p297
Fade slope on 10 to 30 GHz Earth-space communication links—measurements and modelling **MAP** p353
Fast adaptive polynomial I and Q predistorter with global optimisation **COM** p78
Hybrid-ARQ system for HF channels based on codeword partitioning **COM** p73
Increasing the capacity of GSM cellular radio using adaptive antennas **COM** p304
Investigations on the prediction of radiowave propagation in urban microcell environments using ray-tracing methods **MAP** p36
Iterative interference cancellation for FFH/MFSK MA systems **COM** p380
Multiprocessor system for interconnection of Ethernet and FDDI networks using ATM via satellite **CDT** p69
Noncoherent detection with Viterbi decoding for GMSK signals **COM** p373
Obstacle diffraction and site shielding under varying incident illumination **MAP** p87
Optimum time diversity for channels subject to pulse-burst interference **COM** p43
Performance analysis of nonpersistent idle-signal casting multiple access with collision-detection (ICMA/CD) protocol **COM** p162
Ring-TCM for fixed and fading channels: land-mobile satellite fading channels with QAM **COM** p281
Short-term frequency scaling of clear-sky and wet amplitude scintillation **MAP** p521
Simulations of the positioning accuracy of integrated vehicular navigation systems **RSN** p121
Slot-coupled self-diplexing array antenna for mobile satellite communications **MAP** p119
Synchronised call handoff performance model **COM** p56
Type-1 hybrid ARQ scheme with time diversity for binary digital FM cellular radio **COM** p29

RADIOWAVE PROPAGATION

Analysis of mobile radio channel sounding measurements in inner city Dublin at 1.808 GHz **COM** p311
Attenuation due to hydrometeors at 94 GHz: experimental results and comparison with theory **MAP** p79
Automated propagation advice for OTHR ship detection **RSN** p53
Diffraction over an infinitely wide plateau **MAP** p94
Fade slope on 10 to 30 GHz Earth-space communication links—measurements and modelling **MAP** p353
Improved prediction of I_{F2} and I_G indices using neural networks **MAP** p341
Investigations on the prediction of radiowave propagation in urban microcell environments using ray-tracing methods **MAP** p36
ITU model for multi-knife-edge diffraction **MAP** p539
Multifrequency SAR observation of a ship wake **RSN** p275
Obstacle diffraction and site shielding under varying incident illumination **MAP** p87
Quasicubic-segmented ionospheric model **MAP** p323
Reconstruction of the spatial distribution of radar reflectivity of precipitation through linear-inversion techniques **RSN** p375
Short-term frequency scaling of clear-sky and wet amplitude scintillation **MAP** p521

SELF-ADJUSTING SYSTEMS

Adaptive power system stabiliser based on pole-shifting technique **GTD** p96
Artificial neural-network-based protection scheme for controllable series-compensated EHV transmission lines **GTD** p535
Closed-loop power control in CDMA systems **COM** p231
Control of rigid robot manipulators via combination of adaptive sliding mode control and compensated inverse dynamics approach **CTA** p283
Discrete integral variable structure model following control for induction motor drivers **EPA** p467
Dynamic performance limitations for MRAS based sensorless induction motor drives. I. Stability analysis for the closed loop drive **EPA** p113
Neuro-adaptive hybrid controller for robot-manipulator tracking control **CTA** p270
Robust adaptive force/motion control of constrained robots **CTA** p103
Robust indirect adaptive control of the electrohydraulic velocity control systems **CTA** p448
Self-tuning control applied to turbogenerator AVRs **GTD** p492

SEMICONDUCTOR DEVICE MODELLING

6H silicon carbide MOSFET modelling for high temperature analogue integrated circuits (25-500°C) **CDS** p115
Current analysis of polyimide passivated InGaP/GaAs HBT **CDS** p307
Fabrication and spectral response analysis of AlGaAs/GaAs and InP/InGaAs HPTs with transparent ITO emitter contacts **OPT** p89
Field-enhanced nonequilibrium C/V and I/V characteristics of MOS capacitor under linear voltage ramp bias **CDS** p343
Frequency conversion in travelling wave semiconductor laser amplifiers with bulk and quantum well structures **OPT** p119
Influence of transverse modes on the dynamic response of vertical cavity surface emitting lasers **OPT** p189
Large-signal optically controlled HEMT model and oscillator design **MAP** p487
Mask-programmable multiple-valued logic gate using resonant tunnelling diodes **CDS** p289
Modelling of the quasisaturation behaviour in the high-voltage MOSFET with vertical trench gate **CDS** p28
Parasitic series resistance-independent method for device-model parameter extraction **CDS** p68
Power amplifier performance and modelling of one-emitter-finger GaAlAs/GaAs heterojunction bipolar transistor **CDS** p352
Screening of variables for the empirical modelling of semiconductor devices **SMT** p319
Semi-empirical model of electron mobility in MOSFETS in strong inversion regime **CDS** p202
Signal-noise neural network model for active microwave devices **CDS** p1
SPICE modelling of impact ionisation effects in silicon bipolar transistors **CDS** p33

SEMICONDUCTOR DEVICES AND MATERIALS

Current analysis of polyimide passivated InGaP/GaAs HBT **CDS** p307
Degradation of ZnO based surge arresters under field conditions **SMT** p291
Electromagnetic modelling and transient simulation of interconnects in high speed VLSI circuits **MAP** p373
Fabrication and characterisation of transparent-gate field effect transistors using indium tin oxide **OPT** p7
Fabrication of high-performance extended-cavity double-quantum-well lasers with integrated passive sections **OPT** p94
Field-enhanced nonequilibrium C/V and I/V characteristics of MOS capacitor under linear voltage ramp bias **CDS** p343
Fully passivated W-band InAlAs/InGaAs/InP monolithic low noise amplifiers **MAP** p361
Hybrid integration onto silicon motherboards with planar silica waveguides **OPT** p316
IGBT based zero voltage transition full bridge PWM converter for high power applications **EPA** p475
Intensity modulated photoeffects in InP-MIS capacitors **OPT** p248
Mask-programmable multiple-valued logic gate using resonant tunnelling diodes **CDS** p289
Millimetre-wave frequency tripling using stacked heterostructure-barrier varactors on InP **MAP** p272

Optical modulation with a resonant tunnelling diode **OPT** p12
Parasitic series resistance-independent method for device-model parameter extraction **CDS** p68
Power amplifier performance and modelling of one-emitter-finger GaAlAs/GaAs heterojunction bipolar transistor **CDS** p352
Screening of variables for the empirical modelling of semiconductor devices **SMT** p319
Silica-based optical integrated circuits **OPT** p263
Silicon-based fabrication process for production of optical waveguides **OPT** p37
SPICE modelling of impact ionisation effects in silicon bipolar transistors **CDS** p33
Static, pulsed and frequency-dependent current/voltage characteristics of GaAs FETs **CDS** p129
Unequal space charge region widths and deviation of avalanche region centre in symmetrical pulsed double-drift IMPATT diode **CDS** p348

SEMICONDUCTOR LASERS

8-band k.p theory of the material gain of strained tetrahedral semiconductors: application to 1.3 μm-InGaAsP lasers subject to additional external uniaxial stress **OPT** p62
Analysis of dynamics of monolithic passively mode-locked laser diodes under external periodic excitation **OPT** p81
Antireflection-coated angled facet design **OPT** p214
Arrayed-waveguide grating lasers and their applications to tuning-free wavelength routing **OPT** p322
Cascading gain-saturation semiconductor laser-amplifier wavelength translators **OPT** p1
Estimation of in-plane superluminescence in vertical-cavity surface-emitting lasers **OPT** p67
Estimation of maximal modulation bandwidth and group velocity dispersion in strained InGaAs quantum-well lasers **OPT** p57
Fabrication and characteristics of tapered waveguide semiconductor Raman lasers **OPT** p113
Fabrication of high-performance extended-cavity double-quantum-well lasers with integrated passive sections **OPT** p94
Frequency conversion in travelling wave semiconductor laser amplifiers with bulk and quantum well structures **OPT** p119
High number of wavelength channels demonstrated by a widely tunable sampled-grating DBR laser **OPT** p77
High temperature gain measurements in optically pumped ZnCdSe-ZnSe quantum wells **OPT** p110
Improved resonance and chirp mechanisms for multigigabit/s push-pull modulated DFB lasers **OPT** p49
Influence of transverse modes on the dynamic response of vertical cavity surface emitting lasers **OPT** p189
Longitudinal mode control in 1.3 μm Fabry-Perot lasers by mode suppression **OPT** p71
Modelling spatio-temporal dynamics of gain-guided multistripe and broad-area lasers **OPT** p17
Rigorous electromagnetic study of diffraction loss in VCSEL mirrors **OPT** p221
Semiconductor optical amplifiers in WDM star networks **OPT** p144
Theoretical investigations of electro-optical synchronisation of self-pulsating laser diodes **OPT** p31
Three-section sampled-grating DBR lasers: modelling and measurements **OPT** p24
THz frequency conversion in injection locked semiconductor laser oscillators **OPT** p41
Unmodulated external-cavity diode laser stabilised on caesium D_2 line **SMT** p263
VCSEL-polarisation control with polarised feedback **OPT** p104
Vertical integration of an InGaAs/InP HBT and a 1.55 μm strained MQW p-substrate laser **OPT** p107

SIGNAL DETECTION

Colour image detection and matching using modified generalised Hough transform **VIS** p201
Computer-aided design of a new nonunit protection scheme for EHV teed circuits **GTD** p142
Detection of the number of signals in noise with banded covariance matrices **RSN** p289
Estimated bit error probability of DS-SSMA/MDPSK with differential phase detector on satellite mobile channel **COM** p297
Manifold of a planar array and its effects on the accuracy of direction-finding systems **RSN** p349
Noncoherent detection with Viterbi decoding for GMSK signals **COM** p373

SIGNAL GENERATORS

Capacitively coupled oscillator array behaviour **CDS** p167
Large-signal optically controlled HEMT model and oscillator design **MAP** p487
Performance of phase-locked loop frequency synthesiser using accumulative phase detector **CDS** p249
Suppression of image frequency mode in microprocessor-controlled frequency synthesising systems **CDS** p171
Synthesis of canonic single-resistance-controlled-oscillators using a single current-feedback-amplifier **CDS** p71
Whispering gallery dielectric resonator mode GaAs FET oscillator **MAP** p441

SIGNAL PROCESSING

3-dimensional systolic architecture for parallel VLSI implementation of the discrete cosine transform **CDS** p255
Accuracy of an interferometer in noise **RSN** p217
Acoustic correlation sonar for vertical profiling of ocean currents to a range of 1 km **RSN** p177
Adaptive differential detection for M-ary DPSK **COM** p21
Adaptive probabilistic data-association algorithm for tracking in cluttered environment **RSN** p17
Ambiguity function and Cramer-Rao bound in the multisignal case **RSN** p227
Application of ultrasound to the inspection of insulation **SMT** p177
Balanced realisations and model reduction of periodically time-varying state-space digital filters **VIS** p370
Bayesian decision feedback equaliser for overcoming co-channel interference **COM** p219
Cell-averaging CFAR gain in spatially correlated K-distributed clutter **RSN** p321
Computer-aided design of a new nonunit protection scheme for EHV teed circuits **GTD** p142
Convergence and steady-state properties of the least-mean mixed-norm (LMMN) adaptive algorithm **VIS** p137
Cost-effective novel flexible cell-level systolic architecture for high throughput implementation of 2-D FIR filters **CDT** p436
Design and demonstration of a real time processor for one-bit coded SAR signals **RSN** p261
Design and implementation of a GaAs systolic floating-point processing element **CDT** p325
Design of digital filters for precision quadrature demodulation **VIS** p73
Design of linear phase Nyquist filters **CDS** p139
Design of nonseparable 3-D filter banks/wavelet bases using transformations of variables **VIS** p51
Design of two-channel nonuniform-division maximally decimated filter banks using L_1 error criteria **VIS** p79
Detection of coherent radar signals with unknown Doppler shift **RSN** p79
Detection of the number of signals in noise with banded covariance matrices **RSN** p289
Digital transmission using multimode phase-continuous chirp signals **COM** p87
Distributed sequential nearest neighbour multitarget tracking algorithm **RSN** p255
Dual space optimisation method for extracting the natural frequencies of a radar target **RSN** p286
Enhanced forward/backward spatial filtering method for DOA estimation of narrowband coherent sources **RSN** p10
Estimated bit error probability of DS-SSMA/MDPSK with differential phase detector on satellite mobile channel **COM** p297
Estimation of the directions of arrival of spatially dispersed signals in array processing **RSN** p1
Evaluation of multiple target track initiation techniques in real radar tracking environments **RSN** p246
Exact determination of the natural modes of some Cauer filters by means of a standard analytical procedure **CDS** p134
Fast adaptive polynomial I and Q predistorter with global optimisation **COM** p78
Fast algorithm and its systolic realisation for distance transformation **CDT** p168
Fast algorithm for pseudodiscrete Wigner-Ville distribution using moving discrete Hartley transform **VIS** p383
Fault-tolerant QRD recursive least squares **CDT** p137
Feature-mapping data fusion **RSN** p65
Fractional lower-order statistics-based ambiguity functions for differential delay Doppler estimation **RSN** p358
Higher-dimension detection of targets from scanned radar **RSN** p313
Identification of MA processes using cumulants: several sets of linear equations **VIS** p87
Improvement factor for real sea-clutter Doppler frequency spectra **RSN** p341
Increasing the capacity of GSM cellular radio using adaptive antennas **COM** p304
Line monitoring and fault location using spread spectrum on power line carrier **GTD** p427
Manifold of a planar array and its effects on the accuracy of direction-finding systems **RSN** p349
Mean-level detection in the frequency domain **RSN** p307
Minimax design of recursive digital filters with a lattice denominator **VIS** p377
Modified Harn signature scheme based on factorising and discrete logarithms **CDT** p196
Monopulse detection analysis of the trimmed mean CFAR processor in nonhomogeneous situations **RSN** p87
Monopulse estimation with subarray-adaptive arrays and arbitrary sum and difference beams **RSN** p232
New method of power swing blocking for digital distance protection **GTD** p19
Noise analysis of time-averaging interpolation in D/A conversion **CDS** p143
Noncoherent detection with Viterbi decoding for GMSK signals **COM** p373
Nonlinear dynamics in telecommunication systems: complex behaviour in nonlinear processing systems **COM** p347
Optimal filtering and robust fault diagnosis of stochastic systems with unknown disturbances **CTA** p31
Optimum CFAR detection against compound Gaussian clutter with partially correlated texture **RSN** p95
Performance of excision GO-CFAR detectors in nonhomogeneous environments **RSN** p105
Performance of neural data associator **RSN** p71
Procedure for automatic recognition of analogue and digital modulations **COM** p259
QR versus IQR algorithms for adaptive signal processing: performance evaluation for radar applications **RSN** p328
Reconstruction of the spatial distribution of radar reflectivity of precipitation through linear-inversion techniques **RSN** p375
Regular implementation algorithms of time domain aliasing cancellation **VIS** p387
Robust speed-controlled induction-motor drive using EKF and RLS estimators **EPA** p186
Signal and reverberation prediction for active sonar by adding acoustic components **RSN** p190
Simulations of the positioning accuracy of integrated vehicular navigation systems **RSN** p121
Suppression of multiple access interference in a DS-CDMA system using Wiener filtering and parallel cancellation **COM** p226
Systolic digit-serial multiplier **CDS** p14
Towed-array beamforming during ship's manoeuvring **RSN** p210
Two-dimensional spatial-spectrum estimation of coherent signals without spatial smoothing and eigendecomposition **RSN** p295
Unitary Hessenberg and state-space model based methods for the harmonic retrieval problem **RSN** p346
Utilisation of the MV spectrum for diagnosis and estimation of harmonic fields **VIS** p273
Variable statistical wordlength in digital filters **VIS** p62
Walsh-like functions and their relations **VIS** p279
Weld bead placement system for multipass welding [using transputer-based laser triangulation vision system] **SMT** p85
Wideband I/Q demodulators: measurement technique and matching characteristics **RSN** p300

SIMULATION, MODELLING AND IDENTIFICATION

Accurate approximation to the optimum parameter estimate for K-distributed clutter **RSN** p383
Analysis of stabilised output error methods **CTA** p209
Application of a full-order extended Luenberger observer for a position sensorless operation of a switched reluctance motor drive **CTA** p401
Bayesian channel equalisation and robust features for speech recognition **VIS** p223
Building and training radiographic models for flexible object identification from incomplete data **VIS** p257
Current sensorless field-oriented control of induction motors **EPA** p492

Digital redesign of cascaded analogue controllers for sampled-data interval systems **CTA** p489
Dynamic performance limitations for MRAS based sensorless induction motor drives. I. Stability analysis for the closed loop drive **EPA** p113
Expert robust decentralised controller for uncertain large-scale systems **CTA** p519
Identification of discrete Volterra series using maximum length sequences **CDS** p241
Identification of linear systems in the presence of piecewise polynomial disturbances **CTA** p305
Identification of MA processes using cumulants: several sets of linear equations **VIS** p87
Improved TLM link model for reactive circuit components **SMT** p341
Integrated process improvement in design and manufacture using a systems approach **CTA** p171
Loop transfer recovery for systems under sampled measurements **CTA** p333
Manifold of a planar array and its effects on the accuracy of direction-finding systems **RSN** p349
Model reduction with time delay combining the least-squares method with the genetic algorithm **CTA** p247
Modelling and controlling one-degree-of-freedom impacts **CTA** p85
Neural network architectures for parameter estimation of dynamical systems **CTA** p387
Nonlinear and direction-dependent dynamic process modelling using neural networks **CTA** p44
Optimal filtering and robust fault diagnosis of stochastic systems with unknown disturbances **CTA** p31
Parameterisation of observers for time delay systems and its application in observer design **CTA** p225
Reliable online adaptation of models with variable time delays **CTA** p417
Robust speed-controlled induction-motor drive using EKF and RLS estimators **EPA** p186
Temporal multiresolution analysis for a quantitative/qualitative interpretation of complex dynamic processes **CTA** p191
Topology processing and static state estimation using artificial neural networks **GTD** p99
Two-dimensional spatial-spectrum estimation of coherent signals without spatial smoothing and eigendecomposition **RSN** p295
Use of multilayer feedforward neural networks in identification and control of Wiener model **CTA** p255
Utilisation of the MV spectrum for diagnosis and estimation of harmonic fields **VIS** p273
Walsh-like functions and their relations **VIS** p279

SINGLE ANTENNAS

Analysis of post-tuned cavity-backed circular microstrip patch antennas **MAP** p18
Analysis of quasiperiodic reflector antenna **MAP** p293
Analysis of surface-wave excitation and radiation mechanisms of a monopole on a circular grounded dielectric slab with critical thickness **MAP** p335
Asymmetrical Gauss-Hermite beam mode analysis of corrugated pyramidal rectangular horn **MAP** p385
Characterisation of near-field focusing with application to low altitude beam focusing of the Arecibo tri-reflector system **MAP** p284
Compact antenna range performance evaluation using simulated pattern measurements **MAP** p200
Electric field integral equation for cylindrical structures **MAP** p147
Entire-domain analysis of thin-wire antennas in layered media **MAP** p317
Fabry-Perot approach to the design of double layer FSS **MAP** p157
Improvements of dipole, helix, spiral, microstrip patch and aperture antennas with ground planes by using corrugated soft surfaces **MAP** p244
Low measurement uncertainties in the frequency range 30 MHz to 1 GHz using a calculable standard dipole antenna and national reference ground plane **SMT** p221
Method of residuals applied to wire antenna calculations **SMT** p309
Radiation by axial slots on a dielectric-coated nonconfocal conducting elliptic cylinder **MAP** p124
Radiation characteristics of a spherical helical antenna **MAP** p7
Radiation characteristics of rectangular patch antennas with a laminated ground plane **MAP** p107
Short-term frequency scaling of clear-sky and wet amplitude scintillation **MAP** p521
Simulated annealing applied to the Misell algorithm for phase retrieval **MAP** p298
Synthesis technique for scanning and/or reconfigurable beam reflector antennas with phase-only control **MAP** p402
Theoretical and experimental characterisation of CPW-fed microstrip antennas **MAP** p13
Theoretical investigation of aperture-coupled rectangular dielectric resonator antenna **MAP** p113
Use of quiet zone prediction in the design of compact antenna test ranges **MAP** p193

SOLID LASERS

Co-doping effects in rare-earth-doped planar waveguides **OPT** p293
Silica-based sol-gel optical waveguides on silicon **OPT** p287

SONAR

Acoustic correlation sonar for vertical profiling of ocean currents to a range of 1 km **RSN** p177
Detection and tracking of returns in sector-scan sonar image sequences **RSN** p157
Efficient digital signal processing algorithm for sonar imaging **RSN** p149
Fractional lower-order statistics-based ambiguity functions for differential delay Doppler estimation **RSN** p358
Phased array acoustic imaging in ground co-ordinates, with extension to synthetic aperture processing **RSN** p131
Real-time synthetic aperture sonar processing system **RSN** p169
Review of interferometric optical fibre hydrophone technology **RSN** p204
Review of numerical methods for predicting sonar array performance **RSN** p196
Seabed classification through multifractal analysis of sidescan sonar imagery **RSN** p140
Side scan sonar using phased arrays for high resolution imaging and wide swath bathymetry **RSN** p163
Signal and reverberation prediction for active sonar by adding acoustic components **RSN** p190
Towed-array beamforming during ship's manoeuvring **RSN** p210

SONICS AND ULTRASONICS

Acoustic correlation sonar for vertical profiling of ocean currents to a range of 1 km **RSN** p177
Application of ultrasound to the inspection of insulation **SMT** p177
Rapid calculations of acoustic propagation loss in range dependent oceans **RSN** p184
Real-time synthetic aperture sonar processing system **RSN** p169
Review of interferometric optical fibre hydrophone technology **RSN** p204
Review of numerical methods for predicting sonar array performance **RSN** p196
Seabed classification through multifractal analysis of sidescan sonar imagery **RSN** p140
Side scan sonar using phased arrays for high resolution imaging and wide swath bathymetry **RSN** p163
Signal and reverberation prediction for active sonar by adding acoustic components **RSN** p190
Towed-array beamforming during ship's manoeuvring **RSN** p210
Ultrasonic pulse-phase method applied in fluid flow measurements **SMT** p327

SPEECH COMMUNICATION AND PROCESSING

Artificial neural networks for nonlinear time-domain filtering of speech **VIS** p149
Bayesian channel equalisation and robust features for speech recognition **VIS** p223
Bound for Minkowski metric or quadratic metric applied to VQ codeword search **VIS** p67
Lateral inhibition net and weighted matching algorithms for speech recognition in noise **VIS** p324
Source combined linear predictive analysis in pulse-based speech coders **VIS** p143

STABILITY

Adaptive power system stabiliser based on pole-shifting technique **GTD** p96
Alternative approach to aeroservoelastic design and clearance **CTA** p1
Analysis of stabilised output error methods **CTA** p209
Application of fuzzy logic stabilisers in a multimachine power system environment **GTD** p263
Application of Kharitonov's theorem to robustly increase the degree of Hurwitz polynomials **CTA** p57
Application of nonlinear control to switched reluctance motors: a feedback linearisation approach **EPA** p371
Application of the controllable series compensator in damping power system oscillations **GTD** p359
Artificial neural network power system stabiliser trained with an improved BP algorithm **GTD** p135
Comparison of modal controllability between FACTS-based stabilisers and PSS in increasing the oscillation stability of multimachine power systems **GTD** p575
Counter-example to a recent result on stabilisation of feedback control systems with infinite delays [and author's reply] **CTA** p110
Design of a wire-suspended mobile robot capable of avoiding path obstacles **CTA** p349
Design of nonlinear robust excitation control for multimachine power systems **GTD** p253
Dynamic performance limitations for MRAS based sensorless induction motor drives. I. Stability analysis for the closed loop drive **EPA** p113
Expert robust decentralised controller for uncertain large-scale systems **CTA** p519
Formula for the effect of a static VAr compensator on synchronising torque coefficient **GTD** p582
Graphical method of prediction of limit cycle for multivariable nonlinear systems **CTA** p423
Guaranteed rates of convergence of a class of PD controllers for trajectory tracking problems of robotic manipulators with dynamic uncertainties **CTA** p186
Guaranteeing feasibility in constrained stable generalised predictive control **CTA** p463
H_∞ robust digital vector control for the induction machine **CTA** p237
HVDC converter transformer core saturation instability: a frequency domain analysis **GTD** p75
Input filter stability of drives fed from voltage inverters controlled by direct flux and torque control methods **EPA** p396
Modelling and controlling one-degree-of-freedom impacts **CTA** p85
Neuro-adaptive hybrid controller for robot-manipulator tracking control **CTA** p270
New scheme of sliding-mode control for high performance induction motor drives **EPA** p177
New sufficient condition for robust root clustering of linear state space models with structured uncertainty **CTA** p244
Nonlinear dynamics in telecommunication systems: complex behaviour in nonlinear processing systems **COM** p347
Optimal and robust digital current controller synthesis for vector-controlled induction motor drive systems **EPA** p141
Optimal strictly positive real approximations for stable transfer functions **CTA** p537
Output tracking control of uncertain nonlinear systems with an input time delay **CTA** p309
Output tracking for linear uncertain time-delay systems **CTA** p481
Parametric uncertainty bounds for performance robustness of linear systems with output feedback **CTA** p509
PID tuning for integrating and unstable processes **CTA** p429
Quadratic guaranteed cost control with robust pole placement in a disk **CTA** p37
Robust adaptive force/motion control of constrained robots **CTA** p103
Robust control of manipulators using the computed torque plus H_∞ compensation method **CTA** p64
Robust decentralised load-frequency control of multi-area power systems **GTD** p377
Robust indirect adaptive control of the electrohydraulic velocity control systems **CTA** p448
Robust nonlinear controller for power system transient stability enhancement with voltage regulation **GTD** p407
Robust speed-controlled induction-motor drive using EKF and RLS estimators **EPA** p186
Robust stability for perturbed large-scale time-delay systems **CTA** p233
Sliding mode control using time-varying switching gain and boundary layer for electrohydraulic position and differential pressure control **CTA** p325
Stability of zeros of sampled system with fractional order hold **CTA** p296
Synchronous generator damping enhancement through coordinated control of exciter and SVC **GTD** p211
Theory of state covariance assignment for linear single-input systems **CTA** p289
Time-varying sliding modes for second-order systems **CTA** p455
Two-degree-of-freedom design method of LQI servo systems: use of frequency-dependent weighting matrices for sensitivity reduction **CTA** p557
Variable structure control of voltage sourced reversible rectifiers **EPA** p18

SUPERCONDUCTING MATERIALS AND DEVICES

Free space dyadic Green's function applied to the full-wave numerical analysis of planar transmission lines and dielectric waveguides **MAP** p328
Improved HTSC surface loss measurements evaluating a multipath transmission signal **MAP** p491
Modelling of thin-film HTS/ferroelectric interdigital capacitors **MAP** p397
Slotless-armature DC drives for surface warship propulsion **EPA** p443

SWITCHGEAR

Coaxial shunt intended for transient current measurement in a pseudospark switch **SMT** p119
Effect of PTFE dielectric properties on high voltage reactor load switching **SMT** p195
Interaction of helical arc devices with interconnected networks **GTD** p89
New tap changing scheme **EPA** p108
Rotating arc interrupter with independent field excitation **SMT** p113

SWITCHING SYSTEMS

Arrayed-waveguide grating lasers and their applications to tuning-free wavelength routing **OPT** p322
Design and performance evaluation of a distributed knockout switch with input and output buffers **COM** p149
Duobinary technique for dispersion reduction in high capacity optical systems–modelling, experiment and field trial **OPT** p228
Experimental validation of Volterra series nonlinear modelling for microwave subcarrier optical systems **OPT** p209
Guided-wave optics in silicon-on-insulator technology **OPT** p307
Hybrid wavelength hopping/time spreading code division multiple access systems **OPT** p161
Lossless packet switching with small buffers **COM** p335
Optical switching with gain in waveguide-modulator structures **OPT** p101
Performance of an optical backplane bus for switch interconnection **OPT** p237
Performance of fault tolerant ATM switches **COM** p317
Semiconductor optical amplifiers in WDM star networks **OPT** p144
Silica-based optical integrated circuits **OPT** p263
VCSEL-polarisation control with polarised feedback **OPT** p104

SWITCHING THEORY

All-fault-tolerant embedding of a complete binary tree in a group of Cayley graphs **CDT** p156
Alternative algorithm for optimisation of Reed-Muller universal logic module networks **CDT** p385
Area efficient systolic interconnection networks **CDT** p232
ATM switch capable of supporting unichannel and multichannel transmission **COM** p141
Cascading gain-saturation semiconductor laser-amplifier wavelength translators **OPT** p1
Design and performance evaluation of a distributed knockout switch with input and output buffers **COM** p149
Discrete-time analysis of the leaky bucket scheme with threshold-based token generation intervals **COM** p105
Duobinary technique for dispersion reduction in high capacity optical systems–modelling, experiment and field trial **OPT** p228
Experimental validation of Volterra series nonlinear modelling for microwave subcarrier optical systems **OPT** p209
Graph-theoretic algorithm for finding maximal supergates in combinational logic circuits **CDS** p313
GRMIN2: a heuristic simplification algorithm for generalised Reed-Muller expressions **CDT** p376
Hybrid wavelength hopping/time spreading code division multiple access systems **OPT** p161
Lossless packet switching with small buffers **COM** p335
Multiprocessor system for interconnection of Ethernet and FDDI networks using ATM via satellite **CDT** p69
New reduced load heuristic for computing blocking in large multirate loss networks **COM** p206
Nonlinear dynamics in telecommunication systems: complex behaviour in nonlinear processing systems **COM** p347
Orwell-D: medium access control for data, speech and two-layer video **COM** p189
Performance analysis of an output queueing ATM switch with heterogeneous traffic and multiple QoS **COM** p356
Performance and statistical analysis of two-layer MPEG coding algorithms for ATM networks **COM** p155
Performance, interarrival, and correlation analysis of four-phase MMPP model in ATM-based B-ISDN **COM** p363
Performance of an optical backplane bus for switch interconnection **OPT** p237
Performance of fault tolerant ATM switches **COM** p317
Preventive flow control method for packet video **COM** p98
Queueing system with queue length dependent service times and its application to cell discarding scheme in ATM networks **COM** p5
Review of interferometric optical fibre hydrophone technology **RSN** p204
Semiconductor optical amplifiers in WDM star networks **OPT** p144
Serving system with the correlated component of overflow traffic having changed serving intensity **COM** p1
Sojourn time analysis of prioritised DQDB (IEEE802.6) MAN with bursty traffic input **COM** p112
Source modelling, queueing analysis, and bandwidth allocation for VBR MPEG-2 video traffic in ATM networks **COM** p197
Statistical multiplexing of random processes in packet switching networks **COM** p325
Symbolic method for simplifying AND-EXOR representations of Boolean functions using a binary-decision technique and a genetic algorithm **CDT** p151
Three-valued quasi-linear transformation for logic synthesis **CDT** p391
Using symbolic Rademacher-Walsh spectral transforms to evaluate the agreement between Boolean functions **CDT** p64
XMESH interconnection network for massively parallel computers **CDT** p401

SYNCHRONOUS MACHINES

Analysis of single-step damping in a multistack variable reluctance stepping motor **EPA** p95
Application of a full-order extended Luenberger observer for a position sensorless operation of a switched reluctance motor drive **CTA** p401
Application of nonlinear control to switched reluctance motors: a feedback linearisation approach **EPA** p371
Characteristics of equivalent circuits of synchronous machines **EPA** p31
Computation of hysteresis motor performance including negative sequence excitation **EPA** p157
Damping the power-angle oscillations of a permanent-magnet synchronous generator with particular reference to wind turbine applications **EPA** p269
Formula for the effect of a static VAr compensator on synchronising torque coefficient **GTD** p582
Modelling and design of switched reluctance motors with two phases simultaneously excited **EPA** p361
Modular design of permanent-magnet generators for wind turbines **EPA** p388
Synchronous generator damping enhancement through coordinated control of exciter and SVC **GTD** p211
Torsional fatigue of turbine-generator shafts owing to network faults **GTD** p479

SYSTEMS THEORY

Adaptive scheduling algorithm based on mixed graph model **CTA** p9
Anytime heuristic schedule repair in manufacturing industry **CTA** p114
Backpropagation without multiplier for multilayer neural networks **CDS** p229
Integrated process improvement in design and manufacture using a systems approach **CTA** p171
Learning systems in intelligent control: an appraisal of fuzzy, neural and genetic algorithm control applications **CTA** p367
Real-time synchronisation of multiaxis high-speed machines, from SFC specification to Petri net verification **CTA** p164
Temporal multiresolution analysis for a quantitative/qualitative interpretation of complex dynamic processes **CTA** p191

TELECOMMUNICATION

Application of aggregation strategies in the solution of the optimal routing problem in data networks **CDT** p120
Artificial neural networks for nonlinear time-domain filtering of speech **VIS** p149
Call blocking performance for dynamic channel allocation technique in future mobile satellite systems **COM** p289
Comparison of computational electromagnetic codes applied to a sphere canonical problem **MAP** p309
Connection optimisation for two types of videoconference **COM** p133
Graph-theory-based protocol to provide centralised management of an extended LAN topology **COM** p182
Low bit-rate video coding with spatio-temporal geometric transforms **VIS** p164
Orwell-D: medium access control for data, speech and two-layer video **COM** p189
Performance and statistical analysis of two-layer MPEG coding algorithms for ATM networks **COM** p155
Ring-TCM for M-PSK modulation: AWGN channels and DSP implementation **COM** p273
Source modelling, queueing analysis, and bandwidth allocation for VBR MPEG-2 video traffic in ATM networks **COM** p197

TELEMETRY

Computational method for remote meter calibration in power systems **GTD** p393

TELEVISION

Check! a generic and specific industrial inspection tool **VIS** p241
Preventive flow control method for packet video **COM** p98
Source coding of wavelet-transformed digital HDTV for recording applications **VIS** p1
Temporal integration method for image-processing-based super-high-resolution image acquisition **VIS** p234

THIN FILM GROWTH

Fabrication and characterisation of transparent-gate field effect transistors using indium tin oxide **OPT** p7
Silica-based optical integrated circuits **OPT** p263

TIME-VARYING SYSTEMS

Neuro-adaptive hybrid controller for robot-manipulator tracking control **CTA** p270
Optimal filtering and robust fault diagnosis of stochastic systems with unknown disturbances **CTA** p31
Sliding mode control using time-varying switching gain and boundary layer for electrohydraulic position and differential pressure control **CTA** p325
Time-varying sliding modes for second-order systems **CTA** p455
Use of multilayer feedforward neural networks in identification and control of Wiener model **CTA** p255

TRANSFORMERS

Application of external compensation to current transformers **SMT** p147
Application of Gabor transform technique to supervise power system transient harmonics **GTD** p461
Characterisation of electric alloys for electric drives **SMT** p173
Compound matrix partitioning and modification for the solution of branched autotransformer traction feeds **EPA** p251
Computer-aided design of a new nonunit protection scheme for EHV teed circuits **GTD** p142
Development and hardware implementation of a compensating algorithm for the secondary current of current transformers **EPA** p41
HVDC converter transformer core saturation instability: a frequency domain analysis **GTD** p75
IGBT based zero voltage transition full bridge PWM converter for high power applications **EPA** p475
Intelligent control of large power transformer cooling pumps **GTD** p474
Models of grounded mid-tap open-wye and open-delta connected transformers for rigorous analysis of a distribution system **GTD** p82
New scaling concept in power system analysis **GTD** p399
New tap changing scheme **EPA** p108

Representation of hysteresis in three-phase transformer models for electromagnetic transients **EPA** p331
Solid-state on-load transformer tap changer **EPA** p481
Suppression of transmission system oscillations by thyristor-controlled series compensation **GTD** p7

TRANSMISSION LINE THEORY

Acousto-optic Bragg diffraction in SiGe/Si planar waveguides **OPT** p303
Analysis of a pair of dielectric coated cylinders above a dielectric substrate **MAP** p67
Analysis of interconnect networks with conducting wedge loaded by an inhomogeneous dielectric substrate **MAP** p217
Analysis of microwave resonators using transmission line modelling **SMT** p362
Analysis of multilayer inset dielectric guides containing magnetised ferrites **MAP** p390
Antireflection-coated angled facet design **OPT** p214
Application of a source method for modelling step discontinuities in microstrip circuit **MAP** p169
Approximate formula for cutoff wavenumber of lowest-order TM mode of a hollow metallic waveguide of arbitrary cross-section **MAP** p454
Comparative study of two integral-equation formulations for inductive irises in rectangular waveguides **MAP** p483
Complex gyrator circuit of a junction circulator using weakly magnetised planar irregular hexagonal resonator **MAP** p532
Coplanar waveguide bend with radial compensation **MAP** p447
Correction of the parameters of the equivalent circuit proposed by Montgomery for a two-terminal-pair junction **MAP** p542
Cross-coupling between open-ended coaxial radiators **MAP** p265
Design method for impedance matching networks **CDS** p186
Electromagnetic modelling and transient simulation of interconnects in high speed VLSI circuits **MAP** p373
Finite difference solution of EM fields by asymptotic waveform techniques **MAP** p512
Free space dyadic Green's function applied to the full-wave numerical analysis of planar transmission lines and dielectric waveguides **MAP** p328
Generalised impedance boundary method of moments for multilayer graded-index dielectric waveguide structures **OPT** p167
Hybrid FE/MoM analysis of a cavity-backed slit loaded with anisotropic material **MAP** p422
Improved HTSC surface loss measurements evaluating a multipath transmission signal **MAP** p491
Improved TLM link model for reactive circuit components **SMT** p341
Lossy chiral slabs in circular waveguides **MAP** p51
Method of lines for analysis of crossing transmission lines with finite-thickness conductors **MAP** p254
Mode charts for confocal annular elliptic resonators **MAP** p358
Modelling partial discharge excitation of UHF signals in waveguide structures using Green's functions **SMT** p63
Parameter-extraction-like approach to derivation of boundary integral equation for shielded transmission lines **MAP** p73
Power based considerations on the spectral domain analysis of leaky waves in covered strip-like transmission lines **MAP** p25
Quasistatic analysis of microstrip lines on lossy inhomogeneous substrates **MAP** p379
Response of underground multiconductor cable systems to external fields illumination **SMT** p137
Scattering from a dielectric cylinder with multiple eccentric cylindrical dielectric inclusions **MAP** p505
Scattering parameters of arbitrarily oriented slot-coupled microstrip lines **MAP** p141
Stabilised CPFDTD algorithm for the analysis of arbitrary 3D PEC structures **MAP** p367
TM-wave radiation from flanged parallel plate into dielectric slab **MAP** p207
Transmission line analysis of symmetrical ring resonators **MAP** p184
Use of transmission-line modelling in BEM for solution of piece-homogeneous static field problems **SMT** p157
Variational expression for propagation coefficient of an electromagnetic wave propagating along a closed rectangular chirowaveguide **MAP** p174
Wide-angle full vectorial beam propagation method **OPT** p139

USER INTERFACES

Telerobot control and real-time simulation environment using parallel processing **CTA** p543

WAVEGUIDE COMPONENTS

Analysis of microwave resonators using transmission line modelling **SMT** p362
Application of a source method for modelling step discontinuities in microstrip circuit **MAP** p169
Comparative study of two integral-equation formulations for inductive irises in rectangular waveguides **MAP** p483
Complex gyrator circuit of a junction circulator using weakly magnetised planar irregular hexagonal resonator **MAP** p532
Electronically steered antenna system for the Australian Mobilesat **MAP** p347
Improved approximation for effective permeability in microwave ferrites **MAP** p444
Millimetre-wave frequency tripling using stacked heterostructure-barrier varactors on InP **MAP** p272
Mode charts for confocal annular elliptic resonators **MAP** p358
Research on microstrip multiway unequal power divider/combiner **MAP** p437
Stabilised CPFDTD algorithm for the analysis of arbitrary 3D PEC structures **MAP** p367
Synthesis of quarter-wave coupled junction circulators using moderately magnetised disc resonators with commensurate eigennetworks **MAP** p238
Transmission line analysis of symmetrical ring resonators **MAP** p184
Whispering gallery dielectric resonator mode GaAs FET oscillator **MAP** p441
Wideband active microwave isolators using GaAs MMIC technology **MAP** p179

WAVEGUIDES

Analysis of interconnect networks with conducting wedge loaded by an inhomogeneous dielectric substrate **MAP** p217
Analysis of multilayer inset dielectric guides containing magnetised ferrites **MAP** p390
Comparative study of two integral-equation formulations for inductive irises in rectangular waveguides **MAP** p483
Coplanar waveguide bend with radial compensation **MAP** p447
Design of compact monolithic dielectric-filled metal-pipe rectangular waveguides for millimetre-wave applications **MAP** p451
Free space dyadic Green's function applied to the full-wave numerical analysis of planar transmission lines and dielectric waveguides **MAP** p328
Method of lines for analysis of crossing transmission lines with finite-thickness conductors **MAP** p254
Mode charts for confocal annular elliptic resonators **MAP** p358
Power based considerations on the spectral domain analysis of leaky waves in covered strip-like transmission lines **MAP** p25
Quasistatic analysis of microstrip lines on lossy inhomogeneous substrates **MAP** p379
Scattering parameters of arbitrarily oriented slot-coupled microstrip lines **MAP** p141
TM-wave radiation from flanged parallel plate into dielectric slab **MAP** p207
Variational expression for propagation coefficient of an electromagnetic wave propagating along a closed rectangular chirowaveguide **MAP** p174

HONORARY EDITORS

Prof. E.L. Daglass (*University of Bristol*)
Prof. C. Jesshope (*University of Surrey*)
Dr. D. Nicole (*University of Southampton*)

Pages in issues of *IEE Proc., Comput. Digit. Tech.* 1996

Pages	Issue No.	Date
1–96	1	January
97–160	2	March
161–204	3	May
205–248	4	July
249–348	5	September
349–444	6	November

This publication is copyright under the Berne Convention and the Universal Copyright Convention. All rights reserved. Apart from any copying under the UK Copyright, Designs and Patents Act 1988, Part 1, Section 38, whereby a single copy of this article may be supplied, under certain conditions, for the purposes of research or private study, by a library of a class prescribed by The Copyright (Librarians and Archivists) (Copying of Copyright Material) Regulations 1989: SI 1989/1212, no part of this publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means without the prior permission of the copyright owners. Permission is, however, not required to copy abstracts of individual contributions on condition that a full reference to the source is shown.

An IEE licensing arrangement exists whereby organisations entering into an agreement are legally entitled to make up to twenty copies of an IEE paper or article.

Authorisation to photocopy items for internal or personal use, or for the internal or personal use of specific clients, is granted by the Institution of Electrical Engineers for libraries and other users registered with the Copyright Clearance Center Transactional Reporting Service, provided that the base fee of $10.00 per copy is paid directly to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA (1350–2387/96 $10.00). This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale.

Photocopies of individual papers published in the *IEE Proceedings* can be supplied from the IEE Library at 10p per page plus a handling charge of 50p per paper, which covers the cost of surface mail (airmail extra). The handling charge is waived if reprints are collected from Savoy Place by purchasers.

The telephone number of the IEE London office is 0171 240 1871; telex: 261176 IEELDN G; facsimile: 0171 240 7735.

The IEE is not as a body responsible for the opinions expressed by individual authors.
The IEE is a member of the Association of Learned & Professional Society Publishers.

AUTOMATA THEORY

Cellular automata based scheme for solution of Boolean equations p174

AUTOMATIC TEST SYSTEMS

Generic DFT approach for pattern sensitive faults in word-oriented memories p199

CIRCUIT THEORY AND DESIGN

Cellular automata based scheme for solution of Boolean equations p174
Hierarchical placement method based on a force-directed algorithm with simultaneous global routing for sea-of-gates p1
Layout-driven chaining of scan flip-flops p421
Note on optimal tile partition for space region of integrated-circuit geometry p246
Removing CSC violations in asynchronous circuits by delay padding p413

CMOS INTEGRATED CIRCUITS

Estimating power consumption of CMOS circuits modelled as symbolic neural networks p331
Functionally asynchronous array processor for morphological filtering of greyscale images p273

CODES AND DECODING

BDD-based spectral approach for Reed-Muller circuit realisation p145
Comment on Public-key cryptosystem design based on factoring and discrete logarithms [and reply] p96
Database of best T-codes p213
Modified Harn signature scheme based on factorising and discrete logarithms p196
Reliability levels for fault-tolerant linear processing using real number error correction p355
Tabular techniques for generating Kronecker expansions p205

COMPUTATIONAL COMPLEXITY

Alternative algorithm for optimisation of Reed-Muller universal logic module networks p385
Application of aggregation strategies in the solution of the optimal routing problem in data networks p120
Branch merging for scheduling concurrent executions of branch operations p369
Cellular automata based scheme for solution of Boolean equations p174
Dynamic evaluation strategy for fine-grain data-parallel computing p181
Exact minimisation of Kronecker expressions for symmetric functions p349
Functional testing of pipelined processors p318
Gaussian-elimination-based algorithm for solving linear equations on mesh-connected processors p407
GRMIN2: a heuristic simplification algorithm for generalised Reed-Muller expressions p376
Optimum partitioning of rectilinear layouts p440
Piecewise estimation of the performability of computer systems p129

COMPUTER APPLICATIONS

Hierarchical placement method based on a force-directed algorithm with simultaneous global routing for sea-of-gates p1
Inverse kinematics computations with modified CORDIC iterations p87
Less expensive test pattern generation technique p17
Note on optimal tile partition for space region of integrated-circuit geometry p246
Reconfigurable parallel VLSI processor for dynamic control of intelligent robots p23
Specification of software for emergency shutdown system of an offshore installation p9

COMPUTER COMMUNICATIONS

Multiprocessor system for interconnection of Ethernet and FDDI networks using ATM via satellite p69

CYBERNETICS AND ROBOTICS

Reconfigurable parallel VLSI processor for dynamic control of intelligent robots p23

DATA COMMUNICATION

Application of aggregation strategies in the solution of the optimal routing problem in data networks p120
Multiprocessor system for interconnection of Ethernet and FDDI networks using ATM via satellite p69
Superscalar instruction issue in an asynchronous microprocessor p266

DATA SECURITY

Comment on Public-key cryptosystem design based on factoring and discrete logarithms [and reply] p96
Modified Harn signature scheme based on factorising and discrete logarithms p196

DIGITAL ARITHMETIC

Design and implementation of a GaAs systolic floating-point processing element p325
Hardware implementation of the Lehmer random number generator p93
Inverse kinematics computations with modified CORDIC iterations p87
Linear-testable and C-testable N,N, modified Booth multipliers p44
Testable on-the-fly carry-save multiplier by alternating input data p345

DIGITAL ELECTRONICS

Functional testing of pipelined processors p318
Functionally asynchronous array processor for morphological filtering of greyscale images p273
Generic DFT approach for pattern sensitive faults in word-oriented memories p199
Linear-testable and C-testable N,N, modified Booth multipliers p44
Superscalar instruction issue in an asynchronous microprocessor p266

DIGITAL FILTERS

Cost-effective novel flexible cell-level systolic architecture for high throughput implementation of 2-D FIR filters p436

DIGITAL TECHNIQUES

Dynamic scheduling in RISC architectures p309

ELECTRONIC CIRCUITS

Hierarchical placement method based on a force-directed algorithm with simultaneous global routing for sea-of-gates p1

EXPERT SYSTEMS

Closed semiring connectionist network for the Bellman-Ford computation p189

FORMAL LOGIC

Alternative algorithm for optimisation of Reed-Muller universal logic module networks p385
Cellular automata based scheme for solution of Boolean equations p174
Exact minimisation of Kronecker expressions for symmetric functions p349
GRMIN2: a heuristic simplification algorithm for generalised Reed-Muller expressions p376
Symbolic method for simplifying AND-EXOR representations of Boolean functions using a binary-decision technique and a genetic algorithm p151
Tabular techniques for generating Kronecker expansions p205
Three-valued quasi-linear transformation for logic synthesis p391
Tradeoff literals against support for logic synthesis of LUT-based FPGAs p111
Using symbolic Rademacher-Walsh spectral transforms to evaluate the agreement between Boolean functions p64

INFORMATION THEORY

Database of best T-codes p213
Fault-tolerant QRD recursive least squares p137

INTEGRATED CIRCUITS

Area efficient systolic interconnection networks p232
Generic DFT approach for pattern sensitive faults in word-oriented memories p199
Note on optimal tile partition for space region of integrated-circuit geometry p246
Reliability levels for fault-tolerant linear processing using real number error correction p355

LOGIC AND SWITCHING CIRCUITS

Area efficient systolic interconnection networks p232
Asynchronous FPGA architectures p282
BDD-based spectral approach for Reed-Muller circuit realisation p145
Cellular automata based scheme for solution of Boolean equations p174
Design and implementation of a GaAs systolic floating-point processing element p325
Design of a low-latency asynchronous adder using speculative completion p301
Estimating power consumption of CMOS circuits modelled as symbolic neural networks p331
Hardware implementation of the Lehmer random number generator p93
KGPMAP: library-based technology-mapping technique for antifuse based FPGAs p203
Layout-driven chaining of scan flip-flops p421
Removing CSC violations in asynchronous circuits by delay padding p413
Superscalar instruction issue in an asynchronous microprocessor p266
Symbolic method for simplifying AND-EXOR representations of Boolean functions using a binary-decision technique and a genetic algorithm p151
Testable on-the-fly carry-save multiplier by alternating input data p345
Tradeoff literals against support for logic synthesis of LUT-based FPGAs p111
Verification of speed-independent data-path circuits p295

LOGIC DESIGN

Alternative algorithm for optimisation of Reed-Muller universal logic module networks p385
Application of Z in digital hardware design p79
Asynchronous FPGA architectures p282
BDD-based spectral approach for Reed-Muller circuit realisation p145
Cellular automata based scheme for solution of Boolean equations p174
Design of a low-latency asynchronous adder using speculative completion p301
Exact minimisation of Kronecker expressions for symmetric functions p349
Generic DFT approach for pattern sensitive faults in word-oriented memories p199
KGPMAP: library-based technology-mapping technique for antifuse based FPGAs p203
Layout-driven chaining of scan flip-flops p421
Less expensive test pattern generation technique p17
Linear-testable and C-testable N,N, modified Booth multipliers p44
Removing CSC violations in asynchronous circuits by delay padding p413
Symbolic method for simplifying AND-EXOR representations of Boolean functions using a binary-decision technique and a genetic algorithm p151
Three-valued quasi-linear transformation for logic synthesis p391
Tradeoff literals against support for logic synthesis of LUT-based FPGAs p111
Verification of speed-independent data-path circuits p295

MATHEMATICAL TECHNIQUES

All-fault-tolerant embedding of a complete binary tree in a group of Cayley graphs p156
Closed semiring connectionist network for the Bellman-Ford computation p189
Exact minimisation of Kronecker expressions for symmetric functions p349
Genetic algorithm for variable ordering of OBDDs p364
Modified Harn signature scheme based on factorising and discrete logarithms p196
New program model for program partitioning on NUMA multiprocessor systems p431
Optimum partitioning of rectilinear layouts p440
Removing CSC violations in asynchronous circuits by delay padding p413
Speculative parallel simulated annealing with acceptance prediction p219
Symbolic method for simplifying AND-EXOR representations of Boolean functions using a binary-decision technique and a genetic algorithm p151

MULTIPROCESSOR SYSTEMS

Area efficient systolic interconnection networks p232
Comparison of two common pipeline structures p161
Delayed precise invalidation–a software cache coherence scheme p337
Development of a method of optimising data distribution on a loosely coupled multiprocessor system p239
Difference clocks: a new scheme for logical time in distributed systems p426
New program model for program partitioning on NUMA multiprocessor systems p431
Speculative parallel simulated annealing with acceptance prediction p219

NEURAL NETS

Closed semiring connectionist network for the Bellman-Ford computation p189
Estimating power consumption of CMOS circuits modelled as symbolic neural networks p331

NUMERICAL ANALYSIS

Development of a method of optimising data distribution on a loosely coupled multiprocessor system p239
Fault-tolerant QRD recursive least squares p137
Functionally asynchronous array processor for morphological filtering of greyscale images p273
Inverse kinematics computations with modified CORDIC iterations p87
KGPMAP: library-based technology-mapping technique for antifuse based FPGAs p203
Using symbolic Rademacher-Walsh spectral transforms to evaluate the agreement between Boolean functions p64

OPTICAL IMAGE PROCESSING

Cellular architecture for affine transforms on raster images p103
Functionally asynchronous array processor for morphological filtering of greyscale images p273

PARALLEL PROCESSING

A loop partition technique for reducing cache bank conflict in multithreaded architecture p30
All-fault-tolerant embedding of a complete binary tree in a group of Cayley graphs p156
Architectural considerations for a self-timed decoupled processor p251
Area efficient systolic interconnection networks p232
Asynchronous implementation of the SCPP-A counterflow pipeline processor p287
Branch merging for scheduling concurrent executions of branch operations p369
Comparison of two common pipeline structures p161
Cost-effective novel flexible cell-level systolic architecture for high throughput implementation of 2-D FIR filters p436
Difference clocks: a new scheme for logical time in distributed systems p426
Dynamic evaluation strategy for fine-grain data-parallel computing p181
Evaluating the performance of parallel programs in a distributed environment p97
Fast algorithm and its systolic realisation for distance transformation p168
Functional testing of pipelined processors p318
Functionally asynchronous array processor for morphological filtering of greyscale images p273
Gaussian-elimination-based algorithm for solving linear equations on mesh-connected processors p407
New program model for program partitioning on NUMA multiprocessor systems p431
Reconfigurable parallel VLSI processor for dynamic control of intelligent robots p23
Rotary pipeline processors p259
Speculative parallel simulated annealing with acceptance prediction p219
Superscalar instruction issue in an asynchronous microprocessor p266
XMESH interconnection network for massively parallel computers p401

PATTERN RECOGNITION

Functionally asynchronous array processor for morphological filtering of greyscale images p273

PERFORMANCE EVALUATION

All-fault-tolerant embedding of a complete binary tree in a group of Cayley graphs p156
Cellular architecture for affine transforms on raster images p103
Cost-effective novel flexible cell-level systolic architecture for high throughput implementation of 2-D FIR filters p436
Development of a method of optimising data distribution on a loosely coupled multiprocessor system p239
Fault-tolerant QRD recursive least squares p137
Functional testing of pipelined processors p318
Non-referenced prefetch (NRP) cache for instruction prefetching p37
Piecewise estimation of the performability of computer systems p129
Reliability levels for fault-tolerant linear processing using real number error correction p355
Software acceleration using programmable hardware devices p55
Speculative parallel simulated annealing with acceptance prediction p219
XMESH interconnection network for massively parallel computers p401

PRODUCTION ENGINEERING

Testable on-the-fly carry-save multiplier by alternating input data p345

PROGRAMMING THEORY

Application of aggregation strategies in the solution of the optimal routing problem in data networks p120
Cellular automata based scheme for solution of Boolean equations p174
Dynamic evaluation strategy for fine-grain data-parallel computing p181
Functional testing of pipelined processors p318
Gaussian-elimination-based algorithm for solving linear equations on mesh-connected processors p407
Optimum partitioning of rectilinear layouts p440
Piecewise estimation of the performability of computer systems p129

RADIO SYSTEMS

Multiprocessor system for interconnection of Ethernet and FDDI networks using ATM via satellite p69

SIGNAL PROCESSING

Cost-effective novel flexible cell-level systolic architecture for high throughput implementation of 2-D FIR filters p436
Design and implementation of a GaAs systolic floating-point processing element p325
Fast algorithm and its systolic realisation for distance transformation p168
Fault-tolerant QRD recursive least squares p137
Modified Harn signature scheme based on factorising and discrete logarithms p196

SWITCHING THEORY

All-fault-tolerant embedding of a complete binary tree in a group of Cayley graphs p156
Alternative algorithm for optimisation of Reed-Muller universal logic module networks p385
Area efficient systolic interconnection networks p232
GRMIN2: a heuristic simplification algorithm for generalised Reed-Muller expressions p376
Multiprocessor system for interconnection of Ethernet and FDDI networks using ATM via satellite p69
Symbolic method for simplifying AND-EXOR representations of Boolean functions using a binary-decision technique and a genetic algorithm p151
Three-valued quasi-linear transformation for logic synthesis p391
Using symbolic Rademacher-Walsh spectral transforms to evaluate the agreement between Boolean functions p64
XMESH interconnection network for massively parallel computers p401

TELECOMMUNICATION

Application of aggregation strategies in the solution of the optimal routing problem in data networks p120
